

FCP_FGT_AD-7.6 Valid Dumps Files | FCP_FGT_AD-7.6 Training Material

BTW, DOWNLOAD part of ActualTestsQuiz FCP_FGT_AD-7.6 dumps from Cloud Storage: <https://drive.google.com/open?id=1s82U1-wLnnR38h26zBVskRKmECqTSFJS>

As you can find that there are three versions of our FCP_FGT_AD-7.6 exam questions: the PDF, Software and APP online. Among them, the Software version has the function to stimulate the exam which can help the learners be adjusted to the atmosphere, pace and environment of the Real FCP_FGT_AD-7.6 Exam. So our Software version of our FCP_FGT_AD-7.6 learning guide can help you learn the study materials and prepare for the test better if you already know all the information about the real exam.

Fortinet FCP_FGT_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">Content inspection: This section of the exam measures the skills of network security engineers and covers the setup and management of content inspection features on FortiGate. Candidates must demonstrate an understanding of encrypted traffic inspection using digital certificates, identify and apply FortiGate inspection modes, and configure web filtering policies. The ability to implement application control for monitoring and regulating network application usage, configure antivirus profiles to detect and block malware, and set up Intrusion Prevention Systems (IPS) to shield the network from threats and vulnerabilities is also assessed.
Topic 2	<ul style="list-style-type: none">Routing: This section of the exam measures the skills of firewall administrators and covers the configuration of routing features on FortiGate devices. It includes defining and applying static routes for directing traffic within and outside the network, as well as setting up Software-Defined WAN (SD-WAN) to distribute and balance traffic loads across multiple WAN connections efficiently.
Topic 3	<ul style="list-style-type: none">Firewall policies and authentication: This section of the exam measures the skills of firewall administrators and covers the implementation and management of security policies. It involves configuring basic and advanced firewall rules, applying Source NAT (SNAT) and Destination NAT (DNAT) options, and enforcing various firewall authentication methods. The section also includes deploying and configuring Fortinet Single Sign-On (FSSO) to streamline user access across the network.

Topic 4	<ul style="list-style-type: none"> • Deployment and system configuration: This section of the exam measures the skills of network security engineers and covers essential tasks for setting up a FortiGate device in a production environment. Candidates are expected to perform the initial configuration, establish basic connectivity, and integrate the device within the Fortinet Security Fabric. They must also be able to configure a FortiGate Cluster Protocol (FGCP) high availability setup and troubleshoot resource and connectivity issues to ensure system readiness and network uptime.
Topic 5	<ul style="list-style-type: none"> • VPN: This section of the exam measures the skills of network security engineers and covers the configuration and deployment of Virtual Private Network (VPN) solutions. Candidates are required to implement SSL VPNs to grant secure remote access to internal resources and configure IPsec VPNs in either meshed or partially redundant topologies to ensure encrypted communication between distributed network locations.

FORTINET

FortiGuard Intrusion Prevention - Access Blocked

Web Page Blocked

You have tried to access a web page that is in violation of your Internet usage policy

Category Malicious Websites

URL <https://www.facebook.com/>

To have the rating of this web page re-evaluated [please click here](#)

A web filter profile configuration and firewall policy configuration are shown. You are trying to access www.facebook.com, but you are redirected to a FortiGuard web filtering block page. Based on the exhibits, what is the possible cause of the issue?

- A. For www.facebook.com, the URL filter action is incorrect.

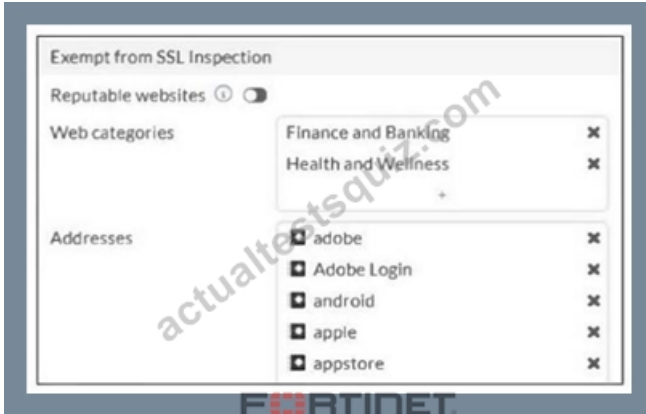

- B. The web rating override configuration is incorrect.
- C. The web filter profile feature set is configured incorrectly.
- D. The firewall policy inspection mode is incorrect.

Answer: B

NEW QUESTION # 126

Refer to the exhibit. The predefined deep-inspection and custom-deep-inspection profiles exclude some web categories from SSL inspection, as shown in the exhibit.

For which two reasons are these web categories exempted? (Choose two.)

- A. The legal regulation aims to prioritize user privacy and protect sensitive information for these websites.
- B. The resources utilization is optimized because these websites are in the trusted domain list on FortiGate.
- C. The FortiGate temporary certificate denies the browser's access to websites that use HTTP Strict Transport Security.
- D. These websites are in an allowlist of reputable domain names maintained by FortiGuard.

Answer: A,C

Explanation:

FortiGate's temporary SSL certificate may cause access denial to sites using HTTP Strict Transport Security (HSTS), so such sites are exempted from deep SSL inspection. Legal regulations require exemption of certain categories to protect user privacy and sensitive information, so these web categories are excluded from SSL inspection.

NEW QUESTION # 127

Refer to the exhibit.

FortiGate is configured for firewall authentication. When attempting to access an external website, the user is not presented with a login prompt.

