

2026 SAP C-TS470-2412–The Best Detailed Study Dumps

P.S. Free & New C-TS470-2412 dumps are available on Google Drive shared by Real4exams: <https://drive.google.com/open?id=1M1MS07ggfBB0CvYxEXoDUSJKxckvOPY8>

The C-TS470-2412 quiz torrent we provide is compiled by experts with profound experiences according to the latest development in the theory and the practice so they are of great value. Please firstly try out our product before you decide to buy our product. It is worthy for you to buy our C-TS470-2412 exam preparation not only because it can help you pass the exam successfully but also because it saves your time and energy. If you buy our C-TS470-2412 Test Prep you will pass the exam easily and successfully, and you will realize you dream to find an ideal job and earn a high income.

SAP C-TS470-2412 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Organizational Data: This section of the exam measures the skills of Enterprise Data Managers and covers the structuring and management of organizational data within SAP systems. It focuses on defining key organizational elements, configuring data hierarchies, and ensuring proper integration across business units. Mastery of this domain is essential for maintaining accurate reporting structures, workflow efficiency, and compliance with enterprise-wide data governance policies.
Topic 2	<ul style="list-style-type: none">• Service Order Management: This section of the exam measures the skills of SAP Service Operations Consultants and covers the end-to-end management of service orders within SAP. It includes the creation, processing, tracking, and fulfillment of service requests, ensuring seamless coordination between departments. Proper service order management enables organizations to enhance customer satisfaction, streamline operations, and improve response times through integrated workflows.
Topic 3	<ul style="list-style-type: none">• Service Master Data: This section of the exam measures the skills of SAP Master Data Specialists and covers the management and configuration of service-related master data within SAP environments. It includes defining service objects, managing attributes, and ensuring accurate data flow across modules. Effective service master data management helps improve service delivery, optimize resource utilization, and maintain consistency across business processes.
Topic 4	<ul style="list-style-type: none">• Managing Clean Core: This section of the exam measures the skills of SAP Solution Architects and covers the principles of maintaining a clean core within SAP systems. It focuses on strategies for minimizing customizations, leveraging standard SAP functionalities, and ensuring system integrity while allowing for necessary extensions. The goal is to enhance system performance, ease upgrades, and maintain long-term sustainability.

Real4exams Is the Most Reliable Platform for SAP C-TS470-2412 Exam

Preparation

The C-TS470-2412 practice test is supported by all major browsers such as Chrome, IE, Firefox, Safari, and Opera. This SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service (C-TS470-2412) practice test consists of real SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service (C-TS470-2412) exam questions and thousands of customers have successfully cleared the C-TS470-2412 Exam with confidence. The SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service (C-TS470-2412) practice exam is customizable and allows you to track your progress. This feature enables you to identify and correct mistakes before attempting the final SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service (C-TS470-2412) exam.

SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service Sample Questions (Q64-Q69):

NEW QUESTION # 64

What are features of the app Service Actuals? Note: There are 3 correct answers to this question.

- A. Dynamic adjustment of dimensions
- B. Creation of SAP Analytics Cloud stories
- C. Creation of variants
- D. Upload of Microsoft Excel file
- E. Navigation to related SAP Fiori apps

Answer: A,C,E

Explanation:

The Service Actuals app in SAP S/4HANA Cloud Private Edition, Service is a Fiori app for analyzing service-related financial data (e.g., costs, revenues). The correct answers are creation of variants (A), dynamic adjustment of dimensions (B), and navigation to related SAP Fiori apps (E). Let's break this down.

App Purpose:

Service Actuals provides insights into actual costs and revenues from service orders, contracts, and confirmations, supporting profitability analysis.

* Creation of variants (A): Users can save custom filter settings (e.g., specific plants, periods) as variants for reuse. In the app, you select filters (e.g., Plant 1000, 2025-Q1), save as "Variant1," and recall it later, streamlining reporting.

* Dynamic adjustment of dimensions (B): The app allows real-time changes to analysis dimensions (e.g., by cost center, order type). You can drag and drop fields (e.g., switch from "Order" to "Customer") to pivot data dynamically, enhancing flexibility.

* Navigation to related SAP Fiori apps (E): From Service Actuals, you can navigate to apps like

"Manage Service Orders" or "Event-Based Revenue Recognition" via links or context menus, improving workflow efficiency.

Why Not the Others?

* Upload of Microsoft Excel file (C): This app is for viewing data, not uploading; Excel uploads are for data entry apps.

* Creation of SAP Analytics Cloud stories (D): SAC stories are built in SAP Analytics Cloud, not this app, though data might feed into SAC.

Example Use Case:

A manager creates a variant for 2025 service costs, adjusts dimensions to view by customer, and navigates to a service order for details.

"The Service Actuals app features variant creation, dynamic dimension adjustment, and navigation to related Fiori apps."

NEW QUESTION # 65

When extending a functional location hierarchy, how is a new functional location initially assigned to it?

