2026 CIS-PA: Efficient Certified Implementation Specialist - Platform Analytics Valid Exam Pattern

If you are having the same challenging problem, don't worry, ServiceNow is here to help. Our direct and dependable ServiceNow Treasury with Certified Implementation Specialist - Platform Analytics Exam Questions in three formats will surely help you pass the ServiceNow Treasury with CIS-PA certification exam. Because this is a defining moment in your career, do not undervalue the importance of our Treasury with Certified Implementation Specialist - Platform Analytics (CIS-PA) exam dumps. Profit from the opportunity to get these top-notch exam questions for the CIS-PA certification test.

ServiceNow Certified Implementation Specialist - Platform Analytics Sample Questions (Q30-Q35):

NEW QUESTION # 30

When are Additional conditions of an Indicator evaluated during Data Collection?

- A. When the Indicator is viewed in the Analytics Hub
- **B. After the Indicator Source conditions**
- C. Before the Indicator Source conditions
- D. At the same time as the Indicator Source conditions

Answer: B

Explanation:

During data collection, Platform Analytics first applies the Indicator Source conditions to retrieve the base dataset. Once the source data is identified, the system then evaluates the Additional conditions defined on the Indicator itself.

This separation allows indicator-specific filtering without duplicating logic in the indicator source, supporting reuse and performance optimization. Additional conditions do not run in parallel with source conditions and are not evaluated at visualization time.

ServiceNow documentation explicitly explains that Indicator conditions refine the dataset after the source query executes, making option D the correct answer.

NEW QUESTION # 31

What does the number of "Inserts" represent in a Job Log record?

- A. The number of Indicator Source records examined
- B. The sum of the stored scores
- **C. The number of Performance Analytics scores stored**
- D. The number of incidents inserted into the instance yesterday

Answer: C

Explanation:

In a Performance Analytics Job Log, the Inserts value represents the number of analytics score records written to the database during that job run. These inserts typically correspond to new indicator scores added to the Indicator Fact table.

This value does not represent business records such as incidents, nor does it indicate how many source records were evaluated.

Records examined and calculations performed may be far greater than the number of inserts, as only final score results are stored.

ServiceNow documentation confirms that Job Log insert counts reflect stored analytics results, making option B the correct interpretation.

NEW QUESTION # 32

Choose 2 options.

Which types of calendars are supported on an Indicator Source?

- A. Fiscal Calendar
- **B. Standard Calendar**
- C. Docket Calendar
- D. Resource Calendar
- **E. Custom Calendar**

Answer: B,E

Explanation:

Indicator Sources in Platform Analytics support Standard calendars and Custom calendars to control how data collection aligns with business time definitions. The Standard Calendar uses regular system time, while Custom Calendars allow organizations to define business-specific working days, holidays, and schedules.

Fiscal calendars are used for financial reporting but are not supported directly by Indicator Sources. Resource and Docket calendars are unrelated to analytics collection. ServiceNow documentation explicitly states that Indicator Sources rely on standard or custom calendars for accurate time-based aggregation, making options B and E the correct answers.

NEW QUESTION # 33

What does the "Allow formula component to be NULL" setting for a Formula Indicator do?

- **A. It allows components to be NULL without aborting the formula**
- B. It converts NULL values to zero
- C. It always returns zero if any component is NULL
- D. It skips the formula calculation if any component is NULL

Answer: A

Explanation:

The Allow formula component to be NULL setting controls how a Formula Indicator behaves when one or more component indicators return NULL values. When enabled, the formula continues to calculate using the available components instead of aborting the calculation.

If this setting is disabled and any component returns NULL, the entire formula result becomes NULL. The setting does not automatically convert NULLs to zero, nor does it skip calculation entirely. ServiceNow documentation explains that this option provides flexibility in environments where some component indicators may not have data for every period, ensuring the formula can

still produce meaningful results.

Therefore, option D accurately describes the behavior.

NEW QUESTION # 34

What is the default Access Control for a new Indicator?

- A. Visible to Just Me, Visible by All Roles is False, role required is pa_admin
- B. Visible to Everyone, Visible by All Roles is False, role required is pa_admin
- C. Visible to Everyone, Visible by All Roles is True
- **D. Visible to Just Me, Visible by All Roles is False**

Answer: D

Explanation:

By default, a newly created Platform Analytics indicator is Visible to Just Me, and Visible by All Roles is set to False. This ensures that indicators are private to their creator until explicitly shared.

No role is required by default, and visibility must be intentionally expanded by updating the access control settings. This design supports governance and prevents incomplete or experimental indicators from being exposed prematurely. ServiceNow documentation confirms this default behavior, making option A the correct answer.

NEW QUESTION # 35

.....

The Web-Based ServiceNow CIS-PA practice test evaluates your Certified Implementation Specialist - Platform Analytics exam preparation with its self-assessment features. With this computer-based program, you may automate the entire ServiceNow exam testing procedure. The web-based ServiceNow CIS-PA practice test elegantly designed interface is compatible with all browsers, including Internet Explorer, Safari, Opera, Google Chrome, and Mozilla Firefox. It will make practice and preparation for the ServiceNow CIS-PA Exam more intelligent, quick, and simple. So, you can be confident that you will find all you need to know to pass the ServiceNow CIS-PA exam questions on the first try.
