Reliable Salesforce-Data-Cloud Exam Cram - Valid Dumps Salesforce-Data-Cloud Free

Our company is a multinational company with sales and after-sale service of Salesforce-Data-Cloud exam torrent compiling departments throughout the world. In addition, our company has become the top-notch one in the fields, therefore, if you are preparing for the exam in order to get the related certification, then the Salesforce Data Cloud Accredited Professional Exam exam question compiled by our company is your solid choice. All employees worldwide in our company operate under a common mission: to be the best global supplier of electronic Salesforce-Data-Cloud Exam Torrent for our customers through product innovation and enhancement of customers' satisfaction. Wherever you are in the world we will provide you with the most useful and effectively Salesforce-Data-Cloud guide torrent in this website, which will help you to pass the exam as well as getting the related certification with a great ease.

All praise and high values lead us to higher standard of Salesforce-Data-Cloud practice engine. So our work ethic is strongly emphasized on your interests which profess high regard for interests of exam candidates. Our Salesforce-Data-Cloud study materials capture the essence of professional knowledge and lead you to desirable results effortlessly. So let us continue with our reference to advantages of our Salesforce-Data-Cloud learning questions.

Valid Reliable Salesforce-Data-Cloud Exam Cram - How to Download for Salesforce Valid Dumps Salesforce-Data-Cloud Free

After a series of investigations and studies, we found that those students who wish to pass the Salesforce-Data-Cloud exam through their own in-depth study of the textbooks are often slack in their learning. Some students may even feel headaches when they read the content that difficult to understand in the textbooks. Our Salesforce-Data-Cloud Study Materials are excellent examination review products composed by senior industry experts that focuses on researching the mock examination products which simulate the real Salesforce-Data-Cloud test environment. And you will be more confident to pass the Salesforce-Data-Cloud exam.

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q148-Q153):

NEW QUESTION # 148
When creating a segment on an individual, what is the result of using two separate containers linked by an AND as shown below?
GoodsProduct | Count | At Least | 1
Color | Is Equal To | red
AND
GoodsProduct | Count | At Least | 1
PrimaryProductCategory | Is Equal To | shoes

- A. Individuals who purchased at least one of any red' product and also purchased at least one pairof 'shoes'

- B. Individuals who made a purchase of at least one 'red shoes' and nothing else
- C. Individuals who purchased at least one of any 'red' product or purchased at least one pair of 'shoes'
- D. Individuals who purchased at least one 'red shoes' as a single line item in a purchase

Answer: A

Explanation:

When creating a segment on an individual, using two separate containers linked by an AND means that the individual must satisfy both the conditions in the containers. In this case, the individual must have purchased at least one product with the color attribute equal to 'red' and at least one product with the primary product category attribute equal to 'shoes'. The products do not have to be the same or purchased in the same transaction. Therefore, the correct answer is A.

The other options are incorrect because they imply different logical operators or conditions. Option B implies that the individual must have purchased a single product that has both the color attribute equal to 'red' and the primary product category attribute equal to 'shoes'. Option C implies that the individual must have purchased only one product that has both the color attribute equal to 'red' and the primary product category attribute equal to 'shoes' and no other products. Option D implies that the individual must have purchased either one product with the color attribute equal to 'red' or one product with the primary product category attribute equal to 'shoes' or both, which is equivalent to using an OR operator instead of an AND operator.

Create a Container for Segmentation
Create a Segment in Data Cloud
Navigate Data Cloud Segmentation

NEW QUESTION # 149

Which two statements are true about using consent API and exercising right to be forgotten?

- A. Data Deletion requests are submitted for Individual profiles
- B. Data Deletion requests are processed within 1 hour
- C. Data deletion requests submitted to Data Cloud are passed to all connected Salesforce Clouds
- D. Data Deletion requests are reprocessed at 30, 60, and 90 days

Answer: A,D

Explanation:

These two statements are true about using consent API and exercising right to be forgotten. Data deletion requests are reprocessed at regular intervals to ensure that any new data related to the individual is deleted.

Data deletion requests are submitted for individual profiles that represent unique identities in Data Cloud.

