

# 100% Pass Quiz VMware - 2V0-13.25 - Newest VMware Cloud Foundation 9.0 Architect Test Online

P.S. Free 2026 VMware 2V0-13.25 dumps are available on Google Drive shared by PassCollection:  
<https://drive.google.com/open?id=1uH9v6ufgX1EzvLYf9J0uJVYWL6XRfcRm>

What is more difficult is not only passing the VMware 2V0-13.25 Certification Exam, but the acute anxiety and the excessive burden also make the candidate nervous to qualify for the VMware Cloud Foundation 9.0 Architect certification. If you are going through the same tough challenge, do not worry because VMware is here to assist you.

Do you want to pass the VMware 2V0-13.25 exam better and faster? Then please select the PassCollection. It can help you achieve your dreams. PassCollection is a website that provide accurate exam materials for people who want to participate in the IT certification. PassCollection can help a lot of IT professionals to enhance their career blueprint. Our strength will make you incredible. You can try a part of the questions and answers about VMware 2V0-13.25 Exam to test our reliability.

## 2V0-13.25 Latest Exam Vce & 2V0-13.25 Practice Exam Pdf

You must want to know your scores after finishing exercising our 2V0-13.25 study materials, which help you judge your revision. Now, our windows software and online test engine of the 2V0-13.25 study materials can meet your requirements. You can choose from two modules: virtual exam and practice exam. Then you are required to answer every question of the 2V0-13.25 Study Materials. In order to make sure you have answered all questions, we have answer list to help you check.

## VMware 2V0-13.25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>VMware Products and Solutions: This section of the exam evaluates the knowledge of VMware Solution Specialists and focuses on VMware Cloud Foundation (VCF). Candidates must be able to identify and differentiate between various VCF architecture options in given scenarios. The emphasis is on understanding the key products and how they integrate into enterprise design choices.</li> </ul>
Topic 2	<ul style="list-style-type: none"> <li>IT Architectures, Technologies, Standards: This section of the exam measures the skills of IT Architects and covers the ability to distinguish business requirements from technical ones. It expects candidates to understand the differences between conceptual, logical, and physical designs while also differentiating requirements, assumptions, constraints, and risks. Core concepts of availability, manageability, performance, recoverability, and security (AMPRS) are tested. Learners also need to document risk mitigation strategies, design decisions, and create a validation strategy that ties requirements to practical implementation.</li> </ul>

Topic 3	<ul style="list-style-type: none"> <li>• Install, Configure, Administrate the VMware Solution: This section of the exam is relevant to System Administrators. Although it has no directly testable objectives, it underlines the expectation that candidates are familiar with installation, configuration, and administration tasks that form the foundation for VMware Cloud Foundation solutions.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• Plan and Design the VMware Solution: This section measures the skills of Cloud Infrastructure Designers. It focuses on gathering and analyzing business requirements and then transforming them into conceptual, logical, and physical models of VMware Cloud Foundation. Candidates are expected to identify prerequisites and make design decisions across fleet topologies, networking, management domains, workload domains, automation, and operations. The section also includes designing for availability within and across zones, creating strategies for manageability such as lifecycle, scalability, and capacity, and ensuring performance and recoverability through BCDR strategies. Additional emphasis is given to designing secure environments, workload migration strategies, and creating consumption, automation, and monitoring strategies to support modern applications and governance.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the skills of Operations Engineers. There are no explicitly testable objectives provided in this domain, but candidates are expected to understand troubleshooting and optimization principles to maintain the VMware environment effectively in real-world deployments.</li> </ul>

## VMware Cloud Foundation 9.0 Architect Sample Questions (Q25-Q30):

### NEW QUESTION # 25

Which VMware solutions combined with Broadcom components enhance VM availability?

- A. vSAN
- B. 25GbE Ethernet Adapter
- C. vSphere HA
- D. Broadcom RAID Controller

**Answer: A,C**

Explanation:

vSphere HA and vSAN ensure VM availability in VMware environments.

