- B. Activation error because the field types of the union do not match
- C. Activation successful
- D. Activation error because the key fields of the union do not match

**Answer: A**

Explanation:

Comprehensive and Detailed Explanation from Exact Extract:

\* In CDS UNION, field names and positions must match exactly across all SELECT statements.

\* In this case, the first SELECT uses id, while the second uses agencynum AS id, which is fine.

However, the literal 'Customer' AS partner and 'Agency' AS partner create inconsistencies.

\* SAP CDS guidelines specify that for a UNION, field names must be identical and aligned in order; mismatches cause an activation error.