What is the most likely reason for this situation?

- A. The Remote-users group is not added to the Destination.
- B. No matching user account exists for this user.
- C. The user is using an incorrect user name.
- D. The Service DNS is required in the firewall policy.

Answer: D

Explanation:

In FortiGate firewall authentication, users are prompted for login credentials only when their initial request matches a policy requiring authentication.

In this configuration, the firewall policy permits HTTP, HTTPS, and ICMP traffic, but DNS service is missing.

Since browsers first need DNS resolution before sending HTTP/HTTPS requests, the user cannot reach the FortiGate for authentication.

Adding DNS to the Service field (Option A) enables the user to resolve hostnames and trigger the firewall authentication prompt.

NEW QUESTION # 128

Refer to the exhibits. An administrator has observed the performance status outputs on an HA cluster for 55 seconds.

HA configuration

```
HQ-NGFW-1 # config system ha
HQ-NGFW-1 (ha) # show
config system ha
  set group-id 5
  set group-name "Training"
  set mode a-p
  set password ENC a4fbyqY4iPexFmAnZgzDY
  set hbdev "port7" 0
  set session-pickup enable
  set override disable
  set priority 200
  set monitor "port1"
  set memory-based-failover enable
  set memory-failover-threshold 70
  set memory-failover-monitor-period 50
  set memory-failover-sample-rate 10
  set memory-failover-flip-timeout 60
end
```

HQ-NGFW-1 System Performance output

```
HQ-NGFW-1 # get system performance status
CPU states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU0 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
CPU1 states: 0% user 0% system 0% nice 100% idle 0% iowait 0% irq 0% softirq
Memory: 2042076k total, 1837868k used (90%), 104146k free (5.1%), 100062k freeable (4.9%)
Average network usage: 19/2 kbps in 1 minute, 19/4 kbps in 10 minutes, 19/3 kbps in 30 minutes
Maximal network usage: 36/18 kbps in 1 minute, 58/86 kbps in 10 minutes, 58/87 kbps in 30 minutes
Average sessions: 21 sessions in 1 minute, 22 sessions in 10 minutes, 21 sessions in 30 minutes

Maximal session setup rate: 0 sessions per second in last 1 minute, 1 sessions per second in last 10 minutes
Average NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Maximal NPU sessions: 0 sessions in last 1 minute, 0 sessions in last 10 minutes, 0 sessions in last 30 minutes
Virus caught: 0 total in 1 minute
IPS attacks blocked: 0 total in 1 minute
Uptime: 10 days, 10 hours, 50 minutes
```

Which FortiGate is the primary?

- A. HQ-NGFW-2 with the parameter memory-failover-threshold setting
- **B. HQ-NGFW-1 with the parameter override setting**
- C. HQ-NGFW-1 with the parameter memory-failover-flip-timeout setting
- D. HQ-NGFW-2 with the parameter priority setting

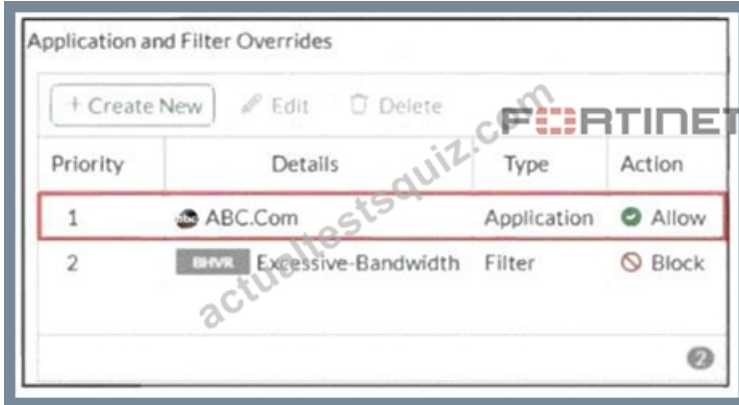

Answer: B

Explanation:

The HA configuration shows that override is disabled (set override disable), but despite this, HQ- NGFW-1 has the higher priority (200) and is acting as the primary, as indicated by its higher resource usage and uptime. Override allows the device with higher priority to take over as primary, so HQ- NGFW-1 is the primary device.

NEW QUESTION # 129

Refer to the exhibit.

An administrator has configured an Application Overrides for the ABC.Com application signature and set the Action to Allow. This application control profile is then applied to a firewall policy that is scanning all outbound traffic. Logging is enabled in the firewall policy. To test the configuration, the administrator accessed the ABC.Com web site several times.

Why are there no logs generated under security logs for ABC.Com?

- A. The ABC.Com is configured under application profile, which must be configured as a web filter profile.
- B. The ABC.Com is hitting the category Excessive-Bandwidth.
- C. The ABC.Com Action is set to Allow.
- D. The ABC.Com Type is set as Application instead of Filter.

Answer: C

Explanation:

When the action is set to Allow in an application override, traffic matching this override is allowed without generating security logs because it bypasses deeper inspection and blocking.

NEW QUESTION # 130

.....

Our FCP_FGT_AD-7.6 exam materials are formally designed for the exam. With its help, you don't have to worry about the exam any more for it almost guarantees you get what you want. If you think i'm exaggerating, you might as well take a look at our FCP_FGT_AD-7.6 Actual Exam. With a high pass rate as 98% to 100%, you will be bound to pass the exam. And our FCP_FGT_AD-7.6 training questions are popular in the market. We believe you will make the right choice.
