Reliable Arch-303 Study Plan | Examinations Arch-303 Actual Questions

As long as you study with our Arch-303 exam braindumps, the benefits are more than you can consider, you are bound to pass the Arch-303 exam, let along various opportunities like getting promotion, being respected by surrounding people on your profession's perspective. All those beneficial outcomes come from your decision of our Arch-303 simulating questions. We are willing to be your

side offering whatever you need compared to other exam materials that malfunctioning in the market.

Salesforce Certified B2C Commerce Architect Sample Questions (Q64-Q69):

NEW QUESTION # 64
An Architect is configuring a data replication schedule.
Which task(s) can be removed In order to reduce replication times?

- A. Campaign
- B. Search Indexes
- C. Storefront URLs
- D. Static content

Answer: D

Explanation:
Reducing the replication times in data synchronization can be effectively achieved by removing or reducing frequency of tasks that are less critical or that do not change frequently. Static content, such as images and static texts that do not change often, can be safely removed from frequent replication schedules (Answer B).
This adjustment will reduce the data load and frequency of updates, thereby speeding up the overall replication process. Unlike dynamic content like campaigns, search indexes, or URLs that might change frequently and impact user experience or site functionality if not updated, static content does not typically necessitate immediate replication, making it a suitable candidate for removal to enhance replication efficiency.

NEW QUESTION # 65
Northern Trail Outfitters (NTO) operate 200 physical stores. NTO has products that are available in some of the physical stores and not available in others. The closest physical store is determined based on customer s post zip code when they are shopping online. Only the products that are available in the customer's closest physical store should be presented to the customer to the search results.
What are the two feasible technical approaches to meet these requirements?
Choose 2 answers

- A. Create a separate pricebook per physical store. Use post/zip code to activate this pricebook through a customer group. Show only the products with price by applying price refinement.
- B. Create a separate category per physical store use post/Tip code with a mapping to determine the relevant category. Show only the products from this category.
- C. Create a separate site per physical store. Use post/zip code to redirect the customer to the relevant site.
  Show the products from the site navigation catalog.
- D. Create a separate shipping method per physical store. Use post/zip code to determine the applicable shipping method.
  Show only the products that are not excludedfrom the shipping method.

Answer: A,B

Explanation:
For Northern Trail Outfitters to ensure that only products available in a customer's closest physical store are shown:
* Option B is effective because it organizes inventory by store-specific categories, which can then be dynamically linked to a customer's location via their postal/zip code. This allows the system to filter search results based on the relevant category that corresponds to the closest store.
* Option D leverages separate pricebooks that are specific to each store, enabling product availability to be managed through price refinements. This method also uses the customer's zip code to activate the appropriate pricebook, ensuring that only products priced (and thus available) in the nearest store are displayed.
Both methods are scalable and integrate seamlessly with the existing infrastructure of the Salesforce B2C Commerce platform.

NEW QUESTION # 66
During code review, the Architect found that there is a service call on every visit of the product detail woe (PDP).
What best practices should the Architect ensure are followed for the service configuration?
Choose 2 answers

- A. Circuit breaker is enabled.

- B. Service mock up call is configured.
- C. Service timeout is set.
- D. Service logging is disabled.

Answer: B

Explanation:
For logging practices in a complex LINK cartridge integration, the recommendation is:
* Get logger for cartridge-specific category (C): This practice allows for more precise and relevant logging by focusing on the specific cartridge, making troubleshooting more efficient.
* Report debug level message for the back-end asynchronous communication: This ensures that all detailed interactions are logged, providing valuable data for diagnosing issues.
* Report all errors at error level message: This categorizes all critical issues under error logs, which is essential for quick identification and resolution of problems affecting the system's operations.
This structured logging strategy enhances the ability to monitor and troubleshoot the system effectively, especially in complex integrations where multiple components interact asynchronously.

NEW QUESTION # 67
A new dent is moving from their existing ecommerce platform to B2C Commerce. They have an existing service that connects to the Email Marketing System. The endpoint of the service can directly parse the data posted by the customer from the Storefront page for marketing materials subscriptions. it if required that theservice implementation on the B2C Commerce site supports authentication and encoding.
What type should the Architect document this new service as?

