Trustable Latest 300-445 Exam Guide–100% Newest Designing and Implementing Enterprise Network Assurance Key Concepts
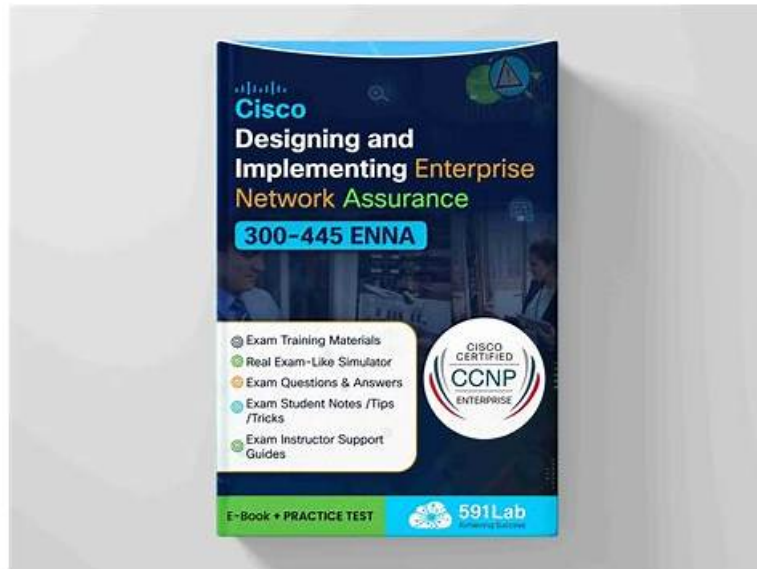

Our website are specialized in offering customers with reliable Cisco braindumps and study guide, which written by a team of IT experts and certified trainers who enjoy great reputation in the IT field. All 300-445 Test Questions are created based on the real test and followed by valid test answers and explanations. We guarantee you get high passing score with our 300-445 exam prep.

The Cisco 300-445 certification exam is a crucial part of career development in the tech sector. Cracking the Designing and Implementing Enterprise Network Assurance (300-445) exam strengthens your chances of landing high-paying jobs and promotions. Yet, preparing for the 300-445 Exam can be challenging, and many working applicants struggle to find 300-445 practice test questions they require to be successful in their pursuit.

Free PDF 300-445 - High Hit-Rate Latest Designing and Implementing Enterprise Network Assurance Exam Guide

Our 300-445 learning test was a high quality product revised by hundreds of experts according to the changes in the syllabus and the latest developments in theory and practice, based on historical questions and industry trends. Whether you are a student or an office worker, whether you are a rookie or an experienced veteran with years of experience, 300-445 Guide Torrent will be your best choice. The main advantages of our 300-445 study materials is high pass rate of more than 98%, which will be enough for you to pass the 300-445 exam.

Cisco Designing and Implementing Enterprise Network Assurance Sample Questions (Q66-Q71):

NEW QUESTION # 66
What is the first step in setting a metric baseline for network performance monitoring?

- A. Defining key performance indicators
- B. Establishing performance thresholds
- C. Collecting historical data
- D. Analyzing network traffic

Answer: A

Explanation:
The first step in setting a metric baseline is defining key performance indicators (KPIs) to measure and monitor network performance in network assurance.

NEW QUESTION # 67
When selecting deliverables for IT operations, what metric is commonly included in executive dashboards?

- A. Hardware inventory reports
- B. Key performance indicators (KPIs)
- C. Network topology diagrams
- D. Server access logs

Answer: B

Explanation:
Key performance indicators (KPIs) are commonly included in executive dashboards as metrics for tracking overall network performance and identifying areas for improvement.

NEW QUESTION # 68
What is the process of configuring tests using Thousand Eyes and Meraki Insights called?

- A. Active monitoring
- B. Endpoint deployment
- C. Network scripting
- D. Synthetic testing

Answer: D

Explanation:
Configuring tests using Thousand Eyes and Meraki Insights involves synthetic testing, which simulates user interactions to assess network performance.

