CCFA-200b Training Tools | CCFA-200b 100% Accuracy

The price for CrowdStrike Falcon Administrator CCFA-200b study materials is quite reasonable, and no matter you are a student or you are an employee, you can afford the expense. Besides, CrowdStrike CCFA-200b exam materials are compiled by skilled professionals, therefore quality can be guaranteed. CCFA-200b Study Materials cover most knowledge points for the exam, and you can learn lots of professional knowledge in the process of training.

CrowdStrike Falcon Administrator Sample Questions (Q107-Q112):

NEW QUESTION # 107

You are beginning the rollout of the Falcon Sensor for the first time side-by-side with your existing security solution. You need to configure the Machine Learning levels of the Prevention Policy so it does not interfere with existing solutions during the testing phase. What settings do you choose?

- A. Detection slider: Extra Aggressive
Prevention slider: Cautious
- B. Detection slider: Moderate
Prevention slider: Disabled
- C. Detection slider: Cautious
Prevention slider: Cautious
- D. Detection slider: Disabled
Prevention slider: Disabled

Answer: C

Explanation:

Explanation: The best settings to configure the Machine Learning levels of the Prevention Policy so it does not interfere with existing solutions during the testing phase are Cautious for both Detection and Prevention sliders. This setting will enable the sensor to detect and prevent only high-confidence malicious events, while allowing low-confidence events to run without interference. This setting will also generate less noise and false positives than higher settings, such as Moderate or Extra Aggressive.

NEW QUESTION # 108

Which role will allow someone to manage quarantine files?

- A. Detections Exceptions Manager
- B. Falcon Analyst ?Read Only
- **C. Falcon Security Lead**
- D. Endpoint Manager

Answer: C

Explanation:

The role that will allow someone to manage quarantine files is Falcon Security Lead. This role allows users to view and manage quarantined files, as well as release them from quarantine or download them for further analysis. The other roles do not have this capability.

NEW QUESTION # 109

You have been asked by your Server management team to provide a list of all Servers that have a "TIER3" Sensor grouping tag. What method will allow you to export a .csv file with the results?

- A. On the Host management page filter by OS Version - Server, and Tags - SensorGroupingTags/ TIER3, then export the results
- **B. On the Host management page filter by Type - Server, and Tags - SensorGroupingTags/ TIER3, then export the results**
- C. On the Host dashboard select the OS platform - Server, and the Tag - SensorGroupingTags/ TIER3, then export the results
- D. On the Host management page filter by Platform - Server, then export the results

Answer: B

NEW QUESTION # 110

What is the purpose of the "Auto - Latest" setting in a sensor update policy?

- A. This setting automatically assigns new hosts that come online to this policy
- B. This setting automatically assigns the latest Indicator of Attack (IOA) profiles and Next-Gen Antivirus (NGAV) machine learning to the selected endpoints ensuring the highest level of security
- **C. This setting will cause all assigned hosts to be updated to the most current version as soon as it becomes available**
- D. This setting overrides any user confirmation/interaction and applies the selected policy

Answer: C

NEW QUESTION # 111

You have a Windows host on your network in Reduced functionality mode (RFM). While the system is in RFM, which of the following is TRUE?

- A. Event reporting will be unavailable
- B. System monitoring will be unavailable
- **C. Some detection patterns and preventions will not be triggered**
- D. Prevention patterns will not be triggered

Answer: C

Explanation:

The option that is true when a Windows host is in Reduced Functionality Mode (RFM) is that some detection patterns and preventions will not be triggered. RFM is a mode that limits the sensor's functionality due to license expiration, network connectivity loss, or certificate validation failure. When a Windows sensor is in RFM, it will only provide basic prevention capabilities, such as blocking known malware hashes and preventing script execution from the %TEMP% directory.

The sensor will not send any telemetry or detection events to the Falcon platform, and will not receive any policy or update changes from the Falcon cloud. This means that some detection patterns and preventions that rely on telemetry, machine learning, or cloud analysis will not be triggered.

NEW QUESTION # 112

.....

The authoritative, efficient, and thoughtful service of CCFA-200b learning question will give you the best user experience, and you can also get what you want with our study materials. I hope our study materials can accompany you to pursue your dreams. If you can choose CCFA-200b test guide, we will be very happy. We look forward to meeting you.
