

# 最新版的NetSec-Pro指南，免費下載NetSec-Pro考試題庫得到妳想要的Palo Alto Networks證書

2026 Fast2test最新的NetSec-Pro PDF版考試題庫和NetSec-Pro考試問題和答案免費分享：[https://drive.google.com/open?id=1jDRPnmicAnVxJoFzC\\_CPQwHAFXNcinDD](https://drive.google.com/open?id=1jDRPnmicAnVxJoFzC_CPQwHAFXNcinDD)

我們Fast2test Palo Alto Networks的NetSec-Pro考試的試題及答案，為你提供了一切你所需要的考前準備資料，關於Palo Alto Networks的NetSec-Pro考試，你可以從不同的網站或書籍找到這些問題，但關鍵是邏輯性相連，我們的試題及答案不僅能第一次毫不費力的通過考試，同時也能節省你寶貴的時間。

## Palo Alto Networks NetSec-Pro 考試大綱：

主題	簡介
主題 1	<ul style="list-style-type: none"><li>Platform Solutions, Services, and Tools: This section measures the expertise of security engineers and platform administrators in Palo Alto Networks NGFW and Prisma SASE products. It involves creating security and NAT policies, configuring Cloud-Delivered Security Services (CDSS) such as security profiles, User-ID and App-ID, decryption, and monitoring. It also covers the application of CDSS for IoT security, Enterprise Data Loss Prevention, SaaS Security, SD-WAN, GlobalProtect, Advanced WildFire, Threat Prevention, URL Filtering, and DNS security. Furthermore, it includes aligning AIOps with best practices through administration, dashboards, and Best Practice Assessments.</li></ul>
主題 2	<ul style="list-style-type: none"><li>GFW and SASE Solution Maintenance and Configuration: This domain evaluates the skills of network security administrators in maintaining and configuring Palo Alto Networks hardware firewalls, VM-Series, CN-Series, and Cloud NGFWs. It includes managing security policies, profiles, updates, and upgrades. It also covers adding, configuring, and maintaining Prisma SD-WAN including initial setup, pathing, monitoring, and logging. Maintaining and configuring Prisma Access with security policies, profiles, updates, upgrades, and monitoring is also assessed.</li></ul>
主題 3	<ul style="list-style-type: none"><li>NGFW and SASE Solution Functionality: This part assesses the knowledge of firewall administrators and network architects on the functions of various Palo Alto Networks firewalls including Cloud NGFWs, PA-Series, CN-Series, and VM-Series. It covers perimeter and core security, zone security and segmentation, high availability, security and NAT policy implementation, as well as monitoring and logging. Additionally, it includes the functionality of Prisma SD-WAN with WAN optimization, path and NAT policies, zone-based firewall, and monitoring, plus Prisma Access features such as remote user and network configuration, application access, policy enforcement, and logging. It also evaluates options for managing Strata and SASE solutions through Panorama and Strata Cloud Manager.</li></ul>

主題 4	<ul style="list-style-type: none"> <li>• <b>Connectivity and Security:</b> This part measures the skills of network engineers and security analysts in maintaining and configuring network security across on-premises, cloud, and hybrid environments. It covers network segmentation, security and network policies, monitoring, logging, and certificate management. It also includes maintaining connectivity and security for remote users through remote access solutions, network segmentation, security policy tuning, monitoring, logging, and certificate usage to ensure secure and reliable remote connections.</li> </ul>
主題 5	<ul style="list-style-type: none"> <li>• <b>Infrastructure Management and CDSS:</b> This section tests the abilities of security operations specialists and infrastructure managers in maintaining and configuring Cloud-Delivered Security Services (CDSS) including security policies, profiles, and updates. It includes managing IoT security with device IDs and monitoring, as well as Enterprise Data Loss Prevention and SaaS Security focusing on data encryption, access control, and logging. It also covers maintenance and configuration of Strata Cloud Manager and Panorama for network security environments including supported products, device addition, reporting, and configuration management.</li> </ul>

