**Valid Real NCA-6.10 Exam - NCA-6.10 Test Simulator Fee**

The Nutanix NCA-6.10 certification exam is one of the top-rated and valuable credentials in the Nutanix world. This Nutanix NCA-6.10 exam questions is designed to validate the candidate's skills and knowledge. With Nutanix Certified Associate v6.10 exam dumps everyone can upgrade their expertise and knowledge level. By doing this the successful NCA-6.10 Exam candidates can gain several personal and professional benefits in their career and achieve their professional career objectives in a short time period.

## Nutanix Certified Associate v6.10 Sample Questions (Q69-Q74):

### NEW QUESTION # 69

When using the LCM Dark Site procedure in Prism Element or Prism Central, which Nutanix software component should be checked and upgraded first?

- **A. LCM Framework**
- B. NCC
- C. MSP
- D. Foundation

**Answer: A**

### NEW QUESTION # 70

An administrator has spent time correcting specific issues that have been identified by NCC Health Checks in Prism Element. How can just the checks that previously did not pass be executed again to confirm they are all resolved?

- **A. Select Only Failed And Warning Checks.**
- B. Run LCM Pre-Upgrade to trigger NCC Checks.
- C. Select Run Check for each check worked.
- D. Run ncc health checks run\_all.

**Answer: A**

Explanation:

To rerun only the health checks that previously failed or issued warnings, the administrator can select the Only Failed and Warning Checks option in Prism Element. This targeted approach helps verify that resolved issues have been addressed without rerunning all checks unnecessarily.

Steps:

- \* Navigate to Prism Element > Health > NCC Checks.
- \* Filter for Only Failed and Warning Checks and rerun them.

Other options:

- \* A. Run LCM Pre-Upgrade: Runs pre-upgrade checks, not related to health check validation.
- \* B. Run ncc health\_checks run\_all: Executes all checks, not just failed ones.
- \* C. Select Run Check for each check worked: Requires manual execution for each check.

### NEW QUESTION # 71

An administrator is building a new Windows VM on a Nutanix AHV cluster. However, when the administrator tries to install the OS, no disks are listed as available.

What does the administrator need to do to resolve the issue?

- **A. Mount and install the VirtIO drivers.**
- B. Enable Turbo Mode on the VM.
- C. Add a second disk to the VM.
- D. Mount and install the Nutanix Guest Tools.

**Answer: A**

Explanation:

The correct answer is C. Mount and install the VirtIO drivers.

When installing Windows OS on a Nutanix AHV VM, the default virtual disk controller uses the VirtIO interface, which is not natively

supported by Windows installation media. As a result, during the OS installation, the virtual disk will not appear unless the VirtIO drivers are manually provided.

Required Steps:

- \* Attach the VirtIO ISO to the VM.
- \* During the Windows installation, click "Load Driver".
- \* Browse to the mounted VirtIO ISO and select the appropriate storage driver.
- \* Once loaded, the installer will detect the virtual disk.

Clarifications:

- \* A (Add a second disk): Irrelevant; the issue is driver recognition, not disk quantity.
- \* B (Enable Turbo Mode): Related to performance, not disk detection.
- \* D (Install Nutanix Guest Tools): Done after OS installation, not before or during.

Prism UI Navigation Path:

VM > Edit > CD-ROM > Mount ISO # Select VirtIO ISO

Official Reference:

- \* Nutanix AHV Administration Guide - Creating Windows VMs
- \* Nutanix KB #5967 - AHV: Windows Installation on VirtIO
- \* Excerpt: "If the disk is not detected during Windows installation, the VirtIO ISO must be mounted and the appropriate storage controller driver manually installed."

### NEW QUESTION # 72

Within Prism Central, which Compute and Storage section will allow an administrator to upload a Windows ISO file?

- **A. Images**
- B. OVAS
- C. Catalog Items
- D. Templates

**Answer: A**

### NEW QUESTION # 73

For dark site clusters, what should be downloaded prior to running an LCM Inventory or updates?

- A. Nutanix Prism Central
- B. Nutanix Foundation Platform
- **C. Nutanix Compatibility Bundle**
- D. Nutanix Foundation

**Answer: C**

Explanation:

For dark site clusters, the Nutanix Compatibility Bundle must be downloaded prior to running LCM Inventory or updates. This bundle contains the necessary metadata and software binaries to perform inventory collection and upgrades in environments without internet connectivity.

- \* A. Nutanix Foundation: Incorrect, as Foundation is used for initial deployments, not for LCM updates.
- \* B. Nutanix Compatibility Bundle: Correct, as it contains the necessary files for offline LCM operations.
- \* C. Nutanix Prism Central: Incorrect, as this does not pertain to offline updates.
- \* D. Nutanix Foundation Platform: Incorrect, as this is not required for LCM Inventory or updates.