- A. Automatically based on the functional location category
- B. Manually by using the list editing transaction
- C. Automatically based on the structure indicator
- D. Manually by using the install function

Answer: C

Explanation:

In SAP S/4HANA Cloud Private Edition, Service, a functional location hierarchy organizes technical objects in a structured manner.

When adding a new functional location, it is automatically assigned based on the structure indicator (Option B). The structure indicator defines the naming convention and hierarchy levels (e.g., A-B-C for a three-level structure). When a new functional location is created, the system uses this indicator to place it in the hierarchy automatically, based on its ID (e.g., A-B becomes a child of A).

* A: The category defines properties, not the hierarchy position.

* C: List editing is for mass changes, not initial assignment.

* D: The install function is for equipment, not functional locations.

"A new functional location is automatically assigned to the hierarchy based on the structure indicator, which governs the hierarchical naming and positioning."

NEW QUESTION # 66

In the advanced execution scenario, what is the dynamic item processor profile used for? Note: There are 3 correct answers to this question.

- A. To determine the service confirmation items
- B. To combine billing documents into one customer invoice
- C. To enable resource-related billing
- D. To summarize dynamic items into a single debit memo item
- E. To bill a service as a list of subitems

Answer: C,D,E

Explanation:

In the Service with Advanced Execution scenario (scope item 63Q), the dynamic item processor (DIP) profile is used for resource-related billing:

* To summarize dynamic items into a single debit memo item: The DIP profile can aggregate confirmed resources (e.g., time, materials) into a single billing item.

* To bill a service as a list of subitems: Alternatively, it can itemize resources as separate subitems for detailed billing.

* To enable resource-related billing: The DIP profile processes dynamic data from confirmations (e.g., time, parts) to generate billing documents.

* To determine the service confirmation items: This is part of confirmation, not the DIP profile's role.

* To combine billing documents into one customer invoice: This is a billing process step, not a DIP function. The DIP profile is configured in Customizing under Sales and Distribution # Billing. "The dynamic item processor profile supports summarizing items, listing subitems, and enabling resource-related billing in advanced execution." (SAP Help Portal, Resource-Related Billing).

NEW QUESTION # 67

What are characteristics of an in-house repair process? Note: There are 3 correct answers to this question.

- A. An in-house repair process requires the Service with Advanced Execution scenario.
- B. Credit checks can be executed in repair orders and repair quotations.
- C. Advanced Returns Management (ARM) can be used for customer returns.
- D. For each repair object, a service contract item must be assigned.
- E. Items can be added to repair orders using service order templates.

Answer: B,C,E

Explanation:

The in-house repair process (scope item 3XK) has specific characteristics:

* Advanced Returns Management (ARM) can be used for customer returns: ARM integrates with in-house repair to manage return authorizations and goods receipt.

* Items can be added to repair orders using service order templates: Templates streamline adding standard repair items to orders.

* Credit checks can be executed in repair orders and repair quotations: Credit management is supported to ensure customer creditworthiness.

* For each repair object, a service contract item must be assigned: Contracts are optional, not mandatory for repair objects.

* An in-house repair process requires the Service with Advanced Execution scenario: Advanced execution is an enhancement, not a requirement for basic in-house repair. These align with SAP's in-house repair design. "In-house repair supports ARM for returns, templates for order items, and credit checks." (SAP Signavio Process Navigator, In-House Repair).

NEW QUESTION # 68

What can you use to speed up the creation of new service contracts by reusing existing information?

- A. Service contract templates
- B. Product bundles
- C. Service order templates
- D. Service contract quotations

Answer: A

Explanation:

Creating service contracts in SAP S/4HANA Cloud Private Edition, Service can be time-consuming if done from scratch. To streamline this process, SAP provides tools to reuse existing data. The correct answer is service contract templates (Option D). A service contract template is a predefined structure that includes standard data such as items, pricing conditions, billing plans, and service objects. When creating a new service contract, you can select a template and adapt it to the specific customer or scenario, significantly reducing manual entry and ensuring consistency.

* Service contract quotations (A): These are preliminary documents used to propose a contract to a customer, but they are not designed for reuse as templates for contract creation.

* Service order templates (B): These are used to standardize service orders, not service contracts, and thus do not apply here.

* Product bundles (C): These group products or services together but are not templates for creating contracts; they are more relevant to sales or service items.

"Service contract templates enable the rapid creation of new contracts by providing reusable structures with predefined data, such as items and conditions, which can be adjusted as needed."

NEW QUESTION # 69

.....

A generally accepted view on society is only the professionals engaged in professional work, and so on, only professional in accordance with professional standards of study materials, as our SAP Certified Associate - SAP S/4HANA Cloud Private Edition Service study questions, to bring more professional quality service for the user. Our study materials can give the user confidence and strongly rely on feeling, lets the user in the reference appendix not alone on the road, because we are to accompany the examinee on C-TS470-2412 Exam, candidates need to not only learning content of teaching, but also share his arduous difficult helper, so believe us, we are so professional company.
