NIS-2-Directive-Lead-Implementer Latest Test Materials, NIS-2-Directive-Lead-Implementer Reliable Exam Labs

Do you feel that you are always nervous in your actual NIS-2-Directive-Lead-Implementer exam and difficult to adapt yourself to the real exam? If you answer is yes, I think you can try to use the software version of our NIS-2-Directive-Lead-Implementer exam quiz. I believe the software version of our NIS-2-Directive-Lead-Implementer trianing guide will be best choice for you, because the software version can simulate real test environment, you can feel the atmosphere of the NIS-2-Directive-Lead-Implementer exam in advance by the software version.

PECB NIS-2-Directive-Lead-Implementer Exam Syllabus Topics:

Topic	Details
Topic 1	• Cybersecurity controls, incident management, and crisis management: This domain focuses on Security Operations Managers and Incident Response Coordinators and involves implementing cybersecurity controls, managing incident response activities, and handling crisis situations. It ensures organizations are prepared to prevent, detect, respond to, and recover from cybersecurity incidents effectively.
Topic 2	• Fundamental concepts and definitions of NIS 2 Directive: This section of the exam measures the skills of Cybersecurity Professionals and IT Managers and covers the basic concepts and definitions related to the NIS 2 Directive. Candidates gain understanding of the directive's scope, objectives, key terms, and foundational requirements essential to lead implementation efforts effectively within organizations.
Topic 3	• Testing and monitoring of a cybersecurity program: This domain assesses the abilities of Security Auditors and Compliance Officers in testing and monitoring the effectiveness of cybersecurity programs. Candidates learn to design and conduct audits, continuous monitoring, performance measurement, and apply continual improvement practices to maintain NIS 2 Directive compliance.

NIS-2-Directive-Lead-Implementer Guide Torrent: PECB Certified NIS 2 Directive Lead Implementer & NIS-2-Directive-Lead-Implementer Practice Test Questions

The optimization of NIS-2-Directive-Lead-Implementer training questions is very much in need of your opinion. If you find any problems during use, you can give us feedback. We will give you some benefits as a thank you. You will get a chance to update the system of NIS-2-Directive-Lead-Implementer Real Exam for free. Of course, we really hope that you can make some good suggestions after using our NIS-2-Directive-Lead-Implementer study materials. We hope to grow with you and help you get more success in your life.

PECB Certified NIS 2 Directive Lead Implementer Sample Questions (Q55-Q60):

NEW QUESTION # 55
Which of the following is responsible for handling incidents and managing sensitive data processing?

- A. CSIRTs
- B. Member States
- C. EU-CyCLONe

Answer: A

NEW QUESTION # 56
Scenario 2:
MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.
Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.
To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.
Based on the scenario above, answer the following question:
Is the role of the MHospital's CSIRT regarding vulnerability assessment in alignment with the requirements of Article 11 of the NIS 2 Directive?

- A. No, the CSIRT should not be involved in vulnerability management, as defined in Article 11
- B. Yes, the role of the CSIRT is consistent with vulnerability assessment requirements specified in Article 11
- C. No, according to Article 11, the CSIRT should not conduct scanning of the network and information systems of the entity as this should be done during the coordinated vulnerability disclosure

Answer: B

NEW QUESTION # 57
What does integration testing involve?

- A. Testing combination of modules as a group to analyze their interactions and functionality
- B. Both A and B, depending on the objectives of the organization
- C. Testing and analyzing the functionality of each individual module in isolation

Answer: A

NEW QUESTION # 58
Scenario 3: Founded in 2001, SafePost is a prominent postal and courier company headquartered in Brussels, Belguim. Over the years, it has become a key player in the logistics and courier in the region. With more than 500 employees, the company prides itself on its efficient and reliable services, catering to individual and corporate clients. SafePost has recognized the importance of cybersecurity in an increasingly digital world and has taken significant steps to align its operations with regulatory directives, such as the NIS 2 Directive.

