

Valid PCNSE Exam Question, Valid Brindumps PCNSE Sheet

NEW QUESTION # 100
The USB flash drive has been inserted in the Firewall's USB port, and the Firewall has been restarted using command = "reload" in the system. Upon restart, the Firewall fails to begin the bootstrapping process. The reason is caused because:

- A. PAN-OS version must be 90.x at a minimum for the Firewall to recognize USB.
- B. The bootstrapping file is a required file not in its location.
- C. The bootstrapping file is a required parameter, but it is missing in the USB drive.
- D. The USB must be formatted using the ext4 file system. FAT32 is not supported.
- E. Firewall must be in factory default state or have no private data collected for bootstrapping.

Answers: D

NEW QUESTION # 101
What are the valid deployment options for the crypto engine? (Choose two)

- A. Through the Security Chain
- B. Through the Network Security Chain
- C. Layer 1 Security Chain
- D. Layer 2 Security Chain

Answers: A,C

NEW QUESTION # 102
An administrator configures bandwidth in a Private Access Remote Network compute location with their remote network. What is the maximum amount of bandwidth the administrator could configure at the compute location?

- A. 30Mbps
- B. 50Mbps
- C. 75Mbps
- D. 100 Mbps

Answers: B

Explanation:
The maximum you specify for the bandwidth applies to both the ingress and egress traffic for the remote network connection. If you specify a bandwidth of 50 Mbps, Private Access provides you with a remote network connection with 50 Mbps of bandwidth for ingress and 50 Mbps on egress. Your bandwidth never can go up to 10% over the specified amount when traffic being dropped. For a 50 Mbps connection, the maximum bandwidth allocation is 55 Mbps on ingress and 55 Mbps on egress (50 Mbps plus 10% average allocation).

And the more you know, the more easily you can cope with the difficulties in your work. And the most important is that you can get the PCNSE certification.

Palo Alto Networks Certified Network Security Engineer Exam Sample Questions (Q52-Q57):

NEW QUESTION # 52

A user at an external system with the IP address 65.124.57.5 queries the DNS server at 4.2.2.2 for the IP address of the web server, www.xyz.com. The DNS server returns an address of 172.16.15.1. In order to reach the web server, which Security rule and NAT rule must be configured on the firewall?

- A.
- B.
- C.
- D.

Answer: D

Explanation:

Explanation

The addresses used in destination NAT rules always refer to the original IP address in the packet (that is, the pre-translated address). The destination zone in the NAT rule is determined after the route lookup of the destination IP address in the original packet (that is, the pre-NAT destination IP address). The addresses in the security policy also refer to the IP address in the original packet (that is, the pre-NAT address). However, the destination zone is the zone where the end host is physically connected. In other words, the destination zone in the security rule is determined after the route lookup of the post-NAT destination IP address. <https://docs.paloaltonetworks.com/pan-os/9-1/pan-os-admin/networking/nat/nat-configuration-examples/>

NEW QUESTION # 53

Refer to exhibit.

An organization has Palo Alto Networks NGFWs that send logs to remote monitoring and security management platforms. The network team has reported excessive traffic on the corporate WAN.

How could the Palo Alto Networks NGFW administrator reduce WAN traffic while maintaining support for all existing monitoring/

security platforms?

- A. Any configuration on an M-500 would address the insufficient bandwidth concerns.
- B. Forward logs from external sources to Panorama for correlation, and from Panorama send them to the NGFW.
- C. Configure log compression and optimization features on all remote firewalls.
- **D. Forward logs from firewalls only to Panorama and have Panorama forward logs to other external services.**

Answer: D

Explanation:

NEW QUESTION # 54

in URL filtering, which component matches URL patterns?

- A. signature matching on the data plane
- B. live URL feeds on the management plane
- C. security processing on the data plane
- **D. single-pass pattern matching on the data plane**

Answer: D

Explanation:

Explanation

Content-ID: a single hardware-accelerated signature matching engine that uses a uniform signature format to scan traffic for data (credit card numbers, social security numbers, and custom patterns) and threats (vulnerability exploits - IPS, viruses, and spyware) plus a URL categorization engine to perform URL filtering. "

NEW QUESTION # 55

PAN-OS 8.0 introduced an automated correlation engine that analyzes log patterns and generates correlation events visible in the new Application Command Center (ACC).

Which license must the firewall have to obtain new correlation objectives?

- A. Application Center
- B. URL Filtering
- C. GlobalProtect
- **D. Threat Prevention**

Answer: D

NEW QUESTION # 56

Which three actions can Panorama perform when deploying PAN-OS images to its managed devices? (Choose three.)

- A. upload and install
- **B. upload-only**
- C. verify and install
- **D. upload and install and reboot**
- **E. install and reboot**

Answer: B,D,E

Explanation:

<https://docs.paloaltonetworks.com/pan-os/10-2/pan-os-web-interface-help/panorama-web-interface/panorama-device-deployment/manage-software-and-content-updates> Upload only to device reboot device after install and the last one im sorta at a loss.

NEW QUESTION # 57

.....

Our Palo Alto Networks Certified Network Security Engineer Exam exam questions provide with the software which has a variety of self-study and self-assessment functions to detect learning results. The statistical reporting function is provided to help students find weak points and deal with them. This function is conducive to pass the Palo Alto Networks Certified Network Security Engineer Exam exam and improve you pass rate. Our software is equipped with many new functions, such as timed and simulated test functions. After you set up the simulation test timer with our PCNSE Test Guide which can adjust speed and stay alert, you can devote your mind to learn the knowledge. There is no doubt that the function can help you pass the Palo Alto Networks Certified Network Security Engineer Exam exam.
