## USGBC Latest LEED Green Associate Exam Dumps

P.S. Free 2026 USGBC LEED-Green-Associate dumps are available on Google Drive shared by PassLeader:  
<https://drive.google.com/open?id=1lh0CALHK55oU9CPjG7pvUT9ApYvh8s-P>

Do you want to pass your exam by using the least time? LEED-Green-Associate exam braindumps of us can do that for you. With skilled professionals to compile and verify, LEED-Green-Associate exam dumps of us is high quality and accuracy. You just need to spend 48 to 72 hours on practicing, and you can pass your exam. We are pass guaranteed and money back guaranteed. If you fail to pass the exam, we will give you full refund. Besides, we offer you free demo to have a try before buying LEED-Green-Associate Exam Dumps. We also have free update for one year after purchasing.

Considering that different customers have various needs, we provide three versions of LEED-Green-Associate test torrent available: PDF version, PC Test Engine and Online Test Engine versions. One of the most favorable demo of our LEED-Green-Associate exam questions on the web is also written in PDF version, in the form of Q&A, can be downloaded for free. This kind of LEED-Green-Associate Exam Prep is printable and has instant access to download, which means you can study at any place at any time for it is portable. And after you have a try on our free demo of LEED-Green-Associate training guide, then you will know our wonderful quality.

## Latest LEED-Green-Associate Dumps - LEED-Green-Associate Reliable Test Review

In the modern world, obtaining LEED-Green-Associate certification is essential. With the growing popularity of USGBC, the demand for professionals holding this LEED Green Associate Exam (LEED-Green-Associate) certification holders has increased significantly. Unfortunately, many candidates fail to pass the LEED-Green-Associate Exam due to outdated LEED Green Associate Exam (LEED-Green-Associate) exam study material. Such failure can lead to the loss of time, money, and confidence.

## USGBC LEED-Green-Associate Exam Syllabus Topics:

--

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>• Sustainable Sites: This section of the exam measures the skills of landscape architects and focuses on on-site assessment and design strategies that reduce environmental impact. It includes topics like habitat conservation, rainwater management, and exterior lighting.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>• Indoor Environmental Quality: This section of the exam measures the skills of indoor air quality specialists and covers strategies for improving indoor air quality, lighting, acoustics, and occupant comfort. It emphasizes the use of low-emitting materials and green cleaning practices.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• Materials and Resources: This section of the exam measures the skills of sustainable materials specialists and focuses on reuse, life-cycle impacts, waste management, and environmentally preferable purchasing practices. It highlights the importance of material selection in reducing environmental impacts.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Location and Transportation: This section of the exam measures the skills of urban planners and covers site selection criteria and alternative transportation strategies. It emphasizes choosing sites that minimize environmental impact and promote sustainable transportation options.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Energy and Atmosphere: This section of the exam measures the skills of energy efficiency engineers and covers building loads, energy efficiency measures, and alternative energy practices. It emphasizes commissioning, energy auditing, and the use of renewable energy sources.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>• LEED Process: This section of the exam measures the skills of sustainability consultants and covers the foundational aspects of LEED, including organization fundamentals, the structure of LEED rating systems, and the LEED certification process. It emphasizes understanding the goals and objectives of each credit category and how they contribute to sustainable building practices.</li> </ul>

## USGBC LEED Green Associate Exam Sample Questions (Q206-Q211):

### NEW QUESTION # 206

In which LEED rating category does Built Project fall into?

- A. LEED for Building Design and Construction
- B. LEED for Neighborhood Development
- C. LEED for Operations and Maintenance
- D. LEED for Interior Design and Construction

**Answer: B**

Explanation:

The "Built Project" falls under LEED for Neighborhood Development (LEED ND), which focuses on sustainable community development and infrastructure.

### NEW QUESTION # 207

Which of the following strategies help improve daylighting in an office building?

- A. Work with the project glazing contractor to specify low argon windows
- B. Locate private offices toward the building perimeter and organize cubicles toward the building core
- C. Provide individual occupant task lighting
- D. Locate private offices toward the building core and organize cubicles at the perimeter

**Answer: D**

Explanation:

Daylighting is a strategy that uses natural light to illuminate the interior spaces of a building, reducing the need for artificial lighting and improving the visual comfort and well-being of the occupants. One of the strategies that can help improve daylighting in an office building is to locate private offices toward the building core and organize cubicles at the perimeter, so that more people can benefit

from the access to windows and views. This can also increase the daylight penetration depth and reduce glare and contrast<sup>12</sup>.

#### NEW QUESTION # 208

Which of the following is an appropriate way to use non-potable water in a building?

- A. Incorporating air conditioner process water for washing clothes
- B. Using captured stormwater for showering
- **C. Flushing a toilet with wastewater from bathroom sinks**
- D. Using wastewater from a sink for dishwashing

**Answer: C**

Explanation:

Non-potable water is water that is not suitable for human consumption, but can be used for other purposes that do not require potable quality water. Non-potable water sources include rainwater, reclaimed/recycled water and greywater. Greywater is wastewater from sinks, showers, bathtubs, washing machines and dishwashers that can be reused for applications such as toilet flushing, irrigation and cooling tower make-up water<sup>12</sup>. Using non-potable water can reduce the demand for potable water and contribute to LEED water efficiency credits<sup>34</sup>.

#### NEW QUESTION # 209

LEED stands for

- A. Leadership in Environmental and Efficiency Design
- B. Leadership in Efficiency and Energy Design
- **C. Leadership in Energy and Environmental Design**
- D. Leadership in Eco and Energy Design

**Answer: C**

Explanation:

LEED is an acronym for Leadership in Energy and Environmental Design, which is the most widely used green building rating system in the world. LEED provides a framework for creating healthy, efficient, and cost-saving buildings that have positive environmental and social impacts. LEED certification is a globally recognized symbol of sustainability achievement and leadership<sup>12</sup>.

#### NEW QUESTION # 210

Which factor increases the heat island effect on a project site?

- A. Light-colored surfaces
- B. High solar reflectivity index
- **C. Paved surfaces**
- D. High albedo

**Answer: C**

Explanation:

Paved surfaces absorb and retain heat, increasing local temperatures and contributing to the heat island effect. LEED encourages mitigating this effect by using materials with high Solar Reflectance Index (SRI) or implementing strategies like green roofs and shaded areas.
