最新的 DSCI Certification DCPLA 免費考試真題 (Q36-Q41):

問題 #36

Which of the following measures can an organization implement to establish regulatory compliance intelligence? (Choose all that apply.)

- A. Establish a process that keeps a track of applicable legal and regulatory changes
- B. Identify the liabilities imposed by the regulations with respect to specific data elements
- C. Ensure that a mechanism exists for quick and effective provisioning, de-provisioning and authorization of access to information or systems which are exposed to data
- D. Ensure that knowledge with respect to legal and regulatory compliances is managed effectively

答案： A,B

問題 #37

A newly appointed Data Protection Officer is reviewing the organization's existing privacy policy. Which of the following would be the most critical factor for the review process?

- A. Foreseeable challenges in the effective implementation of the policy
- B. Changes in the legal/regulatory regime
- C. Privacy policies of industry peers
- D. Awareness of the business units about the privacy policy

答案： B

解題說明：

While several factors can influence the review of a privacy policy, changes in the legal or regulatory environment are the most critical. The DSCI Privacy Framework underscores that privacy policies must be aligned with applicable laws and standards. A change in the legal/regulatory regime may necessitate revisions to ensure ongoing compliance and avoid legal risks. Internal awareness and peer practices are secondary considerations in comparison.

問題 #38

With respect to privacy implementation, organizations should strive for which of the following:

- A. Demonstrable accountability
- B. None of the above
- C. Checklist based exercise
- D. Meaningful compliance

答案： A

解題說明：

The DSCI Assessment Framework for Privacy (DAF-P) emphasizes the need for organizations to move beyond checkbox compliance to embrace "Demonstrable Accountability." This involves:

- * Being able to show evidence of privacy program implementation
- * Having appropriate governance structures
- * Showing that privacy principles are embedded into processes

This proactive and transparent approach to privacy governance aligns with leading global frameworks.

問題 #39

Before planning the assessment, priority areas need to be determined by conducting a Risk Management exercise. To adequately identify such priority areas, what possible parameters could be considered? (Tick all that apply)

- A. Degree of harm that could result from potential privacy breach
- B. Functions / processes involved in data collection from end customers
- C. Degree of involvement of third parties in processing personal information
- D. Deployment of technology solutions that could potentially intrude privacy
- E. Functions / processes dealing with sensitive personal information such as Personal Health Information (PHI), credit card information, biometrics, among others
- F. Business-related IP dealt by a process/function

答案： A,B,C,D,E

解題說明：

According to the DSCI Assessment Framework for Privacy (DAF-PC), risk-based prioritization is essential in planning privacy assessments. Organizations are advised to consider parameters such as the degree of harm from a potential privacy breach, the involvement of processes that handle sensitive personal data (e.g., PHI or biometrics), technology solutions that may affect privacy, and the extent of third-party involvement. These help determine the areas with high privacy risks needing immediate attention. C (business-related IP) is typically an information security concern, not a privacy concern unless it involves personal data.

問題 #40

Which of the following is not an objective of VPI?

- A. Enable an organization to map its data operations and categorization of PI
- **B. None of the above**
- C. To enable identification of processes, functions and relationships handling personal information
- D. Assess the current state of data spread and transactions of the organization to map this against its privacy objectives

答案: B
