If you are sure that you want to be better, then you must start taking some measures. Selecting Chrome-Enterprise-Administrator practice prep may be your key step. If you are determined to pass the exam, our Chrome-Enterprise-Administrator study materials can provide you with everything you need. You can have the Chrome-Enterprise-Administrator Learning Materials, study plans and necessary supervision you need. You will have no reason to stop halfway until you get success.

Google Chrome-Enterprise-Administrator Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Analyze Chrome Data: This section of the exam measures skills of a Chrome Data Analyst and focuses on using the Google Admin console to view, analyze, and troubleshoot browser data. It includes reviewing reports, diagnosing browser or update issues, investigating performance problems, and identifying security risks based on log events and Chrome activity.

Topic 2	<ul style="list-style-type: none"> • Manage Chrome Enterprise in the Cloud: This section of the exam measures skills of a Cloud Systems Administrator and focuses on preparing and configuring environments for Chrome cloud management. Candidates must demonstrate how to verify domains, use admin roles, configure organizational structures, deploy enrollment tokens, enable reporting, and maintain Chrome using the Google Admin console.
Topic 3	<ul style="list-style-type: none"> • Chrome Updates: This section of the exam measures skills of a Chrome IT Policy Analyst and addresses the various update methods available for Chrome. It includes selecting the right update strategy for different business and security needs, managing compliance across platforms, and adapting update methods based on environmental changes or risks.
Topic 4	<ul style="list-style-type: none"> • Chrome Enterprise Management Fundamentals: This section of the exam measures skills of a Chrome Device Administrator and covers the foundational elements of managing Chrome in an enterprise. It includes understanding how policies are applied and resolved, differentiating managed browsers from profiles, and describing how policies work. It also covers Chrome's built-in security features, how extensions are used and deployed, and how the release cycle and channels are managed.
Topic 5	<ul style="list-style-type: none"> • Chrome Extensions: This section of the exam measures skills of an Endpoint Security Manager and involves managing Chrome extension policies. It includes designing extension management strategies, handling extension exemptions, creating approval workflows, and assessing extensions for their risk and compliance with business continuity requirements.

Although there are other online Google Chrome-Enterprise-Administrator exam training resources on the market, but the PassSureExam's Google Chrome-Enterprise-Administrator exam training materials are the best. Because we will be updated regularly, and it's sure that we can always provide accurate Google Chrome-Enterprise-Administrator Exam Training materials to you. In addition, PassSureExam's Google Chrome-Enterprise-Administrator exam training materials provide a year of free updates, so that you will always get the latest Google Chrome-Enterprise-Administrator exam training materials.

Google Professional Chrome Enterprise Administrator Certification Exam Sample Questions (Q23-Q28):

NEW QUESTION # 23

The security team has a request to approve two extensions with similar functionality. They only want to approve one extension for use in the environment to avoid redundancy. What is an objective measurement that the security team can use to help determine which extension may be safer to use?

- A. Chrome Web Store Ratings
- **B. 3rd Party Risk Score**
- C. Permission Count
- D. Chrome Manifest Version

Answer: B

Explanation:

A "3rd Party Risk Score" provides an objective assessment of the extension's security and privacy risks, often based on automated analysis of its code, requested permissions, developer reputation, and other factors. This is a more data-driven approach to evaluating safety compared to simply counting permissions (which doesn't account for the sensitivity of each permission), the Manifest version (which indicates features but not necessarily safety), or Chrome Web Store ratings (which are subjective and can be manipulated).

NEW QUESTION # 24

Which option is a security event that Google Chrome captures?

- A. User inactivity
- B. Password complexity
- C. Unauthorized file downloads
- **D. Malware detection**

Answer: D

Explanation:

Chrome's Safe Browsing feature actively scans web pages, downloads, and extensions for known malware.

When malware is detected, it is reported as a security event. While unauthorized file downloads could be a consequence of a security issue, Chrome's direct detection focuses on the malware itself. Password complexity is a setting for password management, and user inactivity is a system or application-level event, not a direct security event captured by Chrome in the same way as malware detection.

NEW QUESTION # 25

A company deploys policies in a hybrid manner from both on premises and the Google Admin console How would policies set in chrome://policy?

- A. Level: Recommended, Source: Cloud
- B. Level: Mandatory, Source: Platform
- **C. Level: Mandatory, Source: Cloud**
- D. Applies To: Machine, Source: Cloud

Answer: C

Explanation:

When viewing applied Chrome policies in the `chrome://policy` internal page, policies enforced through Chrome Enterprise Core (the cloud management console) will typically be labeled with a "Source" of

"Cloud." If the administrator has enforced the policy, the "Level" will likely be "Mandatory," indicating that users cannot change this setting. "Platform" would refer to policies set locally on the operating system (like Group Policy on Windows). "Recommended" policies are suggestions that users can typically override.

NEW QUESTION # 26

An IT administrator manages a large organization that uses Chrome browser across multiple platforms including Windows, macOS, and Linux The organization has diverse user needs and varying levels of risk associated with different departments, for which the administrator must determine the most efficient method to manage Chrome updates across the organization Why is it advantageous to manage Chrome update policies using the Google Admin console instead of the Group Policy Management Console (GPMC)?

- A. The Google Admin console is only applicable to devices with ChromeOS, making it more secure
- **B. Group Policy does not support platforms other than Windows**
- C. The Google Admin console does not allow administrators to view the browser version of any given managed device as Group Policy does
- D. Group Policy does not support Chrome update policies

Answer: B

Explanation:

The key advantage of using the Google Admin console for managing Chrome updates in a multi-platform environment is its ability to apply policies consistently across Windows, macOS, and Linux devices. Group Policy (GPMC) is a Windows-specific tool and cannot natively manage Chrome updates on other operating systems. The Google Admin console provides a centralized and platform-agnostic approach to Chrome management.

NEW QUESTION # 27

Chrome Browser Cloud Management has been successfully implemented at a company for the past year.

Recently, the engineering team has received feedback from the security team that Chrome browsers are not meeting patching Service Level Agreements (SLAs). In the Insight report, the engineering team sees that 30% of their companies' browsers are

pending updates.

Which browser policy could the engineering team implement to ensure better compliance with the security team's patching requirement?

- A. Relaunch notification
- **B. Auto-update check period**
- C. Chrome browser updates
- D. Google updater policy precedence

Answer: B

Explanation:

To ensure timely patching, the engineering team should adjust the "Auto-update check period" policy. By shortening this period, Chrome browsers will check for updates more frequently, increasing the likelihood of applying security patches sooner and improving compliance with patching SLAs. "Chrome browser updates" is a general category, "Relaunch notification" affects when users are prompted to restart, and "Google updater policy precedence" deals with the order of policy application, not the frequency of checks.

NEW QUESTION # 28

.....

People always want to prove that they are competent and skillful in some certain area. The ways to prove their competences are varied but the most direct and convenient method is to attend the Chrome-Enterprise-Administrator certification exam and get some certificate.
