## Simulations PCNSE Pdf, PCNSE Exam Topic

The PCNSE study braindumps are compiled by our professional experts who have been in this career for over ten years. Carefully written and constantly updated content of our PCNSE exam questions can make you keep up with the changing direction of the exam, without aimlessly learning and wasting energy. In addition, there are many other advantages of our PCNSE learning guide. Hope you can give it a look and you will love it for sure!

The IT industry is constantly evolving, and with the rise of cyber threats, the demand for skilled security professionals has increased significantly. Palo Alto Networks, a leading cybersecurity company, offers the PCNSE certification exam to validate the skills and knowledge of security engineers. The PCNSE Certification is a globally recognized certification that demonstrates an individual's expertise in designing, deploying, configuring, maintaining, and troubleshooting Palo Alto Networks security solutions.

## Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q60-Q65):

### NEW QUESTION # 60

A firewall administrator wants to have visibility on one segment of the company network. The traffic on the segment is routed on the Backbone switch. The administrator is planning to apply Security rules on segment X after getting the visibility. There is already a PAN-OS firewall used in L3 mode as an internet gateway, and there are enough system resources to get extra traffic on the firewall. The administrator needs to complete this operation with minimum service interruptions and without making any

IP changes.

What is the best option for the administrator to take?

- A. Configure the TAP interface for segment X on the firewall
- **B. Configure vwire interfaces for segment X on the firewall.**
- C. Configure a Layer 3 interface for segment X on the firewall.
- D. Configure a new vsys for segment X on the firewall.

**Answer: B**

Explanation:

As it specifically states in the question that security rules will be applied, VWire is the only method that allows this without making any IP address changes.

<https://docs.paloaltonetworks.com/pan-os/10-1/pan-os-networking-admin/configure-interfaces/virtual-wire-interfaces>

### NEW QUESTION # 61

An administrator is configuring an IPSec VPN to a Cisco ASA at the administrator's home and experiencing issues completing the connection. the following is the output from the command:

What could be the cause of this problem?

- A. The shared secrets do not match between the Palo Alto Networks Firewall and the ASA.
- B. The Proxy IDs on the Palo Alto Networks Firewall do not match the setting on the ASA.
- C. The dead peer detection settings do not match between the Palo Alto Networks Firewall and the ASA.
- **D. The public IP addresses do not match for both the Palo Alto Networks Firewall and the ASA.**

**Answer: D**

### NEW QUESTION # 62

View the GlobalProtect configuration screen capture.

What is the purpose of this configuration?

- A. It forces an internal client to connect to an internal gateway at IP address 192.168.10.1.
- B. It configures the tunnel address of all internal clients to an IP address range starting at 192.168.10.1.
- C. It forces the firewall to perform a dynamic DNS update, which adds the internal gateway's hostname and IP address to the DNS server.
- **D. It enables a client to perform a reverse DNS lookup on 192.168.10.1 to detect that it is an internal client.**

**Answer: D**

Explanation:

Reference:

<https://www.paloaltonetworks.com/documentation/80/globalprotect/globalprotect-admin-guide/globalprotect-por-the-globalprotect-client-authentication-configurations/define-the-globalprotect-agent-configurations>

"Select this option to allow the GlobalProtect agent to determine if it is inside the enterprise network.

This option applies only to endpoints that are configured to communicate with internal gateways. When the user attempts to log in, the agent does a reverse DNS lookup of an internal host using the specified Hostname to the specified IP Address. The host serves as a reference point that is reachable if the endpoint is inside the enterprise network. If the agent finds the host, the endpoint is inside the network and the agent connects to an internal gateway; if the agent fails to find the internal host, the endpoint is outside the network and the agent establishes a tunnel to one of the external gateways"

### NEW QUESTION # 63

Which GlobalProtect gateway setting is required to enable split-tunneling by access route, destination domain, and application?

- A. Satellite mode
- B. No Direct Access to local networks
- C. IPSec mode
- **D. Tunnel mode**

**Answer: D**

Explanation:

To enable split-tunneling by access route, destination domain, and application, you need to configure a split tunnel based on the domain and application on your GlobalProtect gateway. This allows you to specify which domains and applications are included or excluded from the VPN tunnel.

#### NEW QUESTION # 64

Which two actions would be part of an automatic solution that would block sites with untrusted certificates without enabling SSL Forward Proxy? (Choose two.)

- A. Create a Security Policy rule with vulnerability Security Profile attached.
- B. Configure an EDL to pull IP addresses of known sites resolved from a CRL.
- C. Create a Dynamic Address Group for untrusted sites
- **D. Create a no-decrypt Decryption Policy rule.**
- **E. Enable the "Block sessions with untrusted issuers" setting.**

**Answer: D,E**

Explanation:

You can use the No Decryption tab to enable settings to block traffic that is matched to a decryption policy configured with the No Decrypt action ( Policies > Decryption > Action). Use these options to control server certificates for the session, though the firewall does not decrypt and inspect the session traffic.

<https://docs.paloaltonetworks.com/pan-os/10-2/pan-os-admin/decryption/decryption-concepts/no-decryption-decryption-profile>

#### NEW QUESTION # 65

.....

It is important to cover Palo Alto Networks Certified Network Security Engineer Exam (PCNSE) exam topics and check if you need to practice them. If you are talking about the Palo Alto Networks PCNSE certification exam, you need to practice and overcome mistakes. If you do not practice for it, chances are that you might get confused while appearing for the PCNSE Exam. When you get the test study material, it comes with the Palo Alto Networks PCNSE practice exams (desktop & web-based) to solve.
