試験の準備方法-完璧な1z0-1042-24模擬モード試験-ユニークな1z0-1042-24独学書籍

さらに、It-Passports 1z0-1042-24ダンプの一部が現在無料で提供されています：https://drive.google.com/open?id=1xaqw1Fc72acJ8OZMS7dO2WB_p5-sjRD6

It-Passportsの1z0-1042-24問題集の超低い価格に反して、It-Passportsに提供される問題集は最高の品質を持っています。そして、もっと重要なのは、It-Passportsは質の高いサービスを提供します。望ましい問題集を支払うと、あなたはすぐにそれを得ることができます。It-Passportsのサイトはあなたが最も必要なもの、しかもあなたに最適な試験参考書を持っています。1z0-1042-24問題集を購入してから、また一年間の無料更新サービスを得ることもできます。一年以内に、あなたが持っている資料を更新したい限り、It-Passportsは最新バージョンの1z0-1042-24問題集を捧げます。It-Passportsはあなたに最大の利便性を与えるために全力を尽くしています。

Oracle 1z0-1042-24 認定試験の出題範囲：

トピック	出題範囲
トピック 1	• Getting Started with OIC Integrations: This section tests the ability of IT professionals and integration specialists to understand the fundamental components and concepts of Oracle Integration Cloud (OIC). Candidates are expected to describe the key features of OIC integration and explain core integration concepts.

トピック 2	• Creating Orchestrated Integrations: This part of the exam evaluates the candidate's skills in creating and managing orchestrated integrations using OIC. Candidates should be able to manage OIC lookups, use the OIC Data Mapper, and incorporate custom JavaScript libraries into their integrations.
トピック 3	• Creating Scheduled Integrations: In this section of the exam, candidates are evaluated based on their skills in managing scheduled integrations. This includes converting scheduled integrations to app-driven integrations and understanding the scheduling options within the OIC.
トピック 4	• Using OIC Connections & Adapters: Candidates must demonstrate their ability to create and configure OIC connections, including trigger and invoke connections. They should be familiar with the Connectivity Agent, which facilitates on-premises connectivity to OIC services.
トピック 5	• Testing, Monitoring, and Troubleshooting Integrations: This section assesses candidates abilities in testing, monitoring, and troubleshooting integrations within the OIC.

1z0-1042-24独学書籍、1z0-1042-24教育資料

It-Passportsはその近道を提供し、君の多くの時間と労力も節約します。It-PassportsはOracleの1z0-1042-24認定試験「Oracle Cloud Infrastructure 2024 Application Integration Professional」に向けてもっともよい問題集を研究しています。もしほかのホームページに弊社みたいな問題集を見れば、あとでみ続けて、弊社の商品を盗作することとよくわかります。It-Passportsが提供した資料は最も全面的で、しかも更新の最も速いです。

Oracle Cloud Infrastructure 2024 Application Integration Professional 認定 1z0-1042-24 試験問題 (Q40-Q45):

質問 # 40
Which of the following is NOT a capability of the Oracle Integration (OIC) REST Adapter when configured to consume external REST APIs?

- A. Supports WebSocket connections for real-time communication
- B. Supports asynchronous REST API invocations with callback URLs
- C. Consumes REST APIs protected using OAuth Client Credentials
- D. Supports JSON, XML, binary, and URL-form-encoded payloads

正解：A

解説：
Comprehensive and Detailed Explanation:
REST Adapter:
* D:False-no WebSocket support.

質問 # 41
You can group one or more Oracle Integration Cloud (OIC) integrations into a single structure called a package. Which statement is not true about OIC packages?

- A. New packages can be created by clicking the Create button on the packages page in the OIC console.
- B. You can import packages directly from the Oracle Marketplace.
- C. Integrations do not need to be part of a package.
- D. Packages enable you to easily import and export a group of integrations to and from OIC.
- E. Packages cannot be locked to deny other users access to your integrations.
- F. All packages must include at least one integration.

