

# CheckPoint 156-536 Exam Topics Pdf - Valid 156-536 Test Prep

DOWNLOAD the newest Dumpleader 156-536 PDF dumps from Cloud Storage for free: [https://drive.google.com/open?id=1-BLrlc0jta\\_Chlr13uJFgADLsOe5C4us](https://drive.google.com/open?id=1-BLrlc0jta_Chlr13uJFgADLsOe5C4us)

We are committed to helping you pass the exam and get the certificate as soon as possible. 156-536 exam bootcamp of us have the questions and answers, and it not only have quality but also contain certain quantity, it will be enough for you to deal with your exam. With the pass rate more than 98.65%, we can ensure you pass your exam. 156-536 Exam Dumps also have most of knowledge points of the exam, and they may help you a lot. We offer you free update for 365 days after you purchase the 156-536 exam bootcamp.

## CheckPoint 156-536 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Advanced Threat Prevention: CheckPoint Security Administrators will be assessed in this area, which covers advanced techniques for preventing sophisticated threats. This includes leveraging threat intelligence and proactive measures to safeguard endpoints from emerging cyber risks.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Harmony Endpoint Security Management: This section focuses on the skills of Harmony Endpoint Security Professionals and covers the management aspects of Harmony Endpoint Security. It emphasizes how to effectively configure and manage security policies across endpoint devices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Introduction to Harmony Endpoint: This section measures the skills of CheckPoint Security Administrators about the fundamental concepts of Harmony Endpoint. It introduces candidates to the capabilities of the Harmony Endpoint solution, which is designed to protect endpoint devices from various cyber threats.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>Large-Scale Harmony Endpoint Deployment: This domain is aimed at Harmony Endpoint Security Professionals and addresses the challenges associated with deploying Harmony Endpoint at scale. Candidates will learn about strategies for efficient large-scale implementation while maintaining security standards across numerous devices.</li> </ul>

## Valid 156-536 Test Prep, 156-536 Examinations Actual Questions

Our 156-536 test questions provide free trial services for all customers so that you can better understand our products. You can experience the effects of outside products in advance by downloading clue versions of our 156-536 exam torrent. In addition, it has simple procedure to buy our learning materials. After your payment is successful, you will receive an e-mail from our company within 10 minutes. After you click on the link and log in, you can start learning using our 156-536 test material. You can download our 156-536 test questions at any time.

## CheckPoint Check Point Certified Harmony Endpoint Specialist - R81.20 (CCES) Sample Questions (Q74-Q79):

### NEW QUESTION # 74

What is the command required to be run to start the Endpoint Web Interface for on-premises Harmony Endpoint Web Interface access?

- A. start\_web\_mgmt - run in dish
- B. web\_mgmt\_start - run in dish
- C. web\_mgmt\_start - run in expert mode
- D. start\_web\_mgmt - run in expert mode**

**Answer: D**

### NEW QUESTION # 75

How is the Kerberos key tab file created?

- A. Using Kerberos principals
- B. With the ktpass tool**
- C. Using the AD server
- D. Using encryption keys

**Answer: B**

### NEW QUESTION # 76

You must make a decision of which FDE algorithm to be used by one of your clients who specializes in multimedia video editing. What algorithm will you choose?

- A. Video processing is a high bandwidth application which utilizes a lot of HDD access time. You have to use a FDE algorithm with small secret key like XTS-AES 128 bit.
- B. Any kind of data is very important and the Full Disk Encryption technic must be used with the strongest secret key**

possible. Your client has to use strong encryption like XTS-AES 256 bit.

- C. The implementation of a Secure VPN with very strong encryption will make your data invisible in cases of live internet transmission.
- D. In Multimedia applications you do not need to implement any kind of Full disk encryption. You can use software like 7Zip in order to encrypt your data.

**Answer: B**

#### NEW QUESTION # 77

What is the default encryption algorithm in the Full Disk Encryption tab under Advanced Settings?

- A. XTS-AES 256 bit
- B. AES-CBC 256 bit
- C. XTS-AES 128 bit
- D. AES-CBC 128 bit

**Answer: A**

Explanation:

The default encryption algorithm for Full Disk Encryption (FDE) in Check Point Harmony Endpoint, as configured in the Advanced Settings tab, is XTS-AES 256 bit. This is explicitly stated in the CP\_R81.