- A. Generic
- B. SOAP
- C. HTTP
- D. HTTP Form

Answer: C

Explanation:
For a service that connects to an Email Marketing System where the endpoint can directly parse data posted by the customer from the storefront for marketing material subscriptions, documenting the service as an HTTP service is appropriate. This type of service will likely involve straightforward HTTP requests with authentication and encoding to ensure data integrity and security. The HTTP service type supports these requirements effectively, facilitating secure, reliable data transmission between the storefront and the email marketing system.

NEW QUESTION # 68
A client receives multiple feeds from third parties on the same SFTP location:
* Product prices (sftp: prod/prices)
* Stores information (sftp: prod/stores;
* Product information (sftp: prod/catalog)
* Categories information (sftp: prod/marketing)
* Content (sftp: prod/marketing)
Some of the feeds are placed on sftp multiple times a day, as the information is updated in the source system.
The Architect decides to have only two jobs:
* One that checks and downloads available feeds every hour
* One that imports the files from Webdav once a day before the data replication, using the standards steps available in the Job
Framework Which design is correctfor the import Job, taking the steps scope in consideration?

- A. - foursibling flows execute steps in parallel: import products, stores, prices, content- last flow executes steps in sequence import categories, reindex
- B. - three siting flows Import steps In parallel: import products, stores, prices- fourth flow executes: import categories- last flow executes steps in sequece: reindex, Import content
- C. - four sibling flows execute steps ki parallel: import products, stores, prices, content- fifth flow executes: import categories- last flow executes steps In sequence: reindex
- D. -Four sibling flows execute steps in parallel: import products, stores, price, content-last flow executes steps in sequence: import:categories, reindex

Answer: A

Explanation:
This design maximizes efficiency and concurrency. By having the jobs that import products, stores, prices, and content run in parallel, the system can handle multiple data streams simultaneously, reducing total processing time. The sequential execution of importing categories followed by reindexing ensures that all new and updated information is properly indexed and available for site use, following the completion of the import of more frequently updated data. This order respects dependencies between steps and aligns with best practices for handling complex data workflows in B2C Commerce environments.

NEW QUESTION # 69

......

There are thousands of customers have passed their exam successfully and get the related certification. After that, all of their Salesforce Certified B2C Commerce Architect exam torrents were purchase on our website. Our Arch-303 study tool boost three versions for you to choose and they include PDF version, PC version and APP online version. Each version is suitable for different situation and equipment and you can choose the most convenient method to learn our Arch-303 test torrent. For example, APP online version is printable and boosts instant access to download. You can study the Salesforce Certified B2C Commerce Architect guide torrent at any time and any place. We provide 365-days free update and free demo available. The PC version of Arch-303 Study Tool can stimulate the real exam's scenarios, is stalled on the Windows operating system and runs on the Java environment. You can use it any time to test your own exam stimulation tests scores and whether you have mastered our Arch-303 test torrent or not.

Reliable Arch-303 Study Plan: https://www.examstorrent.com/Arch-303-exam-dumps-torrent.html

In addition, you will easily pass the exam with the help of our Arch-303 exam quiz material, To handle this, our Arch-303 study materials will provide you with a well-rounded service so that you will not lag behind and finish your daily task step by step, All staff has made great dedication to developing the Salesforce Arch-303 exam simulation, Our Arch-303 real test also allows you to avoid the boring of textbook reading, but let you master all the important knowledge in the process of doing exercises.

Creating a Message Filter in Mozilla, Franklin Electronic Publishers sent me a handful of modules containing electronic texts of reference books, In addition, you will easily pass the exam with the help of our Arch-303 Exam Quiz material.

2026 Arch-303 – 100% Free Mock Test | Trustable Reliable Salesforce Certified B2C Commerce Architect Study Plan

To handle this, our Arch-303 study materials will provide you with a well-rounded service so that you will not lag behind and finish your daily task step by step.
