Our ASQ CMQ-OE Practice Test software is the answer if you want to score higher on your real ASQ CMQ-OE certification exam and achieve your academic goals.

CMQ/OE Exam Structure

The ASQ CMQ/OE test includes different multiple-choice questions that will assess their knowledge of the topics from the exam syllabus. The number of items, though, differs based on the way the exam is delivered. Therefore, if the candidates take a computer-delivered test, they will have to solve 180 questions. This type of exam is delivered in the English language only. Plus, out of the total number of questions, only 165 are scored. The remaining ones are unscored queries and they are used for statistical purposes. The total time allotted for the candidates will be 4 hours and 18 minutes. If the examinees want to take this test with paper and pencil, then they will have to solve 165 inquiries only. Still, the type of questions remains multiple-choice. As for the allotted time, the candidates will have only four hours to answer as many questions as possible. Notably, this type of validation is delivered in both English and Mandarin. Another important aspect to mention is that all exams are open books. This means that the examinees can bring and use any type of materials they want.

Prerequisites for CMQ-OE Certification Exam

The vendor has specific prerequisites that candidates are required to meet to be eligible for the CMQ-OE exam. Thus, candidates are required to show 10 years of full-time work experience in at least one area of the Certified Manager of Quality/Organizational Excellence Body of Knowledge. Out of these 10 years of experience, candidates must have 5 years of experience in a decision-making role. Note ASQ defines a decision-making role as a position where the individual has the power to define, implement, or manage projects and processes and be accountable for the results. An individual already accredited by this certification vendor as a quality auditor, software quality engineer, or quality engineer can use the same experience as a pre-requisite for the CMQ-OE test. To add more, a portion of the required 10-year experience will be waived off by ASQ if the individual has an educational background. So, a diploma from a technical school will be eligible for a 1-year waiver, an associate degree for a two-year waiver, a bachelor's degree for four years, and a master's or doctorate for five years.

ASQ Certified Manager of Quality/Organizational Excellence Exam Sample Questions (Q337-Q342):

NEW QUESTION # 337

Which of the following training topics is important for a company's staff members but not for senior management?

- A. The role of senior management in quality
- B. Company-wide quality policies
- C. Statistical process control
- D. Six sigma concepts

Answer: C

Explanation:

* Company-wide Quality Policies: Understanding quality policies is essential for both staff members and senior management. Quality policies guide an organization's commitment to quality, customer satisfaction, and continuous improvement. All employees, regardless of their level, should be aware of these policies.

* Statistical Process Control (SPC): SPC focuses on monitoring and controlling processes using statistical techniques. While staff members directly involved in production or process management benefit from SPC training, senior management may not need detailed knowledge of statistical methods. However, they should understand the importance of SPC and support its implementation.

* The Role of Senior Management in Quality: This topic is specifically relevant to senior management. It covers their responsibilities in quality leadership, strategic planning, resource allocation, and creating a quality culture. Staff members may not need in-depth knowledge of senior management's role.

* Six Sigma Concepts: Six Sigma is a comprehensive methodology for process improvement. While staff members can benefit from Six Sigma training, senior management often plays a more strategic role in deploying Six Sigma initiatives across the organization.

In summary, SPC is a training topic that staff members should understand, but it may not be as critical for senior management.