### NEW QUESTION # 26

How can VMware's storage performance be enhanced with Broadcom storage solutions?

- A. Use Broadcom RAID controllers
- B. Use HDDs for cost-effective storage
- C. Use NVMe SSDs
- D. Implement vSAN

**Answer: A,C,D**

Explanation:

Using RAID controllers, vSAN, and NVMe SSDs are key to enhancing VMware storage performance.

### NEW QUESTION # 27

The following design decisions were made relating to storage design:

- \* A storage policy that would support failure of a single fault domain being the server rack
- \* Two vSAN OSA disk groups per host each consisting of four 4TB Samsung SSD capacity drives
- \* Two vSAN OSA disk groups per host each consisting of a single 300GB Intel NVMe cache drive
- \* Encryption at rest capable disk drives
- \* Dual 10Gb or faster storage network adapters

Which two design decisions would an architect include within the physical design? (Choose two.)

- A. Two vSAN OSA disk groups per host each consisting of a single 300GB Intel NVMe cache drive
- B. A storage policy that would support failure of a single fault domain being the server rack
- C. Encryption at rest capable disk drives
- **D. Dual 10Gb or faster storage network adapters**
- **E. Two vSAN OSA disk groups per host each consisting of four 4TB Samsung SSD capacity drives**

**Answer: D,E**

Explanation:

Physical design in VCF focuses on hardware specifications, not policies or logical configurations.

Option D, "Dual 10Gb or faster storage network adapters," and Option E, "Two vSAN OSA disk groups with four 4TB Samsung SSDs," specify physical components (NICs, drives) critical to vSAN performance and redundancy in the physical layer.

Option A (storage policy) is logical, defined in vSphere.

Option B (cache drives) and C (encryption capability) are also physical but less specific without vendor/model details compared to E, and encryption is often a feature, not a standalone decision. D and E are the clearest physical design elements per VCF 5.2 vSAN OSA requirements.

Reference: VMware Cloud Foundation 5.2 vSAN Design Guide, Physical Storage Design; VMware vSAN 7.0 Planning and Deployment Guide.

### NEW QUESTION # 28

Which VMware Cloud Foundation tools help optimize cloud cost management?

- **A. VMware vRealize Operations**
- B. VMware vSAN
- C. VMware vSphere
- **D. VMware vRealize Automation**

**Answer: A,D**

Explanation:

VMware vRealize Automation and vRealize Operations help optimize cloud cost management in VMware Cloud Foundation.

### NEW QUESTION # 29

As part of the VMware Cloud Foundation (VCF) logical design, the architect has determined that the VCF Private Cloud will encompass multiple VCF instances contained within a single VCF Fleet. The architect documented the following requirements when using VCF Operations:

\* Monitoring downtime must be minimized.

\* Alerting downtime must be minimized.

Which design decision supports these requirements?

- A. Deploy a single VCF Operations instance across a multi-VCF instance fleet.
- **B. Deploy VCF Operations using the High Availability model with Collector nodes at remote sites.**
- C. Deploy VCF Operations using the Simple model with Collector nodes at remote sites.
- D. Deploy two VCF Operations instances and configure the Aggregator Management Pack.

**Answer: B**

Explanation:

The High Availability (HA) deployment model of VCF Operations ensures that both monitoring and alerting services are resilient to node failure. Deploying Collector nodes at remote sites enables local data collection, reducing WAN dependency and ensuring data is not lost during network interruptions.

This configuration aligns perfectly with the need to minimize monitoring and alerting downtime, which is critical in distributed, multi-instance environments.

### NEW QUESTION # 30

.....

The PassCollection is committed to making the entire VMware 2V0-13.25 exam preparation process instant and successful. To achieve these objectives the PassCollection is offering real, valid, and updated VMware Cloud Foundation 9.0 Architect (2V0-13.25) exam practice test questions in three high in demand formats. These formats are VMware 2V0-13.25 PDF dumps files, desktop practice test software, and web-based practice test software.
