

Pass Guaranteed Network Appliance - NS0-185 Pass-Sure Online Bootcamps

What was your original intention of choosing a product? I believe that you must have something you want to get. NS0-185 exam materials allow you to have greater protection on your dreams. This is due to the high passing rate of our NS0-185 study questions which is high as 98% to 100%. And our NS0-185 exam questions own a high quality which is easy to understand and practice. At the same time, our price is charming. Just come and buy it!

Network Appliance NS0-185 Exam Syllabus Topics:

Section	Objectives
Topic 1: ONTAP Configuration	- Installation troubleshooting support tools - Add or remove cluster nodes - Cluster peering setup - Security hardening
Topic 2: ONTAP Switches	- Switch configuration software requirements - Switched cluster cabling
Topic 3: Basic Installation Topics and Tools	- Installation preparation tools and documentation - Physical cabling of ONTAP nodes
Topic 4: Customer Handoff	- Documentation creation - Installation validation tools - Customer delivery and handoff
Topic 5: ONTAP Networking	- Cluster networking configuration - Network types in ONTAP clusters
Topic 6: ONTAP Concepts	- Cluster controller components - Aggregate creation - Cluster installation and expansion - ONTAP updates and version management

NS0-185 Test Labs - NS0-185 Latest Dumps

Many people are afraid of walking out of their comfortable zones. So it is difficult for them to try new things. But you will never grow up if you reject new attempt. Now, our NS0-185 study quiz can help you have a positive change. It is important for you to keep a positive mind. Our NS0-185 Practice Guide can become your new attempt. And our NS0-185 exam braindumps will bring out the most effective rewards to you as long as you study with them.

Network Appliance NetApp Storage Installation Engineer, ONTAP Professional Exam Sample Questions (Q55-Q60):

NEW QUESTION # 55

According to NetApp documentation, what should be used when using the Cluster Switch Health Monitor (CSHM) and log collection features?

- A. HTTP
- B. Telnet
- C. SSL
- D. SSH

Answer: D

Explanation:

The Cluster Switch Health Monitor (CSHM) is a diagnostic feature used to monitor the health and configuration of cluster network switches. As part of ONTAP SAN implementation testing and troubleshooting, CSHM relies on secure, authenticated communication between the cluster and the switches.

NetApp installation and operational documentation clearly specifies that SSH must be used for both CSHM monitoring and log collection. SSH provides encrypted communication, authentication, and command execution capabilities that are required to securely access switch operating systems and retrieve diagnostic information.

Protocols such as Telnet and HTTP are not acceptable because they transmit data in clear text and do not meet NetApp security standards. SSL is not used for switch CLI access or log retrieval in the context of CSHM.

Using SSH ensures compliance with security best practices while enabling ONTAP to collect switch logs, execute health checks, and validate switch configuration state. This requirement is consistently reinforced in NetApp installation objectives as part of secure cluster infrastructure design.

Therefore, the correct answer is D (SSH).

NEW QUESTION # 56

After the installation of a new NetApp FAS system, you use the NetAppDocs tool for site design documentation. In this scenario, in which three document formats would you create an inventory report? (Choose three.)

- A. .ps
- B. .html
- C. .xlsx
- D. .docx
- E. .pdf

Answer: C,D,E

Explanation:

Within the ONTAP SAN solution assessment domain, NetApp emphasizes the creation of accurate and reusable documentation immediately after system installation. One of the supported tools for this purpose is NetAppDocs, which is designed to collect system configuration data and generate standardized inventory and design documentation. According to NetApp Storage Installation concepts and objectives, inventory reports must be produced in formats that support both technical review and customer handoff, while remaining editable and auditable.

NetAppDocs is explicitly described in NetApp documentation as supporting Microsoft Word, Microsoft Excel, and PDF outputs for inventory-style reports. These formats align with operational best practices defined in installation and assessment workflows. Word (.docx) files are used to present structured design narratives and annotated configuration details. Excel (.xlsx) files are used to present tabular inventory data such as controllers, disk shelves, ports, adapters, WWPNS, and LIF assignments, which are critical for SAN assessment and future expansion planning. PDF (.pdf) files are used as finalized, non-editable deliverables suitable for compliance records, customer signoff, and archival purposes.

Formats such as HTML and PostScript (.ps) are not identified in NetApp Storage Installation objectives as supported NetAppDocs inventory outputs. These formats do not align with NetApp's standardized documentation deliverables and are not referenced in official installation or assessment documentation. As a result, they are excluded.

From a SAN-focused assessment perspective, the ability to generate Word, Excel, and PDF reports ensures consistency across deployment teams, simplifies validation of ONTAP SAN configurations, and supports accurate lifecycle documentation. These formats are repeatedly reinforced in NetApp installation guidance as the approved and supported inventory report outputs. Therefore, the correct answers are A (.docx), C (.pdf), and E (.xlsx), as they are the only formats verified and supported for NetAppDocs inventory reporting within NetApp Storage Installation concepts and domains provided by NetApp.

NEW QUESTION # 57

A customer is asked to install a new AFF ASA A700 system. During the installation, the customer asks if ONTAP 9.8 is supported with their host's OS version running Windows 2016.

In this scenario, which NetApp tool would verify supportability?

- A. ONTAP System Manager
- **B. Interoperability Matrix Tool**
- C. Active IQ OneCollect
- D. Active IQ Unified Manager

Answer: B

Explanation:

Verifying interoperability between ONTAP versions, storage platforms, host operating systems, protocols, and host utilities is a mandatory step in NetApp solution assessment and installation planning. The Interoperability Matrix Tool (IMT) is the authoritative NetApp resource used to confirm whether a specific combination of components is supported.

In this scenario, the customer needs to verify that ONTAP 9.8 is supported with Windows Server 2016 on an AFF ASA A700 system. IMT allows administrators to search by storage OS version, platform model, host OS, protocol (iSCSI, FC, NVMe), and host utilities to ensure the configuration is supported.

ONTAP System Manager is used for system administration, not supportability validation. Active IQ Unified Manager focuses on monitoring and performance. Active IQ OneCollect is used for data collection, not compatibility verification.

Therefore, the correct tool is the Interoperability Matrix Tool.

NEW QUESTION # 58

When configuring NFS access for Linux clients, which two configurations are required on the ONTAP system to allow proper file access and export control?

- **A. Enable NFS service on SVM**
- B. Configure FC zoning
- C. Create igroups
- **D. Create export policies**

Answer: A,D

Explanation:

NFS service must be enabled, and export policies define access permissions. FC zoning and igroups are SAN-related configurations and are not required for NFS.

NEW QUESTION # 59

A customer wants to test the SnapMirror feature in their production system but has no license for it. What do you tell the customer in this situation?

- A. You can download a SnapMirror demo license from mysupport.netapp.com.
- B. You must order a fully licensed demo cluster from NetApp sales.
- C. You cannot test additional features.
- **D. You must contact your NetApp sales team to obtain a demo license.**

Answer: D

Explanation:

<https://docs.netapp.com/us-en/ontap/data-protection/snapmirror-licensing-concept.html>

NEW QUESTION # 60

.....

Getting tired of humdrum life, you may want to get some successful feeling or try something different instead. We all know that is of

important to pass the NS0-185 exam and get the NS0-185 certification for someone who wants to find a good job in internet area, and it is not a simple thing to prepare for exam. So you are in the right place now. The thoughtfulness of our NS0-185 Study Materials services is insuperable. What we do surly contribute to the success of NS0-185 practice materials.
