

素敵なEAEP2201対応受験 &合格スムーズEAEP2201トレーニング資料 |効果的なEAEP2201テスト難易度

valid EAEP2201 Enterprise Administration Professional 2201 Practice Course

Please Get the Link of the Exam to proceed further - <https://www.educationry.com/?product=pass-eaep2201-enterprise-administration-professional-2201-certification-exam-educationry>

Most effective these exam dumps are routinely updated with usually precise and most current material by profoundly talented authorities, that have obtained authentication in their absolute very first attempt. Whenever you get your hands around the most current exam dumps preparation supply, then, at that point, you don't need to pressure over alluding to distinctive sources. These correct exam dumps pdf cover just about every single prospectus of this exam. You must merely concentrate on these exam questions cautiously and comprehend them well.

Using the assistance with the exam dumps you can quickly release your stress more than your exam readiness due to the deficiency. Prepare on time and get genuine exam dumps for efficient preparation. Get the additional weight due to the fact of it, you can get the itemized this exam questions connected along with your affirmation. These precise exams supply you using a belief of how to plan for the exam successfully. The genuine exams intended for operating on the expert abilities of the contender for the exam certification dumps who want to be able to cope with just about every one of the concerns impeccably.

Get prepared by means of the updated exam, you find out using the most current innovations, and any time you program by the most recent exam dumps 2022, you comprehend its significance and also the advantages in the executions. The part of the veritable exam dumps is coordinated appropriately by the endeavors of our topic matter experts. Carve out opportunities to perform it appropriately and afterward, you receive the greatest outcomes in your exam conclusion. Make your preparation in advance by taking the exam dumps.

Choose the major excellent exam dumps for the preparation of the exam which are checked by the exam dumps. The greatest exam questions and answers are finished by the precise exam dumps that happen to be in your schedule. Get ready with a compelling exam dumps pdf then you definitely will truly like to answer 90% from the exam certification dumps ideal. The fundamentals of the certified exam are investigated by professionals, so our refreshed exam questions will construct your capacity of inventiveness.

100%合格率のEAEP2201対応受験 & 合格スムーズEAEP2201トレーニング資料 | 大人気EAEP2201テスト難易度

信頼できるEAEP2201の質問と回答は、その分野で豊富な経験を持つ専門家によって開発されました。EAEP2201準備ガイドの絶え間ない更新により、試験問題の高い精度が維持されるため、EAEP2201試験をすばやく使用できます。試験中は、EAEP2201の質問と回答で練習した質問に精通しています。また、EAEP2201試

験問題は非常に正確で有効であるため、合格率は99%~100%です。それが、ほとんどのお客様が常に EAEP2201試験に簡単に合格する理由です。

Esri Enterprise Administration Professional 2201 認定 EAEP2201 試験問題 (Q16-Q21):

質問 # 16

Multiple users report that a map service is experiencing negative performance. Upon review of ArcGIS Monitor data, the GIS analyst finds the following:

- * The minimum number of instances is 2 and the maximum is 8 for that service.
- * The data is in a publication Enterprise Geodatabase with no system usage in excess of 50%.
- * At the p75 level of requests, the map service time is 10 times longer than the service time at the p25 level.
- * The number of instances in use at the p50 level is 8.
- * The maximum % of physical memory in use is 40%, and the maximum % of virtual memory in use is 44% on the ArcGIS Server.
- * The maximum % CPU utilization observed is 53%.

What is causing the issue?

- A. The client is an Android device, and the ArcGIS Server is a Linux virtual machine.
- **B. The network connection between the database server and ArcGIS Server is saturated.**
- C. The maximum instance setting is too low for the demand on the underperforming map service.

正解: B

質問 # 17

A client requires an ArcGIS Server site that provides the following capabilities

- * Serve several cached image services Each service is published from a single raster and updated once a year with new imagery from which a new cache is generated offline before publishing
- * Serve a dynamic feature class of 1,000 points coming from a PostgreSQL enterprise geodatabase Which licensing role does the client need for this ArcGIS Server site?

- A. GIS Server
- B. Mission Server
- **C. Image Server**

正解: C

質問 # 18

A GIS administrator works for the Department of Transportation. Users need to analyze decades of traffic and crash data to determine the interstates with the most incidents. They will also analyze when certain vehicles were speeding and braking, and then correlate this data with vehicular accident locations.

Which server must be configured to support this workflow?

- A. Notebook Server
- B. GeoEvent Server
- **C. GeoAnalytics Server**

正解: C

解説:

ArcGIS GeoAnalytics Server is designed to perform distributed analysis on large volumes of spatial and temporal data. It is particularly suited for workflows that involve analyzing patterns over time and space, such as identifying interstates with the most incidents over decades and correlating vehicle behavior (like speeding and braking) with accident locations.

GeoAnalytics Server provides tools for aggregating data, detecting incidents, and reconstructing tracks, which are essential for understanding complex transportation datasets. Its distributed computing framework allows for efficient processing of big data, making it the appropriate choice for the described workflow.

GeoEvent Server (Option B) is primarily used for real-time data processing and event detection, which is not the focus of this analysis. Notebook Server (Option C) supports interactive data science and analysis workflows using Jupyter notebooks but does

not provide the same level of performance and scalability for big data analysis as GeoAnalytics Server.

質問 # 19

An organization publishes a map image layer to ArcGIS Enterprise that references data from a user-managed PostgreSQL geodatabase.

The schema of a table is updated to add a field, but the map service cannot be stopped due to a Service Level Agreement (SLA). Schema locking is disabled.

Even after restarting the map service and database, the new field is not shown in the REST endpoint.

Which action should the administrator perform?

- **A. Republish the map service by overwriting the original**
- B. Re-enable schema locking for the map service
- C. Ensure that the field is made visible by default in the ArcGIS Enterprise portal
- D. Clear the enterprise geodatabase cache

正解: A

解説:

Map image layers (map services) do not automatically detect schema changes, especially in registered enterprise geodatabases. Even with schema locking disabled, services cache the original schema at the time of publishing. To reflect the new field, you must overwrite the existing service.

From ArcGIS Server documentation:

"If the schema of a dataset is changed after a service is published (such as adding a field), the change is not automatically reflected in the service. You must overwrite the service or republish the map to reflect schema updates."

* Option B is not applicable; field visibility in the portal reflects what's in the published service definition.

* Option C is related to editing access, not field visibility.

* Option D is not a valid administrative action in this context.

質問 # 20

An organization expects a large influx of users who use the standard analysis tools in the portal Map Viewer.

The organization is concerned with the hosting server's available resources.

Which system resource should be closely monitored?

- **A. CPU utilization**
- B. Disk activity
- C. Network utilization

正解: A

解説:

When users perform standard analysis tasks in the portal Map Viewer, the hosting server executes geoprocessing operations that are computationally intensive. These operations require significant CPU resources. Monitoring CPU utilization helps ensure that the server can handle the increased load without performance degradation.

While disk activity and network utilization are important, they are less directly impacted by standard analysis tasks compared to CPU usage. Therefore, CPU utilization is the primary resource to monitor in this scenario.
