- A. 0
- B. 1
- C. 2
- D. Unlimited

**Answer: D**

Which statement about SoftConsole is true?

- A. SoftConsole works in conjunction with physical telephone.
- B. SoftConsole is a Linux based application
- C. With SoftConsole, only two simultaneous users are supported.
- D. VoIP is available for the SoftConsole feature

**Answer: A**

Explanation:

SoftConsole is a PC-based application for IP Office, typically used by receptionists or operators to manage calls. Option A, "SoftConsole works in conjunction with physical telephone," is correct because it complements a physical IP Office phone, providing a graphical interface to handle call transfers, hold, and directory lookups while relying on the phone for audio. Option B is incorrect as SoftConsole is Windows-based, not Linux. Option C (VoIP) is misleading; SoftConsole manages calls but does not provide VoIP audio itself. Option D is wrong as SoftConsole supports a single user per instance, but multiple instances can run if licensed, not limited to two. References: Avaya IP Office SoftConsole User Guide.