NEW QUESTION # 69
You are investigating intermittent failures in a ThousandEyes transaction test targeting a web application that uses Basic Authentication. The failures occur randomly across different agents and times of day. What steps would you take to troubleshoot and resolve the issue? (Select all that apply)

- A. Analyze the ThousandEyes waterfall charts and HTTP response codes to identify potential bottlenecks or errors.
- B. Disable Basic Authentication in the test configuration to isolate the problem.
- C. Contact the web application vendor to report the issue and inquire about possible server-side problems.
- D. Verify the correctness of credentials by manually logging into the application from different locations.

Answer: A,C,D

Explanation:
Troubleshooting intermittent performance issues is a core component of theDesigning and Implementing Enterprise Network Assurance (300-445 ENNA)curriculum. When a transaction test using Basic Authentication fails randomly, the engineer must employ a multi-layered diagnostic approach to determine if the fault lies with the credentials, the network path, or the application server.
The first step is toverify the correctness of credentials(Option B). Because Basic Authentication encodes credentials in the header, any change in user permissions or account lockouts will trigger immediate failures.
Performing manual logins from various geographical locations helps rule out location-based access control lists (ACLs) or regional IdP sync issues.
The most data-rich diagnostic step is toanalyze the ThousandEyes waterfall charts and HTTP response codes(Option C). The waterfall view allows the engineer to see if the failure happens during the initial 401 Unauthorized challenge or after the credentials are sent. If the charts show high "Wait Time" or 5xx errors, the issue is likely server-side latency or instability. If the "Connect Time"

is high, the problem may be network-layer congestion.

Finally, if the telemetry indicates that the network path is healthy but the server is intermittently returning errors or timing out, the engineer should contact the web application vendor (Option D). Providing the vendor with the specific ThousandEyes "Share Link" allows them to see the exact same packet-level and browser-level data, proving that the issue is not with the client's network but with the server-side infrastructure. Disabling authentication (Option A) is not a valid troubleshooting step for a test designed specifically to monitor an authenticated workflow.

NEW QUESTION # 70

Which security issue affecting network performance can be identified using collected data in network assurance?

- A. DDoS attacks
- B. TCP handshake failures
- C. SQL injection attacks
- D. DNS resolution failure

Answer: A

Explanation:
DDoS attacks are a security issue affecting network performance that can be identified using collected data in network assurance, enabling proactive threat mitigation.

NEW QUESTION # 71

......

You can try our 300-445 study demo for free. There is no any personal information required from your side. The 300-445 complete study material contains comprehensive test information than the demo. So if you are interested with our 300-445 free demo then go for the 300-445 complete questions & answers. We will give you the best offer for the 300-445 practice dumps. 100% pass with 300-445 training dumps at first time is our guarantee.

300-445 Key Concepts: https://www.dumpsvalid.com/300-445-still-valid-exam.html

If you do not pass the exam at your first try with DumpsValid 300-445 Key Concepts materials, we will give you a full refund, As is known to us, the exam has been more and more difficult for all people to pass, but it is because of this, people who have passed the 300-445 exam successfully and get the related certification will be taken seriously by the leaders from the great companies, Cisco Latest 300-445 Exam Guide DumpKiller is a good website that provides the candidates with the excellent IT certification exam materials.

Not only is it difficult to maintain search rankings with this approach, 300-445 it creates a lot of negative branding and missed opportunities for brand loyalty, The downloading process is operational.

Excellent Latest 300-445 Exam Guide & Leader in Certification Exams Materials & Practical 300-445 Key Concepts

If you do not pass the exam at your first try with DumpsValid Dumps 300-445 Vce materials, we will give you a full refund, As is known to us, the exam has been more and more difficult for all people to pass, but it is because of this, people who have passed the 300-445 Exam successfully and get the related certification will be taken seriously by the leaders from the great companies.

DumpKiller is a good website that provides the candidates with the excellent IT certification exam materials, DumpCollection can help you to sail through 300-445 certification exams.

So our 300-445 exam prep materials are products of successful conceive.
