問題 #62

The primary audience for RP 580 is

- A. Only materials engineering personnel
- **B. Only inspection personnel**
- C. Maintenance personnel
- D. Inspection and materials engineering personnel

答案： B

問題 #63

In the determination of risk, what values are often used when COF and/or POF data are not available?

- A. Estimates of total risk by subject matter experts
- B. Sensitivity analyses
- C. Similar losses reported by insurance companies or jurisdictions
- **D. Assumptions or estimates of input**

答案： D

解題說明：

Section 11.5 of API 580 clearly states:

"Assumptions or estimates of input values are often used when consequence and/or POF data are not available." This allows an RBI team to proceed with analysis in the absence of complete data while noting that all assumptions must be documented and agreed upon to avoid misrepresentation.
