

# DevOps-Foundation Actual Braindumps, Peoplecert Valid DevOps-Foundation Test Vce: PeopleCert DevOps Foundationv3.6Exam Finally Passed

BTW, DOWNLOAD part of BraindumpQuiz DevOps-Foundation dumps from Cloud Storage: <https://drive.google.com/open?id=1YoMrN0PrhSZmUg54noQKCMrDXU1ZG87m>

Our system will accurately help you analyze the exercises of the DevOps-Foundation study materials. So you need not to summarize by yourself. Then you will clearly know where you are good at and where your do badly. Flexible adjustment to your revision of the DevOps-Foundation Real Exam is essential to pass the exam. You can make decisions after careful consideration. It is up to you to make a decision. And after you finish the DevOps-Foundation exam questions, the scores will show out right away.

## Peoplecert DevOps-Foundation Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> <li>Core DevOps Principles: This section of the exam measures the skills of IT operations specialists and covers essential DevOps principles such as the Three Ways, the Theory of Constraints, and Chaos Engineering. It also introduces the concept of learning organisations, showing how systemic thinking supports continuous improvement.</li> </ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Key DevOps Practices:</b> This section of the exam measures the skills of DevOps engineers and covers core DevOps practices including Continuous Integration, Continuous Testing, Continuous Delivery, and Continuous Deployment. It explores concepts such as Site Reliability Engineering, DevSecOps, Value Stream Management, Platform Engineering, and modern practices like ChatOps and observability.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Automation, Architecting DevOps Toolchains:</b> This section of the exam measures the skills of IT operations specialists and covers key automation principles within the DevOps toolchain. It focuses on CI</li> <li>• <b>CD pipelines, Infrastructure as Code, containerisation, cloud-native architecture, platform engineering, and emerging technologies like Machine Learning and Generative AI in DevOps contexts.</b></li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Measurement, Metrics, and Reporting:</b> This section of the exam measures the skills of DevOps engineers and covers metrics that help monitor and evaluate the performance of DevOps practices. Topics include speed, quality, culture, change lead time, cycle time, and the use of dashboards, value-driven metrics, and AIOps in reporting and decision-making.</li> </ul>

## Valid DevOps-Foundation Test Vce & Best DevOps-Foundation Practice

Everyone is not willing to fall behind, but very few people take the initiative to change their situation. Take time to make a change and you will surely do it. Our DevOps-Foundation actual test guide can give you some help. Our company aims to help ease the pressure on you to prepare for the exam and eventually get a certificate. Obtaining a certificate is equivalent to having a promising future and good professional development. Our DevOps-Foundation Study Materials have a good reputation in the international community and their quality is guaranteed. Why don't you there have a brave attempt? You will certainly benefit from your wise choice.

## Peoplecert PeopleCert DevOps Foundationv3.6Exam Sample Questions (Q46-Q51):

### NEW QUESTION # 46

Which of the following helps an organization to practice DevSecOps?

- A. Engaging external testing services
- B. Embracing a "shift right" testing strategy approach can take advantage of continuous integration and test-driven development practices
- **C. Security as code**
- D. Conducting frequent security audits after deployment

**Answer: C**

Explanation:

DevSecOps is about integrating security into every stage of the software delivery lifecycle rather than treating it as a separate, post-development activity. PeopleCert DevOps Foundation v3.6 stresses that security must shift left-moving testing, vulnerability scanning, and compliance checks earlier in the process.

Security as Code means embedding security policies, controls, and checks directly into infrastructure and application code. This includes:

- \* Automated vulnerability scanning in CI/CD pipelines
- \* Infrastructure-as-code with integrated security configurations
- \* Policy-as-code to enforce compliance automatically
- \* Static and dynamic application security testing (SAST/DAST) integrated into build pipelines While A incorrectly says "shift right" (testing later in production), DevSecOps emphasizes shifting left. B (post- deployment audits) and C (external testing) can complement DevSecOps but don't fully embed security into the delivery workflow.

Therefore, D - Security as code is the most direct enabler of DevSecOps practices.

OWASP DevSecOps Guidelines

#### NEW QUESTION # 47

Updates to a complex critical business service are released every calendar quarter. The business would like to increase the frequency of releases for this service.

Why would segmenting the service into microservices help to improve the frequency of release?

