ISO-IEC-27001-Foundation Real Torrent - Reliable ISO-IEC-27001-Foundation Exam Vce

Our ISO-IEC-27001-Foundation exam materials will help you pass the exam with the least time. You can pass your exam after learning 48 to 72 hours of our ISO-IEC-27001-Foundation exam dumps. Since we have a professional team to edit and verify the exam materials, therefore the ISO-IEC-27001-Foundation exam materials are high-quality and accurate. Besides ISO-IEC-27001-Foundation Exam Dumps contain most of knowledge points of the exam, and you will have a good command of them in the process of learning. We are pass guarantee and money back guarantee. If you fail to pass the exam, we will refund your money.

APMG-International ISO/IEC 27001 (2022) Foundation Exam Sample Questions (Q45-Q50):

NEW QUESTION # 45

Which benefit is NOT relevant by implementing an ISMS for an organization?

- A. Information security compliance will increase stakeholder trust in the organization
- B. Information security controls are tailored to suit the organization's specific circumstances
- C. Information security staff will be qualified to ISO/IEC 27001 Foundation level
- D. Information security risks are assessed and the probability and/or impact reduced

Answer: C

Explanation:

The benefits of implementing an ISMS under ISO/IEC 27001 are well established. Clause 0.1 (General) explains that an ISMS provides a systematic approach to managing sensitive information and "preserves confidentiality, integrity, and availability of information by applying a risk management process and gives confidence to interested parties that risks are adequately managed."

Option A is correct as a benefit, since trust and confidence from stakeholders is an outcome of compliance.

Option C is also a benefit, since controls are chosen and tailored based on organizational context and risk assessment (Clause 6.1.3). Option D reflects another real benefit—reducing the probability and/or impact of incidents through effective risk management. However, staff qualifications (option B) are not guaranteed benefits of implementing an ISMS. While training and competence (Clause 7.2) are required, the standard does not require or provide ISO/IEC 27001 Foundation-level certification for staff. That is an external training/certification scheme, not an ISMS outcome.

Therefore, the benefit NOT relevant to implementing ISO/IEC 27001 is B.

NEW QUESTION # 46

Which output is a required result from risk analysis?

- A. Prioritized risks for treatment
- B. Determined levels of risk
- C. Risk treatment control options
- D. Risk acceptance criteria

Answer: B

Explanation:

Clause 6.1.2 (d) states that during risk analysis, the organization shall:

* "assess the potential consequences that would result if the risks identified... were to materialize;"

* "assess the realistic likelihood of the occurrence of the risks identified;"

* "determine the levels of risk."

This makes it clear that the required output of risk analysis is the determined levels of risk. Risk acceptance criteria (A) are set earlier in 6.1.2(a), treatment control options (C) belong to 6.1.3, and prioritization (D) is part of risk evaluation (6.1.2 e). Therefore, the

verified correct output isB: Determined levels of risk.

NEW QUESTION # 47

What is the definition of the term 'integrity' according to ISO/IEC 27000?

- A. The property of accuracy and completeness
- B. The property of availability and confidentiality
- C. The property that information is NOT made available inappropriately
- D. The property of being accessible and usable

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27000 standards:

According to ISO/IEC 27000:2018, Clause 3.35:

"Integrity is the property of accuracy and completeness."

This is one of the three core principles of information security (CIA triad):

* Confidentiality: ensuring information is not made available to unauthorized persons (related to option B).

* Integrity: ensuring data is accurate, complete, and unaltered except by authorized means.

* Availability: ensuring information is accessible and usable when required (related to option A).

Option D incorrectly mixes availability and confidentiality. The precise ISO definition is accuracy and completeness, which matches option C.

Thus, the correct verified answer is C.

NEW QUESTION # 48

What international standard provides guidance on the integration of ISO/IEC 27001 and the IT Service Management standard?

- A. ISO/IEC 27002
- B. ISO/IEC 27013
- C. None of the above
- D. ISO/IEC 20000-1

Answer: B

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27013 standards:

ISO/IEC 27013 is titled:

"Information technology - Security techniques - Guidance on the integrated implementation of ISO/IEC 27001 and ISO/IEC 20000-1."

This standard provides organizations with specific advice on how to integrate an Information Security Management System (ISMS) with an IT Service Management System (ITSMS). ISO/IEC 20000-1 is the IT Service Management requirements standard, but integration guidance is provided in 27013. ISO/IEC 27002 (A) is guidance for controls, not integration. Option D is incorrect since ISO/IEC 27013 explicitly exists for this purpose.

Therefore, the correct verified answer is B: ISO/IEC 27013.

NEW QUESTION # 49

When are the information security policies required to be reviewed, according to the Policies for information security control?

- A. According to a schedule defined by the Certification Body
- B. Every six months
- C. At planned intervals and if significant changes occur
- D. Annually

Answer: C

Explanation:

Comprehensive and Detailed Explanation From Exact Extract ISO/IEC 27002:2022 standards:

Annex A.5.1 (Policies for information security) specifies:

"Information security policy and topic-specific policies should be defined, approved by management, published, communicated to and acknowledged by relevant personnel and relevant interested parties, and reviewed at planned intervals and if significant changes occur." This clearly identifies the review frequency requirement: planned intervals and whenever there are significant changes. Options A and B (six-monthly or annually) are not prescribed by ISO - timing is left to the organization. Option C is also wrong, since Certification Bodies do not dictate policy review schedules. Therefore, the verified correct answer is D.

NEW QUESTION # 50

.....

During the process of using our ISO-IEC-27001-Foundation study materials, you focus yourself on the exam bank within the given time, and we will refer to the real exam time to set your ISO-IEC-27001-Foundation practice time, which will make you feel the actual exam environment and build up confidence. Not only that you can get to know the real questions and answers of the ISO-IEC-27001-Foundation Exam, but also you can adjust yourself to the real pace of the ISO-IEC-27001-Foundation exam.
