### Simplest Format of Cisco 300-425 Exam PDF Practice Materials

The company is preparing for the test candidates to prepare the 300-425 study materials professional brand, designed to be the most effective and easiest way to help users through their want to get the test 300-425 certification and obtain the relevant certification. In comparison with similar educational products, our training materials are of superior quality and reasonable price, so our company has become the top enterprise in the international market. Our 300-425 Study Materials have been well received by the users, mainly reflected in the following advantages.

### Cisco Designing Cisco Enterprise Wireless Networks Sample Questions (Q191-Q196):

#### NEW QUESTION # 191

An engineer must design a predictive site survey. The wireless network must be "location-ready". Each floor is quite small and has only a few offices. Which approach must be considered?

- A. At least two access points are deployed on each floor.
- B. At least four access points are deployed on each floor.
- C. At least one access points are deployed on each floor.
- D. At least three access points are deployed on each floor.

**Answer: D**

#### NEW QUESTION # 192

Guest anchoring is configured for a newly created SSID for your company. It has been noticed that the mobility tunnels are not up, and that MPING fails from your foreign WLC to the anchor WLC. What is the reason that it is failing?

- A. A rule is needed at the firewall to allow UDP port 97 for communication to work.
- B. A rule is needed at the firewall to allow TCP port 97 for communication to work.
- C. A rule is needed at the firewall to allow TCP port 16666 for communication to work.
- D. A rule is needed at the firewall to allow UDP port 16666 for communication to work.

**Answer: D**

Explanation:

Guest anchoring requires mobility tunnels to be established between the foreign and anchor WLCs. For these tunnels to function, the firewall must allow specific ports for communication. UDP port 16666 is the port used for mobility traffic in Cisco wireless networks, and if it is not allowed through the firewall, MPING and mobility tunnels will fail. #### NEW QUESTION # 193

Multiple WLCs are implemented in a high-availability configuration in a mobility group. APs are deployed with only a primary controller assigned. By default, which mobility group member controller do the orphaned APs join in the event of a failed controller?

- A. controller with the least CPU utilization over the last reporting period
- B. controller with the lowest percent of associated APs per license capacity
- C. controller with the most available AP free license capacity
- D. controller with the least number of associated APs

**Answer: B**

Explanation:

In a high-availability configuration, orphaned APs will join the controller with the lowest percentage of associated Access Points (APs) per license capacity by default. This ensures a balanced distribution of APs across the controllers in the mobility group, optimizing resource utilization and network performance. #### NEW QUESTION # 194

Refer to the exhibit. A customer is deploying a Greenfield 802.11n network with data, voice, and location awareness using APs with the WSSI modules. Which two settings in the Cisco Prime Infrastructure Planning Tool, when selected, provide a more accurate prediction of the number of APs the customer must purchase for the new facility? (Choose two.)

- A. Data/Coverage
- B. Location
- C. Location with Monitor Mode APs
- D. Voice
- E. Override Coverage per AP

**Answer: B,D**

Explanation:

When using the Cisco Prime Infrastructure Planning Tool for deploying a Greenfield 802.11n network with data, voice, location awareness, and APs equipped with WSSI modules, selecting 'Voice' will ensure that the tool accounts for the additional bandwidth requirements of voice applications which have strict QoS requirements. Choosing 'Location' will allow the tool to consider the need for more precise location tracking capabilities which typically require additional APs for triangulation purposes.

#### NEW QUESTION # 195

A wireless engineer is utilizing the voice readiness tool in Cisco Prime for a customer that wants to deploy Cisco IP phones. Which dBm range is the network inspected against?

- A. -72 to -67 dBm
- B. -85 to -65 dBm
- C. -78 to -65 dBm
- D. -85 to -67 dBm

**Answer: D**

Explanation:

[https://www.cisco.com/c/en/us/td/docs/net\\_mgmt/prime/infrastructure/34/user/guide/bk\\_CiscoPrimeInfrastructure\\_3\\_4\\_0\\_UserGuide/bk\\_CiscoPrimeInfrastructure\\_3\\_4\\_0\\_UserGuide\\_chapter\\_01010.html](https://www.cisco.com/c/en/us/td/docs/net_mgmt/prime/infrastructure/34/user/guide/bk_CiscoPrimeInfrastructure_3_4_0_UserGuide/bk_CiscoPrimeInfrastructure_3_4_0_UserGuide_chapter_01010.html)  
minimum is -90 and maximum is -67 for IP phone

#### NEW QUESTION # 196

.....

In order to meet different needs of the candidates, three versions for 300-425 exam materials are available. You can choose the one you prefer for your training. 300-425 PDF version is printable, and you can print them into hard one if you like. 300-425 Soft test engine can install in more than 200 personal computers, it also support MS operating system. 300-425 Online Test engine can be convenient and easy to learn, it supports all web browsers, and you can have a general review of what you have learned through this version.