- A. Microservices create a service architecture built on smaller modules that can be updated independently without affecting the primary system
- B. Microservices are less expensive and therefore can be built and released more frequently
- C. Microservices can be built quickly to correct or remove errors in the primary system
- D. Microservices are always open source so they can be modified frequently to meet business requirements

**Answer: A**

Explanation:

Microservices architecture breaks down applications into small, independent, loosely coupled services that can be developed, tested, and deployed independently.

\* Why does this improve release frequency? Each microservice can be updated, tested, and deployed on its own, reducing the risk and coordination overhead associated with monolithic releases.

\* This allows for faster feedback and more frequent delivery of value to users.

Extract-style reference:

"Microservices enable teams to deploy independently, reduce deployment risk, and increase release frequency by decoupling services."

-Accelerate: The Science of Lean Software and DevOps, Chapter 4

PeopleCert DevOps Foundation v3.6: Stresses modular architectures for enabling rapid, independent deployments and continuous delivery.

#### NEW QUESTION # 48

Agile funding can be \_\_\_\_\_

- A. Continuous cost
- B. Reviewed frequently
- C. All of the Above
- D. Fixed cost

**Answer: C**

Explanation:

Agile funding is flexible and adapts to the iterative, incremental nature of Agile and DevOps projects.

It can be fixed cost for some work, continuous cost for ongoing value streams, and is reviewed frequently to align with evolving priorities.

All three characteristics are true, so D ("All of the Above") is correct.

Extract-style reference:

"Agile funding models support continuous review and adaptation, providing the flexibility required for digital transformation and DevOps ways of working."

- Project to Product, Mik Kersten

PeopleCert DevOps Foundation v3.6: Advocates funding models that encourage agility, experimentation, and rapid value delivery.

#### NEW QUESTION # 49

The CIO of an online retailer is excited about the potential of DevOps for her organization. She tells her managers that she wants DevOps to be fully implemented by the end of the year. Last year, she mandated the same approach for agile software development. When the managers share this information with their teams, they are met with apathy and passive resignation. The staff is tired of the frequent changes in direction.

What can the managers do to encourage their teams to be more enthusiastic about DevOps?

- A. Architect a DevOps toolchain that will demonstrate the value of more automation
- B. Empower people to participate and contribute their knowledge and ideas
- C. Reorganize the department's structure to remove silos and create DevOps teams

- D. Establish and publish goals and metrics for DevOps success

**Answer: B**

Explanation:

When teams have experienced frequent top-down mandates without adequate involvement, they may feel change fatigue and resist new initiatives. PeopleCert DevOps Foundation v3.6 emphasizes the importance of engagement and empowerment to build buy-in and ownership for DevOps transformation.

Empowering people means involving them in decisions, encouraging contribution of their ideas, and making them active participants in shaping the DevOps adoption plan. This approach builds trust, reduces resistance, and taps into collective knowledge, leading to solutions that are practical and widely accepted.

Options A, B, and C can support DevOps adoption but do not address the root cause of low enthusiasm-lack of involvement.

Empowerment fosters intrinsic motivation, which is essential for sustained cultural change.

Thus, D is the most effective choice.

The DevOps Handbook- Building a Culture of Trust and Collaboration

### NEW QUESTION # 50

An organization is struggling to reduce delays when launching new projects.

Which of the following automation practices could help reduce these delays?

- A. Test-driven development
- B. Automated continuous integration and builds
- **C. All of the Above**
- D. Treating infrastructure as code

**Answer: C**

Explanation:

Reducing delays in launching projects requires eliminating manual, time-consuming tasks in the delivery process:

\* A: Continuous Integration (CI) with automated builds speeds up integration and reduces defects.

\* B: Test-Driven Development (TDD) ensures quality from the start, reducing rework and post-development bug fixing.

\* C: Infrastructure as Code (IaC) enables rapid, repeatable provisioning of environments, avoiding manual setup delays.

All three practices contribute to faster, more reliable project starts. As PeopleCert notes, combining these practices creates a strong automation foundation, enabling organizations to move from idea to delivery quickly.

Therefore, D-All of the above-is correct.

The DevOps Handbook- CI, TDD, and IaC Principles

### NEW QUESTION # 51

.....

It is easy for you to pass the exam because you only need 20-30 hours to learn and prepare for the exam. You may worry there is little time for you to learn the DevOps-Foundation Study Tool and prepare the exam because you have spent your main time and energy on your most important thing such as the job and the learning and can't spare too much time to learn. But if you buy our PeopleCert DevOps Foundation v3.6 Exam test torrent you only need 1-2 hours to learn and prepare the exam and focus your main attention on your most important thing.
