Which business rule actions should you use? To answer, drag the appropriate business rule actions to the correct fields. Each business rule action may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Graphical user interface, text, application Description automatically generated

Scenario:

Weight: Set visibility action to No.

Age: Set Business Required action to Business required

Height: Set visibility action to No.

NEW QUESTION # 68

You need to develop a set of Web API's for a company.

What should you implement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

Box 1: Functions

most functions and services that are stateless and do not have side effects.

Box 2: Actions

Actions can have side effects.

Box 3: Complex types

Reference:

https://docs.microsoft.com/en-us/powerapps/developer/common-data-service/webapi/use-web-api-actions

NEW QUESTION # 69

An organization has a Dynamics 365 Sales environment.

You need to create a Power Apps component.

Which three actions should you perform in sequence? To answer, move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:

Explanation:

Step 1: Run pac pcf init -namespace ..

This is the first command which creates basic folder structure of PCF control project.

Run the following command to create the control. The format of the control is:

pac pcf init -namespace <specify your namespace here> -name <put component name here> -template <component type>

Step 2: Run the npm install command

Install Dependencies

Once 'init' sets up the basic folder, as a next step install all the PCF control dependencies using 'npm install' command.

Example:

Now at this point, there is nothing we have actually created. However, the solution created contains sample PCF control code.

Step 3: Run the following np run build command

Build PCF Component.

Once you implement the PCF component, build the code for any syntax errors.

Syntax:

npm run build