20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf on page 221, under the "Custom Disk Encryption Settings" section:

"The default encryption algorithm is XTS-AES 256 bit."

This extract confirms that Option C is correct. The document further notes that administrators can choose between XTS-AES 256 bit and XTS-AES 128 bit, but 256 bit is the default, reflecting a preference for stronger encryption. XTS (XEX-based tweaked-codebook mode with ciphertext stealing) is specifically designed for disk encryption, providing better security than CBC (Cipher Block Chaining) modes.

\* Option A ("AES-CBC 128 bit") and Option B ("AES-CBC 256 bit") are incorrect because FDE uses XTS mode, not CBC, which is less suited for disk encryption due to its vulnerabilities in this context.

\* Option D ("XTS-AES 128 bit") is a configurable option but not the default, as the guide specifies 256 bit as the standard setting.

References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 221: "Custom Disk Encryption Settings" (confirms XTS-AES 256 bit as the default algorithm).

#### NEW QUESTION # 78

What capabilities does the Harmony Endpoint NGAV include?

- A. Anti-IPS, Anti-Firewall & Anti-Guard
- B. Zero-Phishing, Anti-Bot & Anti-Virus
- C. Threat Extraction, Threat-Emulation & Zero-Phishing
- D. Anti-Ransomware, Anti-Exploit & Behavioral Guard

**Answer: D**

Explanation:

Harmony Endpoint's Next-Generation Anti-Virus (NGAV) is designed to combat advanced threats using a combination of behavioral analysis, exploit prevention, and ransomware protection. The documentation specifies that NGAV includes Anti-Ransomware, Anti-Exploit, and Behavioral Guard as core capabilities.

The CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf outlines these on page 20, under "Endpoint Security Client": "Harmony Endpoint Anti-Ransomware, Behavioral Guard and Forensics: Prevents ransomware attacks."

Monitors files and the registry for suspicious processes and network activity. Analyzes incidents reported by other components." Additionally, on page 358, under "Harmony Endpoint Threat Extraction, Emulation and Anti-Exploit":

"Anti-Exploit: Detects and prevents exploitation of vulnerabilities in software." While the term "NGAV" is not explicitly used, these components - Anti-Ransomware, Behavioral Guard, and Anti-Exploit - represent the next-generation approach to antivirus protection, focusing on behavior-based detection and prevention of advanced threats like exploits and ransomware. This matches Option A.

The other options are incorrect:

\* Option B ("Anti-IPS, Anti-Firewall & Anti-Guard"): These are not recognized capabilities in the documentation; they appear to be fabricated terms.

\* Option C ("Zero-Phishing, Anti-Bot & Anti-Virus"): Zero-Phishing (page 366) and Anti-Bot (page

353) are separate features, and Anti-Virus is traditional, not NGAV-specific.

\* Option D ("Threat Extraction, Threat-Emulation & Zero-Phishing"): These relate to document sanitization and phishing protection (pages 358-366), not NGAV's core focus.

Thus, Option A accurately reflects Harmony Endpoint NGAV capabilities.

## References:

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 20: "Endpoint Security Client" (lists Anti- Ransomware and Behavioral Guard).

CP\_R81.20\_Harmony\_Endpoint\_Server\_AdminGuide.pdf, Page 358: "Harmony Endpoint Threat Extraction, Emulation and Anti-Exploit" (mentions Anti-Exploit).

## NEW QUESTION # 79

• • • • •

You will receive 156-536 exam materials immediately after your payment is successful, and then, you can use 156-536 test guide to learn. Everyone knows that time is very important and hopes to learn efficiently, especially for those who have taken a lot of detours and wasted a lot of time. Once they discover 156-536 study braindumps, they will definitely want to seize the time to learn. However, students often purchase materials from the Internet, who always encounters a problem that they have to waste several days of time on transportation, especially for those students who live in remote areas. But with 156-536 Exam Materials, there is no way for you to waste time. The sooner you download and use 156-536 study braindumps, the sooner you get the certificate.