## NetSec-Pro考試備考經驗，NetSec-Pro認證資料

Palo Alto Networks NetSec-Pro 認證考試已經成為了IT行業中很熱門的一個考試，但是為了通過考試需要花很多時間和精力掌握好相關專業知識。在這個時間很寶貴的時代，時間就是金錢。Fast2test為Palo Alto Networks NetSec-Pro 認證考試提供的培訓方案只需要20個小時左右的時間就能幫你鞏固好相關專業知識，讓你為第一次參加的Palo Alto Networks NetSec-Pro 認證考試做好充分的準備。

## 最新的 Network Security Administrator NetSec-Pro 免費考試真題 (Q26-Q31):

### 問題 #26

What occurs when a security profile group named "default" is created on an NGFW?

- **A. It is automatically applied to all new security rules.**
- B. It negates all existing security profiles rules on new policy.
- C. It allows traffic to bypass all security checks by default.
- D. It only applies to traffic that has been dropped due to the reset client action.

答案: A

解題說明:

A security profile group named "default" is automatically applied to all new security rules unless a specific profile group is explicitly configured.

If a security profile group named `default` exists, it will be automatically applied to any newly created security policy rules to ensure consistent protection.

This behavior ensures that newly created policies are always protected by default security profiles, minimizing human error.

### 問題 #27

Which two SSH Proxy decryption profile settings should be configured to enhance the company's security posture? (Choose two.)

- **A. Block sessions when certificate validation fails.**
- B. Allow sessions when decryption resources are unavailable.
- **C. Block connections that use non-compliant SSH versions.**
- D. Allow sessions with legacy SSH protocol versions.

答案: A,C

解題說明:

Blocking non-compliant SSH versions and failing certificate validations are fundamental security measures:

Block sessions when certificate validation fails

The SSH Proxy profile should block sessions that fail certificate validation to ensure that only trusted hosts are allowed.

Block connections using non-compliant SSH versions

Older SSH versions may have vulnerabilities or lack modern encryption algorithms.

To enforce stronger security, block SSH sessions that use older or deprecated versions of the SSH protocol that do not comply with your security posture.

#### 問題 #28

Which two components of a Security policy, when configured, allow third-party contractors access to internal applications outside business hours? (Choose two.)

- A. Schedule
- B. App-ID
- C. User-ID
- D. Service

答案: A,C

解題說明:

To allow third-party contractors controlled access, security policies must combine user identification and time-based access controls: User-ID

"User-ID enables security policies to be based on user identity rather than IP addresses, ensuring precise policy enforcement for specific users such as contractors." (Source: User-ID Overview) Schedule

"Schedules allow policies to be active only during specific times, providing time-based access control (e.g., after business hours)." (Source: Security Policy Schedules) Together, they ensure that only authorized users (contractors) have access, and only when explicitly allowed.

#### 問題 #29

What key capability distinguishes Content-ID technology from conventional network security approaches?

- A. It relies primarily on reputation-based filtering.
- B. It exclusively monitors network traffic volumes.
- C. It provides single-pass application layer inspection for real-time threat prevention.
- D. It performs packet header analysis short of deep packet inspection.

答案: C

解題說明:

Content-ID is the core of Palo Alto Networks' prevention architecture, providing single-pass application layer inspection to deliver real-time threat prevention across all traffic.

"Content-ID uses a single-pass architecture to perform application-layer (Layer 7) traffic inspection and real-time threat prevention. Unlike traditional firewalls that rely on multiple scans, Content-ID inspects traffic once to enforce multiple security controls simultaneously." (Source: Content-ID Overview) By consolidating security functions in a single pass, it ensures both efficiency and comprehensive security.

#### 問題 #30

Using Prisma Access, which solution provides the most security coverage of network protocols for the mobile workforce?

- A. Enterprise browser
- B. Client-based VPN
- C. Clientless VPN
- D. Explicit proxy

答案: B

解題說明:

Client-based VPN solutions like GlobalProtect provide full coverage for the mobile workforce by extending the enterprise security stack to remote endpoints. It establishes a secure tunnel, allowing consistent security policies across the enterprise perimeter and the
