What is the management IP address of the device shown in the exhibit?

- A. 10.210.20.233
- B. 172.23.12.100
- C. 128.0.0.1
- D. 172.23.11.10

Answer: B

Explanation:

The management IP address of a device is the IP address that is used to access the device for configuration and monitoring purposes. It is usually assigned to a dedicated management interface that is separate from the data interfaces. The management interface can be accessed via SSH, Telnet, HTTP, or other protocols.

In the exhibit, the list of interfaces and their statuses shows that the management interface is me0. This

What's more, part of that Dumps4PDF JN0-351 dumps now are free: <https://drive.google.com/open?id=176yOVeTFjHxnQYCDQq85jioaOwUjBCiF>

The Juniper JN0-351 online exam is the best way to prepare for the Juniper JN0-351 exam. Dumps4PDF has a huge selection of JN0-351 dumps and topics that you can choose from. The JN0-351 Exam Questions are categorized into specific areas, letting you focus on the Juniper JN0-351 subject areas you need to work on.

The Dumps4PDF is committed to making the Juniper JN0-351 certification exam preparation simple, smart, and successful. To achieve this objective Dumps4PDF is offering top-notch and real JN0-351 exam questions in three different formats. The names of these Enterprise Routing and Switching, Specialist (JNCIS-ENT) (JN0-351) exam questions formats are PDF files, desktop practice test software, and web-based JN0-351 practice test software.

Quiz 2026 Professional Juniper Cost Effective JN0-351 Dumps

Our JN0-351 exam Braindumps are available in PDF, software, and online three modes, which allowing you to switch learning materials on paper, on your phone or on your computer, and to study anywhere and anytime. And in any version of JN0-351 practice materials, the number of downloads and the number of people used at the same time are not limited. You can practice

repeatedly for the same set of JN0-351 Questions and continue to consolidate important knowledge points.

Juniper Enterprise Routing and Switching, Specialist (JNCIS-ENT) Sample Questions (Q51-Q56):

NEW QUESTION # 51

Your ISP is announcing a default route to both R1 and R2. You want your network routers to forward all Internet traffic through the R1 device.

Which BGP attribute would you use?

□

- A. next-hop
- B. origin
- C. MED
- D. local preference

Answer: D

Explanation:

The BGP attribute that you would use to forward all Internet traffic through the R1 device is the local preference.

The local preference is an attribute that is used within an autonomous system (AS) and exchanged between iBGP routers. It is used to select an exit point from the AS. The path with the highest local preference is preferred. By setting a higher local preference for the routes received from R1, you can make R1 the preferred exit point for all Internet traffic.

NEW QUESTION # 52

Your BGP neighbors, one in the USA and one in France, are not establishing a connection with each other.

Referring to the exhibit, which statement is correct?

□

- A. The BFD liveness must be configured on the BGP group.
- B. The BFD liveness is set too high.
- C. The BFD liveness is set too low.
- D. The BFD liveness must be configured on the BGP neighbor.

Answer: D

Explanation:

In the configuration shown, BFD (Bidirectional Forwarding Detection) liveness detection is globally configured, but for BFD to work with specific BGP neighbors, it must be configured under each BGP neighbor or BGP group. Without specific BFD configuration at the neighbor or group level, BFD will not be used to monitor the BGP sessions, which might be causing the BGP neighbors not to establish a connection.

NEW QUESTION # 53

You are a network operator who wants to add a second ISP connection and remove the default route to the existing ISP. You decide to deploy the BGP protocol in the network.

What two statements are correct in this scenario? (Choose two.)

- A. IBGP peers advertise routes received from IBGP peers to other IBGP peers.
- B. IBGP peers advertise routes received from EBGP peers to other IBGP peers.
- C. IBGP updates the next-hop attribute to ensure reachability within an AS.
- D. EBGP peers advertise routes received from IBGP peers to other EBGP peers.

Answer: B,C

Explanation:

A is correct because IBGP updates the next-hop attribute to ensure reachability within an AS. This is because the next-hop attribute is the IP address of the router that advertises the route to a BGP peer. If the next-hop attribute is not changed by IBGP, it would be the IP address of an external router, which may not be reachable by all routers within the AS. Therefore, IBGP updates the next-hop attribute to the IP address of the router that received the route from an EBGP peer.

B is correct because IBGP peers advertise routes received from EBGP peers to other IBGP peers. This is because BGP follows the

rule of advertising only the best route to a destination, and EBGp routes have a higher preference than IBGP routes. Therefore, IBGP peers advertise routes learned from an EBGp peer to all BGP peers, including both EBGp and IBGP peers¹.

NEW QUESTION # 54

Which mechanism is used to share routes between routing tables?

- A. filter-based forwarding
- B. forwarding instances
- C. routing instances
- **D. RIB groups**

Answer: D

NEW QUESTION # 55

Which three statements are correct about OSPF packet types? (Choose three.)

- **A. Database description packets are used during the adjacency formation process.**
- B. Link-state acknowledgment packets are sent every 30 seconds.
- **C. Link-state update packets contain one or more LSAs.**
- **D. Link-state request packets are sent after receiving an LSA header not in the OSPF database.**
- E. Hello packets are sent every 30 seconds by default.

Answer: A,C,D

NEW QUESTION # 56

.....

You don't have to worry about your problems on our JN0-351 exam questions are too much or too simple. Our staff will give you a smile and then answer them carefully. All we do is just want you to concentrate on learning on our JN0-351 study guide! Let other things go to us. And as long as you focus on our JN0-351 Training Materials, we believe you will pass for sure for our JN0-351 practice braindumps are always the latest and valid for all of our customers.
