- **E. Using the marketplace interface to upload the content**

Answer: C,D,E

NEW QUESTION # 149

What is the difference between labels and fields?

- A. Fields are indexed in the database and labels are not
- B. Labels are indexed in the database and fields are not
- C. Fields can be used in playbooks and labels cannot
- **D. Labels can be used in queries and fields cannot**

Answer: D

NEW QUESTION # 150

Which three scripting languages can an engineer use to write XSOAR automations? (Choose three.)

- **A. Powershell**
- **B. JavaScript**
- C. Go
- **D. Python**
- E. Perl

Answer: A,B,D

Explanation:

Reference: <https://docs.paloaltonetworks.com/cortex/cortex-xsoar/6-0/cortex-xsoar-admin/playbooks/automations.html>

NEW QUESTION # 151

When re-assigning an existing incident to a new incident type, an engineer is concerned about the preservation of critical data

currently stored in fields that are only associated to the original incident type.
Upon making the change, in which state will the critical data be in the now unassociated fields?.

- A. Hidden from the Context Data but accessible.
- B. Visible with Context Data, grayed out, and fully accessible.
- **C. Visible within Context Data and fully accessible.**
- D. Hidden from Context Data and no longer accessible.

Answer: C

Explanation:

XSOAR separates Context Data from Incident Layout fields. When an incident field is populated, its value is stored in Context, even if the incident type later changes. The Admin Guide clearly states that context is persistent and not dependent on whether a field belongs to the new incident type.

If an incident is reassigned to a different incident type, fields not included in the new type's layout are no longer visible in the UI, but the data is fully retained in Context. Analysts can still retrieve the values through playbooks, scripts, or JSON view. This ensures investigations are not disrupted and historical information is never lost due to schema changes.

The data is not deleted, nor is it hidden from context (ruling out options A and D). It also does not appear grayed out in the UI (C), because the fields no longer appear at all unless re-added to the layout.

Thus, per XSOAR's data retention model, the correct state is B: Visible within Context Data and fully accessible.

NEW QUESTION # 152

.....

You can hardly grow by relying on your own closed doors. So you have to study more and get a certification to prove your strength. And our XSOAR-Engineer preparation materials are very willing to accompany you through this difficult journey. You know, choosing a good product can save you a lot of time. For at least, you have to find the reliable exam questions such as our XSOAR-Engineer Practice Guide. And our XSOAR-Engineer preparation questions can help you not only learn the most related information on the subject, but also get the certification with 100% success guarantee.
