

# Quiz 2026 CC: High-quality Certified in Cybersecurity (CC) Exam Test

P.S. Free 2026 ISC CC dumps are available on Google Drive shared by TestValid: <https://drive.google.com/open?id=15Zqo0uql5uQGRzUDqg2B17UaFKHX73GJ>

Our company has always been keeping pace with the times, so we are pushing renovation about CC test engine all the time to meet the different requirements of diversified production market. However it is obvious that different people have different preferences on CC preparation materials, thus we have three kinds of versions. If you are used to study with paper-based materials you can choose the PDF version. If you would like to get the mock test before the Real CC Exam you can choose the software version, if you want to study in anywhere at any time then our online APP version should be your best choice.

## ISC CC Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>• Network Security: This domain assesses the knowledge of Network Security Engineers and Cybersecurity Specialists. It covers foundational computer networking concepts including OSI and TCP</li><li>• IP models, IP addressing, and network ports. Candidates study network threats such as DDoS attacks, malware variants, and man-in-the-middle attacks, along with detection tools like IDS, HIDS, and NIDS. Prevention strategies including firewalls and antivirus software are included. The domain also addresses network security infrastructure encompassing on-premises data centers, design techniques like segmentation and defense in depth, and cloud security models such as SaaS, IaaS, and hybrid deployments.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>• <b>Security Operations:</b> This area targets Security Operations Center (SOC) Analysts and System Administrators. It covers data security with encryption methods, secure handling of data including classification and retention, and the importance of logging and monitoring security events. System hardening through configuration management, baselines, updates, and patching is included. Best practice security policies such as data handling, password, acceptable use, BYOD, change management, and privacy policies are emphasized. Finally, the domain highlights security awareness training addressing social engineering awareness and password protection to foster a security-conscious organizational culture.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>• <b>Access Control Concepts:</b> This section measures skills of Access Control Specialists and Physical Security Managers in understanding physical and logical access controls. Topics include physical security measures like badge systems, CCTV, monitoring, and managing authorized versus unauthorized personnel. Logical access control concepts such as the principle of least privilege, segregation of duties, discretionary access control, mandatory access control, and role-based access control are essential for controlling information system access.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>• <b>Business Continuity (BC), Disaster Recovery (DR) &amp; Incident Response Concepts:</b> This domain targets Business Continuity Planners and Incident Response Coordinators. It focuses on the purpose, importance, and core components of business continuity, disaster recovery, and incident response. Candidates learn how to prepare for and manage disruptions while maintaining or quickly restoring critical business operations and IT services.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>• <b>Security Principles:</b> This section of the exam measures skills of Security Analysts and Information Assurance Specialists and covers fundamental security concepts such as confidentiality, integrity, availability, authentication methods including multi-factor authentication, non-repudiation, and privacy. It also includes understanding the risk management process with emphasis on identifying, assessing, and treating risks based on priorities and tolerance. Candidates are expected to know various security controls, including technical, administrative, and physical, as well as the ISC2 professional code of ethics. Governance processes such as policies, procedures, standards, regulations, and laws are also covered to ensure adherence to organizational and legal requirements.</li> </ul>

## Get Free 1 year Update on ISC CC Dumps

TestValid.com won a good reputation by these candidates that have passed ISC CC certification exam. TestValid gets approve from the people with its powerful exam dumps. As long as you choose our dumps as review tool before the exam, you will have a happy result in CC Exam, which is perfectly obvious. Now hurry to download free demo, you will believe your choice can't be wrong.

## ISC Certified in Cybersecurity (CC) Sample Questions (Q303-Q308):

### NEW QUESTION # 303

The section of the IT environment that is closest to the external world; where we locate IT systems that communicate with the Internet.

- A. RBAC
- B. VLAN
- C. DMZ
- D. MAC

**Answer: C**

### NEW QUESTION # 304

What is the difference between BCP and DRP

- A. BCP is about maintaining critical business functions before a disaster occurs

- B. DRP is about restoring IT and communications back to full operations after a disruption, while BCP i about maintaining critical business functions
- C. BCP is about restoring IT and communications back to full operations after a disruption, while DRP is about maintaining critical business functions
- D. DRP and BCP are the same

**Answer: B**

#### NEW QUESTION # 305

An outward-facing IP address used to access the Internet.

- A. Private Address
- B. DNS
- C. Global Address
- D. Public Address

**Answer: D**

#### NEW QUESTION # 306

TCP and UDP reside at which layer of the OSI model?

- A. Presentation
- B. Data Link
- C. Transport
- D. Session

**Answer: C**

Explanation:

TCP (Transmission Control Protocol) and UDP (User Datagram Protocol) operate at the Transport layer (Layer 4) of the OSI model. This layer is responsible for end-to-end communication, segmentation, flow control, and error handling.

TCP provides reliable, connection-oriented communication with acknowledgments and retransmissions. UDP provides connectionless communication optimized for speed and low latency.

The Session layer manages session establishment, and the Presentation layer handles formatting and encryption. Neither is responsible for transport-level data delivery.

Understanding protocol placement is essential for firewall rules, intrusion detection, and network troubleshooting. Most security controls rely heavily on Transport-layer awareness.

#### NEW QUESTION # 307

What kind of control is, when we add a backup firewall that takes over if the main one stops working?

- A. Load balancing
- B. Component redundancy
- C. High availability(HA)
- D. Clustering

**Answer: C**

#### NEW QUESTION # 308

.....

Our CC exam review contains the latest test questions and accurate answers along with the professional explanations. A little attention to prepare CC practice test will improve your skills to clear exam with high passing score. For most busy IT workers, CC Dumps PDF is the best alternative to your time and money to secure the way of success in the IT filed.