NEW QUESTION # 150

What are the two minimum requirements needed when using the Visual Insights Builder to create a Calculated Insight?

- A. At least two objects to join
- B. WHERE clause is required
- C. At least one dimension
- D. At least one measure

Answer: C,D

Explanation:

Explanation

These two requirements are needed when using the Visual Insights Builder to create a Calculated Insight. A dimension is an attribute that can be used to group or filter data, such as product category or customer segment. A measure is an attribute that can be used to perform calculations, such as revenue or quantity.

NEW QUESTION # 151

A customer wants to create segments of users based on their Customer Lifetime Value. The source data that will be brought into the Data Cloud does not include that KPI. What process should be followed to achieve this outcome?

- A. Create Calculated Insight > Map Data to Data Model > Use in Segmentation
- B. Insight > Use in Segmentation
- C. Ingest Data > Create Calculated Insight > Use in Segmentation
- D. Map Data to Data Model > Create Calculated Insight > Use in Segmentation
- E. Ingest Data > Map Data to Data Model > Create Calculated

Answer: E

Explanation:
To create segments of users based on their Customer Lifetime Value, the customer needs to first ingest the source data into Data Cloud, then map the data to the Customer 360 data model, then create a calculated insight using the formula editor, and finally use the calculated insight in segmentation. NEW QUESTION # 152
A consultant needs to create a data graph based on several DLOs,
Which step should the consultant take to make this work?

- A. Batch transform the DLOs to multiple DMOs and activate these with the data graph.
- B. Use a data action to update the data graph with the DLO data
- C. Map the DLOS to DMOS and use these in the data graph.
- D. Map the DLOs directly to a data graph.

Answer: C

Explanation:
To create a data graph based on several Data Lake Objects (DLOs) , the consultant should map the DLOs to Data Model Objects (DMOs) and use these in the data graph. Here's why:
Understanding Data Graphs
A data graph in Salesforce Data Cloud represents relationships between entities (e.g., customers, accounts, orders) and their attributes.
It is built using Data Model Objects (DMOs) , which provide a standardized structure for unified profiles and related data.
Why Map DLOs to DMOs?
Role of DLOs and DMOs :
DLOs are raw data sources ingested into Data Cloud.
DMOs are standardized objects used for identity resolution and unified profiles.
Mapping DLOs to DMOs ensures that raw data is transformed into a structured format suitable for data graphs.
Building the Data Graph :
Once the DLOs are mapped to DMOs, the consultant can use the DMOs to define relationships and build the data graph.
This approach ensures consistency and alignment with the unified data model.
Other Options Are Less Suitable :
A). Use a data action to update the data graph with the DLO data : Data actions are used for triggering workflows, not for building data graphs.
C). Map the DLOs directly to a data graph : DLOs cannot be directly mapped to a data graph; they must first be transformed into DMOs.
D). Batch transform the DLOs to multiple DMOs and activate these with the data graph : This is overly complex and unnecessary when mapping DLOs to DMOs suffices.
Steps to Create the Data Graph
Step 1: Map DLOs to DMOs
Navigate to Data Cloud > Data Streams and map the relevant fields from the DLOs to the corresponding DMOs.
Step 2: Define Relationships
Use the Data Model tab to define relationships between DMOs (e.g., linking Individuals to Accounts).
Step 3: Build the Data Graph
Use the mapped DMOs to create the data graph, defining nodes (entities) and edges (relationships).
Step 4: Validate the Graph
Test the data graph to ensure it accurately represents the desired relationships and data flow.
Conclusion
The consultant should map the DLOs to DMOs and use these in the data graph to ensure a structured and consistent approach to building relationships between entities.

NEW QUESTION # 153

......

No need to go after substandard Salesforce-Data-Cloud brain dumps for exam preparation that has no credibility. They just make you confused and waste your precious time and money. Compare our content with other competitors like Pass4sure's dumps, you will find a clear difference in Salesforce-Data-Cloud material. Most of the content there does not correspond with the latest syllabus content. It also does not provide you the best quality. Likewise the exam collection's brain dumps are not sufficient to address all exam preparation needs.
