HPE Edge-to-Cloud Solutions Sample Questions (Q54-Q59):

NEW QUESTION # 54

Which of the following is an appropriate delivery model or models for a customer workload or business requirement?

- A. Agile innovation methods
- B. Virtual events
- C. HPE GreenLake cloud services
- D. Traditional solution

Answer: C

NEW QUESTION # 55

Your customer needs the smallest physical footprint for their S3 bucket storage requirement. Which HPE alliance platform should you recommend?

- A. HPE Solutions for Cohesiv
- B. HPE Solutions for Qumulo
- C. HPE Solutions for Scality Ring
- D. HPE Solutions for Scality Artesca

Answer: D

Explanation:

HPE Solutions for Scality Artesca is a lightweight, cloud-native object storage platform that supports S3 bucket storage for modern applications. It is designed to run on Kubernetes and bare metal servers, and can be deployed on a single node or scaled out to petabytes. It offers high performance, durability, and federated data management across edge, core, and cloud environments. It also has a low total cost of ownership and a flexible consumption model with HPE GreenLake. Compared to the other options, HPE Solutions for Scality Artesca has the smallest physical footprint and the most portability and scalability for S3 bucket storage requirements. References:

NEW QUESTION # 56

Which challenge do companies face as they try to find the right consumption model for them?

- A. Changing the consumption model requires IT to move resources from on-premises to the cloud.
- B. IT, financial, and department executives must collaborate to determine the best model.
- C. Companies often do not understand the advantages of CAPEX funding models.
- D. When companies change the consumption model, overall costs might increase for the first year.

Answer: B

NEW QUESTION # 57

Your customer has asked for various UEFI BIOS settings to be preconfigured at the Factory in their new servers. How do you submit the request for these changes to HPE?

- A. Add the required settings in the Order Checklist.
- B. Export the configuration to an XML file, open in Word and add the required settings.
- C. Export the configuration to an OCA file, open in Word and add the required settings.
- D. Add the required settings in the Customer Intent Document.

Answer: D

Explanation:

The Customer Intent Document (CID) is a document that captures the customer's requirements and expectations for their HPE
