Microsoft Identity and Access Administrator Sample Questions (Q159-Q164):

NEW QUESTION # 159

You have a Microsoft 365 subscription.

You need to ensure that when users access the Microsoft 365 portal from Microsoft Edge and have their browser language set to Spanish, they are presented with a Spanish sign-in form.

What should you do in the Microsoft Entra admin center?

- A. From Settings for the users, configure the Usage location setting.
- B. Create a Conditional Access policy.mdlet.
- C. From Global Secure Access, configure the Session management settings.
- D. Configure the Company branding settings.

Answer: D

Explanation:

Configure your company branding

Language customization

Customize the sign-in experience based on browser language when users authenticate into your corporate intranet or web-based applications.

Customize the sign-in experience by browser language

You can create a personalized sign-in experience for users who sign in using a specific browser language by customizing the branding elements for that browser language. This customization overrides any configurations made to the default branding. If you don't make any changes to the elements, the default elements are displayed.

1. Sign in to the Microsoft Entra admin center as an Organizational Branding Administrator.
2. Browse to Identity > User experiences > Company branding.
3. Select Add browser language.
