Pass Guaranteed Quiz Microsoft - GH-300 - GitHub Copilot –High Pass-Rate Free Practice Exams

I believe that a lot of people working in the IT industry hope to pass some IT certification exams to obtain the corresponding certifications. Some IT authentication certificates can help you promote to a higher job position in this fiercely competitive IT industry. Now the very popular Microsoft GH-300 authentication certificate is one of them. Although passing the Microsoft certification GH-300 exam is not so easy, there are still many ways to help you successfully pass the exam. While you can choose to spend a lot of time and energy to review the related IT knowledge, and also you can choose an effective training course. TestKingFree can provide the pertinent simulation test, which is very effective to help you pass the exam and can save your precious time and energy to achieve your dream. TestKingFree will be your best choice.

Microsoft GH-300 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">How GitHub Copilot Works and Handles Data: Designed for Machine Learning Engineers and Data Privacy Specialists, this section covers the data lifecycle and processing behind Copilot's code suggestions. It explains how context is gathered, prompts constructed, responses generated, and post-processed through proxy services. Candidates understand Copilot's data policies, handling of inputs, and limitations such as context window size and data age influencing suggestion relevance.
Topic 2	<ul style="list-style-type: none">Responsible: This section of the exam measures skills of AI Ethics Officers and Risk Managers and covers the responsible and ethical usage of AI technologies. It explains the risks and limitations associated with generative AI tools, including biases in training data and the need to validate AI outputs. Candidates learn how to operate AI responsibly by identifying potential harms such as bias, fairness, privacy concerns, and mitigating these harms by applying ethical AI principles.

Topic 3	<ul style="list-style-type: none"> Domain 4: Prompt Crafting and Prompt Engineering This section measures skills of Software Developers and AI Interaction Designers in effectively crafting prompts to optimize Copilot's output. It reviews foundational concepts such as prompt components, the role of language in prompting, zero-shot vs. few-shot prompting, and how chat history influences responses. Best practices and engineering principles for prompt design and training methods are also covered.
Topic 4	<ul style="list-style-type: none"> Privacy Fundamentals and Context Exclusions: This domain focuses on Security Engineers and Compliance Officers and addresses improving code quality with Copilot's test suggestions and security optimizations. It covers identification of security vulnerabilities, performance enhancements, and privacy features like content exclusions at repository and organization levels with explanation of their limitations. Candidates learn about safeguarding mechanisms such as duplication detection, contractual protections, security checks, and troubleshooting guide for common Copilot issues including context exclusions and suggestion gaps.

Microsoft GitHub Copilot Sample Questions (Q112-Q117):

NEW QUESTION # 112

A team is using GitHub Copilot Individual in their daily development activities. They need to exclude specific files from being used to inform code completion suggestions. How can they achieve this?

- A. Use the #file Chat variable to exclude the files
- B. Upgrade to Copilot Business
- C. Have an organization owner configure content exclusions
- D. Add a .gitignore file to the repo
- E. Have a repo administrator configure content exclusions

Answer: B

Explanation:

"Content exclusions are available only with GitHub Copilot Business and Enterprise. Copilot Individual users cannot configure exclusions." This confirms that the only way for the team to achieve exclusions is by upgrading to Copilot Business.

References: GitHub Copilot content exclusions documentation.

NEW QUESTION # 113

Which REST API endpoint is used to modify details about a GitHub Copilot Business subscription? (Each correct answer presents part of the solution. Choose two.)

- A. Migrate Copilot seat assignments between GitHub organizations
- B. Reassign Copilot seats based on GitHub repository size
- C. Upgrade or downgrade the subscription tier
- D. Remove teams from the Copilot subscription for an organization
- E. Add teams to the Copilot subscription for an organization

Answer: D,E

Explanation:

The REST API endpoints are used to add and remove teams from the Copilot Business subscription within an organization.

Reference: GitHub Copilot Business API documentation.

NEW QUESTION # 114

How can GitHub Copilot assist in maintaining consistency across your tests?

- A. By writing the implementation code for the function based on context.
- B. By automatically fixing all tests in the code based on the context.
- C. By providing documentation references based on industry best practices.
- D. By identifying a pattern in the way you write tests and suggesting similar patterns for future tests.

Answer: D

Explanation:

"Copilot learns from the patterns in your existing tests and suggests similar structures, which helps maintain consistency across the test suite." This confirms that Copilot supports test consistency through pattern recognition and suggestion.

References: GitHub Copilot testing documentation.

NEW QUESTION # 115

What is the process behind identifying public code matches when using a public code filter enabled in GitHub Copilot?

- A. Comparing suggestions against public code using machine learning.
- B. Reviewing the user's browsing history to identify public repositories
- C. Analyzing the context and structure of the code being written
- **D. Running code suggestions through filters designed to detect public code**

Answer: D

Explanation:

When the public code filter is enabled, GitHub Copilot runs code suggestions through filters designed to detect matches with publicly available code. This helps prevent the generation of code that might infringe on copyright or licensing agreements.

Reference: GitHub Copilot documentation on public code filtering and licensing.

NEW QUESTION # 116

How can GitHub Copilot assist developers during the requirements analysis phase of the Software Development Life Cycle (SDLC)?

- A. By managing stakeholder communication and meetings.
- B. By automatically generating detailed requirements documents.
- **C. By providing templates and code snippets that help in documenting requirements.**
- D. By identifying and fixing potential requirement conflicts when using /help.

Answer: C

Explanation:

GitHub Copilot can assist during the requirements analysis phase by providing templates and code snippets that aid in documenting requirements. This helps streamline the process of capturing and organizing project requirements.

NEW QUESTION # 117

.....

All the TestKingFree Microsoft GH-300 practice questions are real and based on actual GitHub Copilot (GH-300) exam topics. The web-based GitHub Copilot (GH-300) practice test is compatible with all operating systems like Mac, IOS, Android, and Windows.
