By selecting our 300-815 study materials, you do not need to purchase any other products. Our passing rate may be the most attractive factor for you. Our 300-815 learning guide have a 99% pass rate. This shows what? As long as you use our products, you can pass the exam! Do you want to be one of 99? Quickly purchase our 300-815 Exam Questions! And you will find that the coming exam is just a piece of cake in front of you.

Overview of the Exam Outline

The content of 300-815 exam contains six domains, and questions taken from them will pop up during the test. However, they won't appear evenly, and some sections take up a larger portion of the syllabus than others. Take a look at them below:

- **CME/SRST Gateway Technologies**

About 10% of the questions come from this domain. It assesses one's knowledge of how to configure CU-CME for SIP telephone registration and dial plans. Also, you should have a solid understanding of how to enforce toll fraud prevention and configure the advanced CU-CME features and SIP SRST gateway.

- **Cisco Unified CM Call Control Features**

This module takes about 20% of the syllabus. The subdomains include troubleshooting of the Call Admission Control and configuring ILS, URI synchronization, GDPR, hunt groups, call queuing, time of day routing, and supplementary roles.

- **Cisco Unified Border Element**

This section takes about 15% of the content. It covers the basic skills in handling the procedures involved setting up as well as troubleshooting the CU-BE dial plan components, including DTMF, voice translation rules and profiles, codec preference list, plus signaling and media bindings.

- **Mobility**

About 10% of the exam questions come from this topic. To tackle these items, you must understand the concepts of setting

up CU-CM mobility, including unified mobility, extension mobility, and device mobility, and troubleshooting them.

- **Call Control and Dial Planning**

This domain has weight of about 25%. You are to have a general idea of troubleshooting and setting up the globalized call routing elements in CU-CM, such as the patterns for route, translation, transformation, and others.

The Cisco 300-815 Exam consists of 60-70 multiple-choice questions and is timed for 90 minutes. Candidates who take the exam must have a solid understanding of advanced call control and mobility services, as well as experience working with Cisco Unified Communications Manager and related technologies. They must also be familiar with the latest industry standards and best practices for implementing advanced call control and mobility services.

The Cisco 300-815 exam covers a wide range of topics, including the implementation of Cisco Unified Communications Manager (CUCM), Cisco Unified Communications Manager IM and Presence (IM&P), Cisco Expressway, and Cisco Unity Connection. Candidates will also be tested on their ability to configure advanced call routing, mobility features, and Cisco TelePresence solutions. In addition, the exam covers topics related to security, troubleshooting, and integration with other Cisco and third-party applications. Upon passing the exam, individuals will be recognized as having the knowledge and skills necessary to design, implement, and troubleshoot advanced call control and mobility services using Cisco technologies.

Reliable 300-815 Exam Online | 300-815 Examinations Actual Questions

The Cisco 300-815 PDF format is printable which enables you to do paper study. It contains pool of actual and updated Implementing Cisco Advanced Call Control and Mobility Services (300-815) exam questions. You can carry this portable file of Cisco 300-815 Real Questions to any place via smartphones, laptops, and tablets. This simple and convenient format of PracticeTorrent's Implementing Cisco Advanced Call Control and Mobility Services (300-815) practice material is being updated regularly.

Cisco Implementing Cisco Advanced Call Control and Mobility Services Sample Questions (Q224-Q229):

NEW QUESTION # 224

An administrator is configuring a new deployment using Cisco Unified CME. The SCCP phones register without any issues, but SIP phones are not registering. Assume that all other configuration is valid. Which code allows SIP phones to register to Cisco UCME?

- A. voice service voip
allow-connections sip to h323
- B. voice service voip
sip
bind media source-interface Vlan100
- C. voice service voip
sip
registrar server expires max 600 min 60
- **D. voice service voip
sip
bind control source-interface Vlan100**

Answer: D

NEW QUESTION # 225

Which two configuration parameters are prerequisites to set Native Call Queuing on Cisco Unified Communications Manager? (Choose two.)

- A. The phone button template must have the Queue Status Softkey configured.
- B. The maximum number of callers allowed in queue must be 10.
- **C. Cisco IP Voice Media Streaming Service must be activated on at least one node in the cluster.**
- D. A unicast music on hold audio source must be configured.
- **E. Cisco RIS data collector service must be running on the same server as the Cisco CallManager service.**

Answer: C,E

NEW QUESTION # 226

An administrator is configuring a cluster for ILS and wants to limit the amount of entities that Cisco Unified Communications Manager can write to the database for data that is learned through ILS. Which service parameter is used to adjust this limit?

- **A. ILS Max Number of Learned Objects in Database**
- B. Global Data Service Parameter Limit
- C. Imported Dial Plan Replication Database Object Lower Limit
- D. ILS Active Learned Object Upper Limit

Answer: A