正解：E

解説：
Comprehensive and Detailed Explanation:
OIC packages are logical containers for grouping related integrations, facilitating management, export/import, and deployment. Let's dissect each option with in-depth analysis:
* Option A: All packages must include at least one integration.
* True:A package in OIC is meaningless without integrations. When you create a package, it's a prerequisite to associate at least one integration with it, either during creation or afterward. For example, if you're building a payroll processing suite, the package would include integrations for employee data sync, payment processing, etc. An empty package serves no purpose and isn't allowed in practice.
* Option B: You can import packages directly from the Oracle Marketplace.
* True:The Oracle Marketplace offers prebuilt integration packages (e.g., for connecting Oracle ERP to third-party apps). These can be imported into your OIC instance, saving development time. For instance, a Salesforce-to-Oracle HCM package could be downloaded and customized.
This aligns with OIC's ecosystem approach to accelerate adoption.
* Option C: Packages cannot be locked to deny other users access to your integrations.
* False (Not True):Packagescanbe locked in OIC to restrict editing or access by other users, enhancing security and version control. Locking prevents unintended modifications, especially in collaborative environments. For example, a production-ready payroll package might be locked to ensure stability. The ability to lock is a feature in the OIC console under package management, making this statement incorrect and thus the answer.
* Option D: New packages can be created by clicking the Create button on the packages page in the OIC console.
* True:In the OIC console, navigating to the Packages page reveals a "Create" button. Clicking it initiates the package creation process, where you define a name, identifier, and optionally add integrations. This user-friendly interface simplifiesgrouping-for example, creating a
"CustomerSyncPackage" for CRM integrations.
* Option E: Integrations do not need to be part of a package.
* True:Integrations can exist independently in OIC without being packaged. This flexibility suits standalone workflows, like a one-off file transfer integration, versus grouped processes like an end-to-end order management suite.
* Option F: Packages enable you to easily import and export a group of integrations to and from OIC.
* True:Packages streamline migration by exporting multiple integrations as a single PAR (Package Archive) file. For instance, exporting a package with five HR integrations to another OIC instance ensures consistency and reduces manual effort compared to exporting individual IAR files.
Why C is the answer:The ability to lock packages contradicts option C, making it the only untrue statement.
Locking is a critical feature for governance, especially in enterprise settings where multiple developers work concurrently.
Use Case Example:Imagine a team deploying a locked "OrderProcessingPackage" to production-locking prevents accidental changes, ensuring reliability.

質問＃42
Oracle Integration (OIC) integrations can be exported so that later they can be imported into another OIC environment. Which statement is NOT valid regarding the import and export of OIC integrations?

- A. Imported integrations cannot be immediately activated if their dependent connection resources are not already present in the target OIC environment.
- B. Imported integrations can be reconfigured to use different connection resources by using the OIC REST API.
- C. Integration must be exported as a project deployment if you want to import them into another OIC environment.
- D. Exported integrations include all their dependent connection resource information except URLs and credentials.

正解：C

解説：
Comprehensive and Detailed Explanation:
Exporting/importing integrations is key for migration or backup. Let's analyze:
* A:True-exports (IAR/PAR) include metadata but exclude sensitive data.
* B:False-no "project deployment" requirement; individual IAR or PAR files suffice.
* C:True-missing connections block activation.

質問＃43
Which set of operations are supported by the Oracle Integration Cloud (OIC) File Adapter?

- A. Read, write, list
- B. Read, write
- C. Read, write, list, download, move, delete
- D. Read, write, list, download, move
- E. Read, write, list, download

正解：C

解説：
Comprehensive and Detailed Explanation:
File Adapter operations:
* D:True-supports read, write, list, download, move, delete.

質問 # 44

In an Oracle Integration Cloud (OIC) project, you are asked to leverage a custom JavaScript library function to be used within an application-driven orchestration integration flow. Which set of steps should you follow to correctly use the JavaScript library within your OIC integration?

- A. Import the JavaScript library file into your OIC instance's database schema, and then use a Local Invoke action to call the library function.
- B. Import the JavaScript library file to the OIC Console, and then use the JavaScript action within the integration flow to reference the library function.
- C. Copy and paste the entire JavaScript function code into a new JavaScript stage within the integration flow, and then map the inbound and outbound data elements in the corresponding map action.
- D. Use the function call action within the integration flow to reference an external URL that is hosting the JavaScript library function.

正解：B

解説：
Comprehensive and Detailed Explanation:
JavaScript in OIC:
* D:True-import and reference is standard.
