Salesforce-Data-Cloud Exam Sample & Exam Salesforce-Data-Cloud Exercise

You will find that it is easy to buy our Salesforce-Data-Cloud exam questions, as you add them to the cart and pay for them. You can receive them in 5 to 10 minutes and then you can study at once. What's more, during the whole year after purchasing, you will get the latest version of our Salesforce-Data-Cloud Study Materials for free. You can see it is clear that there are only benefits for you to buy our Salesforce-Data-Cloud learning guide, so why not just have a try right now?

Salesforce Data Cloud Accredited Professional Exam Sample Questions (Q15-Q20):

NEW QUESTION # 15

Which two applications automatically create activation targets at the time the application is connected to Data Cloud?

- A. B2C Commerce
- B. Marketing Cloud Engagement
- C. Personalization powered by Interaction Studio
- D. Amazon S3

Answer: A,C

Explanation:

These two applications automatically create activation targets when they are connected to Data Cloud. You can use these targets to activate segments or calculated insights to these applications. Reference: https://help.salesforce.com/s/articleView?id=sf.c360_a_data_cloud_activation.htm&type=5

NEW QUESTION # 16

A segment fails to refresh with the error "Segment references too many Data Lake Objects (DLOs)". What are two remedies for this issue?

- A. Use Calculated Insights in order to reduce the complexity of the segmentation query
- B. Space out the segment schedules to reduce Data Lake Object load
- C. Split the segment into smaller segments
- D. Refine segmentation criteria to limit up to 5 custom DMOs

Answer: B,C

Explanation:

These two remedies can help resolve the error "Segment references too many Data Lake Objects (DLOs)". Spacing out the segment schedules can reduce the concurrent load on the Data Lake Objects and improve performance. Splitting the segment into smaller segments can reduce the number of Data Lake Objects that are referenced by each segment. Reference: <https://help.salesforce.com/s/articleView?>

NEW QUESTION # 17

An administrator wants to be able to create a multi-dimensional metric to identify unified individual lifetime value (LTV). Which sequence of DMO joins are necessary within the Calculated Insight to enable this calculation?

- A. Unified Individual > Unified Link Individual > Sales Order
- B. Unified Individual > Individual > Sales Order
- C. Sales Order > Individual > Unified Individual
- D. Sales Order > Unified Individual

Answer: A

Explanation:

To create a multi-dimensional metric to identify unified individual lifetime value (LTV), the administrator needs to join the following data model objects (DMOs) in the Calculated Insight:

* Unified Individual: This DMO represents the unified profile of an individual, which contains attributes from multiple sources.

- * Unified Link Individual: This DMO represents the link between an Individual DMO and a Unified Individual DMO.
 - * Sales Order: This DMO represents a transaction or purchase made by an individual.
- The sequence of joins should start from the Unified Individual DMO, then join the Unified Link Individual DMO using the UnifiedIndividualId field, and then join the Sales Order DMO using the IndividualId field. This way, the administrator can access the sales order data for each unified individual and calculate their lifetime value.

NEW QUESTION # 18

A consultant wants to ensure that every segment managed by multiple brand teams adheres to the same set of exclusion criteria, that are updated on a monthly basis.

What is the most efficient option to allow for this capability?

- A. Create, publish, and deploy a data kit.
- **B. Create a reusable container block with common criteria.**
- C. Create a segment and copy it for each brand.
- D. Create a nested segment.

Answer: B

Explanation:

The most efficient option to allow for this capability is to create a reusable container block with common criteria. A container block is a segment component that can be reused across multiple segments. A container block can contain any combination of filters, nested segments, and exclusion criteria. A consultant can create a container block with the exclusion criteria that apply to all the segments managed by multiple brand teams, and then add the container block to each segment. This way, the consultant can update the exclusion criteria in one place and have them reflected in all the segments that use the container block.

The other options are not the most efficient options to allow for this capability. Creating, publishing, and deploying a data kit is a way to share data and segments across different data spaces, but it does not allow for updating the exclusion criteria on a monthly basis.

Creating a nested segment is a way to combine segments using logical operators, but it does not allow for excluding individuals based on specific criteria. Creating a segment and copying it for each brand is a way to create multiple segments with the same exclusion criteria, but it does not allow for updating the exclusion criteria in one place.

Create a Container Block

Create a Segment in Data Cloud

Create and Publish a Data Kit

Create a Nested Segment

NEW QUESTION # 19

To import campaign members into a campaign in CRM a user wants to export the segment to Amazon S3. The resulting file needs to include CRM Campaign ID in the name. How can this outcome be achieved?

- A. Hard-code the campaign identifier as a new attribute in the campaign activation
- **B. Include campaign identifier into the filename specification**
- C. Include campaign identifier into the segment name
- D. Include campaign identifier into the activation name

Answer: B

Explanation:

You can use the filename specification option in the Amazon S3 activation to customize the name of the file that is exported. You can use variables such as {campaignId} to include the CRM campaign ID in the file name. Reference:

https://help.salesforce.com/s/articleView?id=sfc360_a_data_cloud_amazon_s3.htm&type=5

NEW QUESTION # 20

.....

We all realize that how important an Accredited Professional certification is, also understand the importance of having a good knowledge of it. Passing the Salesforce-Data-Cloud exam means you might get the chance of higher salary, greater social state and satisfying promotion chance. Once your professional ability is acknowledged by authority, you master the rapidly developing information technology. With so many advantages, why don't you choose our reliable Salesforce-Data-Cloud Actual Exam guide,

for broader future and better life? Our Salesforce-Data-Cloud exam questions won't let you down.

Salesforce-Data-Cloud Exam Sample: <https://www.itcertmaster.com/Salesforce-Data-Cloud.html>

Our Salesforce-Data-Cloud exam simulation is selected many experts and constantly supplements and adjust our questions and answers, In order to let customers understand our Salesforce-Data-Cloud exam dumps better, our company will provide customers with a trail version, It will be a reasonable choice for our Salesforce-Data-Cloud actual test materials along with benefits, Salesforce Valid Salesforce-Data-Cloud Torrent The sales volumes grow rapidly every year.

each CurrentState object is an instance of a private class, nested Test Salesforce-Data-Cloud Answers within the Enumerator class, that has a reference to the Enumerator instance so that it can change the CurrentState.

With our Salesforce-Data-Cloud exam torrent, you can enjoy the leisure study experience as well as pass the Salesforce-Data-Cloud Exam with success ensured, Our Salesforce-Data-Cloud exam simulation is selected many experts and constantly supplements and adjust our questions and answers.