SafePost recognized the importance of thoroughly analyzing market forces and opportunities to inform its cybersecurity strategy. Hence, it selected an approach that enabled the analysis of market forces and opportunities in the four following areas: political, economic, social, and technological. The results of the analysis helped SafePost in anticipating emerging threats and aligning its security measures with the evolving landscape of the postal and courier industry.

To comply with the NIS 2 Directive requirements, SafePost has implemented comprehensive cybersecurity measures and procedures, which have been documented and communicated in training sessions. However, these procedures are used only on individual initiatives and have still not been implemented throughout the company. Furthermore, SafePost's risk management team has developed and approved several cybersecurity risk management measures to help the company minimize potential risks, protect customer data, and ensure business continuity.

Additionally, SafePost has developed a cybersecurity policy that contains guidelines and procedures for safeguarding digital assets, protecting sensitive data, and defining the roles and responsibilities of employees in maintaining security. This policy will help the company by providing a structured framework for identifying and mitigating cybersecurity risks, ensuring compliance with regulations, and fostering a culture of security awareness among employees, ultimately enhancing overall cybersecurity posture and reducing the likelihood of cyber incidents.

As SafePost continues to navigate the dynamic market forces and opportunities, it remains committed to upholding the highest standards of cybersecurity to safeguard the interests of its customers and maintain its position as a trusted leader in the postal and courier industry.

Based on scenario 3, which of the following approaches was used by SafePost to analyze market forces and opportunities?

- A. PEST analysis
- B. Porter's Five Forces analysis
- C. SWOT analysis

Answer: A

NEW QUESTION # 59
Scenario 2:

MHospital, founded in 2005 in Metropolis, has become a healthcare industry leader with over 2,000 dedicated employees known for its commitment to qualitative medical services and patient care innovation. With the rise of cyberattacks targeting healthcare institutions, MHospital acknowledged the need for a comprehensive cyber strategy to mitigate risks effectively and ensure patient safety and data security. Hence, it decided to implement the NIS 2 Directive requirements. To avoid creating additional processes that do not fit the company's context and culture, MHospital decided to integrate the Directive's requirements into its existing processes. To initiate the implementation of the Directive, the company decided to conduct a gap analysis to assess the current state of the cybersecurity measures against the requirements outlined in the NIS 2 Directive and then identify opportunities for closing the gap.

Recognizing the indispensable role of a computer security incident response team (CSIRT) in maintaining a secure network environment, MHospital empowers its CSIRT to conduct thorough penetration testing on the company's networks. This rigorous testing helps identify vulnerabilities with a potentially significant impact and enables the implementation of robust security measures. The CSIRT monitors threats and vulnerabilities at the national level and assists MHospital regarding real-time monitoring of their network and information systems. MHospital also conducts cooperative evaluations of security risks within essential supply chains for critical ICT services and systems. Collaborating with interested parties, it engages in the assessment of security risks, contributing to a collective effort to enhance the resilience of the healthcare sector against cyber threats.

To ensure compliance with the NIS 2 Directive's reporting requirements, MHospital has streamlined its incident reporting process. In the event of a security incident, the company is committed to issuing an official notification within four days of identifying the incident to ensure that prompt actions are taken to mitigate the impact of incidents and maintain the integrity of patient data and healthcare operations. MHospital's dedication to implementing the NIS 2 Directive extends to cyber strategy and governance. The company has established robust cyber risk management and compliance protocols, aligning its cybersecurity initiatives with its overarching business objectives.

Based on scenario 2, are the cooperative evaluations of security risks carried out in alignment with Article 22 of the NIS 2 Directive?

- A. No, cooperative evaluations should be done by the Cooperation Group, Commission, and ENISA
- B. Yes, cooperative evaluations are carried out in accordance with Article 22
- C. No, cooperative evaluations should be done by direct suppliers and service providers

Answer: B
