1Z0-1072-25 New Learning Materials, Regualer 1Z0-1072-25 Update

P.S. Free & New 1Z0-1072-25 dumps are available on Google Drive shared by VerifiedDumps: https://drive.google.com/open?id=1LwinKvrTgt7hNWZ0PwkcuJaWpN5co_rW

For candidates who are going to attend the exam, passing the exam is a good wish. 1Z0-1072-25 exam torrent will help you to pass the exam just one time, and we are pass guaranteed and money back guaranteed if you fail the exam. We promise to refund all of your money if you fail the exam by using the 1Z0-1072-25 Exam Torrent, or if you have other exam to attend, we can also replace other 2 valid exam dumps for you, at the same time you can get the update version for 1Z0-1072-25 exam torrent. In addition, you can consult us if you have any questions.

Oracle 1Z0-1072-25 Exam Syllabus Topics:

Topic	Details

Topic 1	• Compute: This section measures skills of cloud architects responsible for designing scalable and resilient infrastructure, covering compute instance configuration, autoscaling policies, and OS management. It evaluates understanding of OCI compute image options, infrastructure maintenance processes, and strategies for optimizing instance performance across availability domains.
Topic 2	• Networking: Targeting network architects designing secure cloud architectures, this domain focuses on Virtual Cloud Network (VCN) implementation, including subnet design, IP address management, and routing through gateways (NAT, service, internet). It assesses expertise in VPN • FastConnect deployment, DNS configuration, load balancer setup, and advanced tools like Network Path Analyzer for troubleshooting latency or connectivity issues.
Topic 3	• Storage: Designed for storage administrators managing enterprise data solutions, this section tests proficiency in deploying Block • File • Object Storage with lifecycle management, cross-region replication, and tiered storage strategies. It includes configuring volume groups, snapshots, versioning, and security controls while analyzing storage performance metrics and cost optimization techniques.
Topic 4	• Identity and Access Management (IAM): This domain validates skills of security architects implementing granular access controls, emphasizing IAM policy creation, compartment organization, and dynamic group configuration. It covers identity domain management, network source restrictions, and tag-based access mechanisms to enforce least-privilege principles across OCI resources

Quiz 2026 Oracle 1Z0-1072-25: Oracle Cloud Infrastructure 2025 Architect Associate Latest New Learning Materials

Our company employs the first-rate expert team which is superior to others both at home and abroad. Our experts team includes the experts who develop and research the 1Z0-1072-25 cram materials for many years and enjoy the great fame among the industry, the senior lecturers who boost plenty of experiences in the information about the exam and published authors who have done a deep research of the 1Z0-1072-25 latest exam file and whose articles are highly authorized. They provide strong backing to the compiling of the 1Z0-1072-25 Exam Questions and reliable exam materials resources. They compile each answer and question carefully. Each question presents the key information to the learners and each answer provides the detailed explanation and verification by the senior experts. The success of our 1Z0-1072-25 latest exam file cannot be separated from their painstaking efforts.

Oracle Cloud Infrastructure 2025 Architect Associate Sample Questions (Q42-Q47):

NEW QUESTION # 42
You can attach resources to a Dynamic Routing Gateway (DRG). Select THREE of these resources.

- A. Virtual Circuits
- B. Subnet
- C. Remote Peering Connections
- D. VNIC
- E. Local Peering Connection
- F. IPSec Tunnel

Answer: A,C,F

Explanation:
A Dynamic Routing Gateway (DRG) in Oracle Cloud Infrastructure (OCI) is a virtual router that provides a path for private traffic between your on-premises network and your VCN, or between your VCN and other VCNs. The resources that can be attached to a DRG include:
A . Virtual Circuits: Used to establish a private connection between your on-premises data center and your VCN via Oracle's FastConnect service.

D . Remote Peering Connections: Enables peering between VCNs located in different regions (Remote VCN Peering).

E . IPSec Tunnel: Facilitates secure VPN connections between your on-premises network and your OCI VCN.

Oracle Cloud Infrastructure Documentation: Dynamic Routing Gateway Overview

NEW QUESTION # 43

Which IAM Identity Domain type should you create for a full-featured Identity-as-a-Service (IDaaS) solution?

- A. Oracle Apps Premium
- B. Free
- C. Premium
- D. External User

Answer: C

Explanation:

In Oracle Cloud Infrastructure (OCI), when you need a full-featured Identity-as-a-Service (IDaaS) solution, the appropriate Identity Domain type to create is Premium.

Premium Identity Domain: This option provides a comprehensive set of identity and access management (IAM) capabilities, including advanced security features, identity governance, and support for enterprise-grade integrations. It supports managing user identities, multifactor authentication, and various other identity services required for a robust IDaaS solution.

Other Options:

External User: This is a limited domain type typically used for managing users who only need access to specific external services.

Free: This domain type offers limited features and is not intended for full-featured enterprise IAM requirements.

Oracle Apps Premium: This is tailored for integrating with Oracle applications but does not offer the broad capabilities of the Premium option.

Relevant OCI Documentation:

Oracle Identity Domains Overview

This documentation explains the various identity domain types and their use cases within OCI.

NEW QUESTION # 44

Which authentication option should you use to ensure third-party APIs communicate with OCI resources?

- A. Auth Tokens
- B. SSH Key Pair with 2048-bit algorithm
- C. API Signing Key
- D. OCI Username and Password

Answer: C

Explanation:

When ensuring that third-party APIs communicate securely with OCI resources, the appropriate authentication option is API Signing Key.

API Signing Key: This method uses an RSA key pair to authenticate and sign API requests. The API signing key provides a secure and reliable way to ensure that the API requests to OCI are coming from an authorized source. It is commonly used for programmatic access to OCI services.

Other Options:

SSH Key Pair: Primarily used for secure shell access to compute instances, not for API authentication.

Auth Tokens: Typically used for authentication in environments where APIs don't support the API Signing Key, such as OCI CLI or SDKs.

OCI Username and Password: Generally used for the Console login, not for securing API communications.

Relevant OCI Documentation:

API Signing Key Authentication

This documentation provides details on using API Signing Keys for secure API communication in OCI.

NEW QUESTION # 45

Which Traffic Management Steering Policy facilitates the distribution of DNS traffic based on the geographical location of end users?

- A. Geolocation Steering
- B. IP Prefix Steering
- C. Proximity Steering
- D. ASN Steering

Answer: A

Explanation:
Geolocation Steering in OCI's Traffic Management Steering Policy allows you to distribute DNS traffic based on the geographical location of the end users. This method helps direct users to the nearest regional endpoint, optimizing latency and improving user experience.
Use Cases: Geolocation Steering is commonly used to deliver region-specific content, comply with data residency laws, or optimize service performance by directing traffic to the closest available servers.

Oracle Cloud Infrastructure Documentation: Traffic Management Steering Policies

NEW QUESTION # 46
What would happen if you choose not to proactively reboot the instance before the scheduled maintenance due date?

- A. The instance will get terminated.
- B. The instance is either reboot-migrated or rebuilt in place for you.
- C. You will receive another notification to reboot within the next 14 days.
- D. You will receive another notification to reboot within the next 7 days.

Answer: B

Explanation:
In OCI, if you choose not to proactively reboot your instance before the scheduled maintenance due date, the system will handle the maintenance automatically to ensure that the instance remains operational.
Reboot-Migration or Rebuild in Place: If you don't reboot the instance yourself, OCI will automatically perform a reboot-migration or rebuild in place for the instance. This ensures that the instance is moved to new hardware or updated without your intervention, maintaining uptime and applying necessary updates or fixes.
Impact on Instance: The exact action taken (reboot-migration or rebuild in place) depends on the type of maintenance required. However, either action will temporarily interrupt the instance, typically involving a reboot, but the instance's data and configuration will be preserved.
Relevant OCI Documentation:
Instance Maintenance
OCI Maintenance Events
These references discuss the procedures and options available for handling instance maintenance in OCI.

NEW QUESTION # 47
......

It is not hard to know that 1Z0-1072-25 torrent prep is compiled by hundreds of industry experts based on the syllabus and development trends of industries that contain all the key points that may be involved in the examination. Therefore, with 1Z0-1072-25 exam questions, you no longer need to purchase any other review materials, and you also don't need to spend a lot of money on tutoring classes. At the same time, 1Z0-1072-25 Test Guide will provide you with very flexible learning time in order to help you pass the exam.
