

# Neueste Implementing Data Engineering Solutions Using Microsoft Fabric Prüfung pdf & DP-700 Prüfung Torrent

In Bezug auf die Microsoft DP-700 Zertifizierungsprüfung ist die Zuverlässigkeit nicht zu ignorieren. Die Schulungsmaterialien zur DP-700 Zertifizierungsprüfung von PrüfungFrage werden besonders entworfen, um Ihre Effizienz zu erhöhen. Unsere Website hat weltweit die höchste Erfolgsquote.

Wegen der Beliebtheit der Microsoft DP-700 Zertifizierungsprüfung haben viele Leute an der Microsoft DP-700 Zertifizierungsprüfung teilgenommen. Sie können ganz unbesorgt die Fragen und Antworten zur Microsoft DP-700 Zertifizierungsprüfung von PrüfungFrage benutzen, die Ihnen helfen, die Microsoft DP-700 Prüfung ganz einfach zu bestehen, und Ihnen auch viele Bequemlichkeiten bringen. Es ist allen bekannt, dass PrüfungFrage eine spezielle Website ist, die Fragen und Antworten zur Microsoft DP-700 Zertifizierungsprüfung bietet.

>> DP-700 Fragen Und Antworten <<

## Microsoft DP-700 PDF Demo & DP-700 Deutsch Prüfung

Wenn Sie die Microsoft DP-700 Zertifizierungsprüfung bestehen wollen, ist es ganz notwendig, die Schulungsunterlagen von PrüfungFrage zu wählen. Durch die Microsoft DP-700 Zertifizierungsprüfung wird Ihr Job besser garantiert. In Ihrem späten Berufsleben, werden Ihre Fertigkeiten und Kenntnisse wenigstens international akzeptiert. Das ist der Grund dafür, warum viele Menschen Microsoft DP-700 Zertifizierungsprüfung wählen. So ist diese Prüfung immer wichtiger geworden. Die Schulungsunterlagen zur Microsoft DP-700 Zertifizierungsprüfung von PrüfungFrage, die von den erfahrungsreichen IT-Experten bearbeitet, wird Ihnen helfen, Ihren Wunsch zu erfüllen. Sie enthalten Prüfungsfragen und Antworten. Keine anderen Schulungsunterlagen sind PrüfungFrage vergleichbar. Sie brauchen auch nicht am Kurs teilzunehmen. Sie brauchen nur die Schulungsunterlagen zur Microsoft DP-700 Zertifizierungsprüfung von PrüfungFrage in den Warenkorb hinzufügen, dann können Sie mit Hilfe von PrüfungFrage die Prüfung ganz einfach bestehen.

## Microsoft DP-700 Prüfungsplan:

|---------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Thema 2 | <ul style="list-style-type: none"> <li>• Monitor and optimize an analytics solution: This section of the exam measures the skills of Data Analysts in monitoring various components of analytics solutions in Microsoft Fabric. It focuses on tracking data ingestion, transformation processes, and semantic model refreshes while configuring alerts for error resolution. One skill to be measured is identifying performance bottlenecks in analytics workflows.</li> </ul> |
| Thema 3 | <ul style="list-style-type: none"> <li>• Ingest and transform data: This section of the exam measures the skills of Data Engineers that cover designing and implementing data loading patterns. It emphasizes preparing data for loading into dimensional models, handling batch and streaming data ingestion, and transforming data using various methods. A skill to be measured is applying appropriate transformation techniques to ensure data quality.</li> </ul>         |

## Microsoft Implementing Data Engineering Solutions Using Microsoft Fabric DP-700 Prüfungsfragen mit Lösungen (Q17-Q22):

### 17. Frage

You have an Azure SQL database named DB1.

In a Fabric workspace, you deploy an eventstream named EventStreamDBI to stream record changes from DB1 into a lakehouse.

You discover that events are NOT being propagated to EventStreamDBI.

You need to ensure that the events are propagated to EventStreamDBI.

What should you do?

- A. Create a read-only replica of DB1.
- B. Enable Extended Events for DB1.
- C. Enable change data capture (CDC) for DB1.
- D. Create an Azure Stream Analytics job.

**Antwort: C**

### 18. Frage

You have a Fabric workspace that contains an eventhouse and a KQL database named Database1. Database1 has the following:

A table named Table1

A table named Table2

An update policy named Policy1

Policy1 sends data from Table1 to Table2.

The following is a sample of the data in Table2.

□ Recently, the following actions were performed on Table1:

An additional element named temperature was added to the StreamData column.

The data type of the Timestamp column was changed to date.

The data type of the DeviceId column was changed to string.

You plan to load additional records to Table2.

Which two records will load from Table1 to Table2? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. ☐
- B. ☐
- C. ☐
- D. ☐

**Antwort: A,B**

Begründung:

Changes to Table1 Structure:

StreamData column: An additional temperature element was added.

Timestamp column: Data type changed from datetime to date.

DeviceId column: Data type changed from guid to string.

Impact of Changes:

Only records that comply with Table2's structure will load.

Records that deviate from Table2's column data types or structure will be rejected.

Record B:

Timestamp: Matches Table2 (datetime format).

DeviceId: Matches Table2 (guid format).

StreamData: Contains only the index and eventid, which matches Table2.

Accepted because it fully matches Table2's structure and data types.

Record D:

Timestamp: Matches Table2 (datetime format).

DeviceId: Matches Table2 (guid format).

StreamData: Matches Table2's structure.

Accepted because it fully matches Table2's structure and data types.

## 19. Frage

You have five Fabric workspaces.

You are monitoring the execution of items by using Monitoring hub.

You need to identify in which workspace a specific item runs.

Which column should you view in Monitoring hub?

- A. Activity name
- B. Submitter
- C. Location
- D. Job type
- E. Start time
- F. Item type
- G. Capacity

**Antwort: C**

Begründung:

To identify in which workspace a specific item runs in Monitoring hub, you should view the Location column. This column indicates the workspace where the item is executed. Since you have multiple workspaces and need to track the execution of items across them, the Location column will show you the exact workspace associated with each item or job execution.

## 20. Frage

You have a Fabric workspace that contains an eventhouse and a KQL database named Database1. Database1 has the following:

A table named Table1

A table named Table2

An update policy named Policy1

Policy1 sends data from Table1 to Table2.

The following is a sample of the data in Table2.

□ Recently, the following actions were performed on Table1:

An additional element named temperature was added to the StreamData column.

The data type of the Timestamp column was changed to date.

The data type of the DeviceId column was changed to string.

You plan to load additional records to Table2.

Which two records will load from Table1 to Table2? Each correct answer presents a complete solution.

NOTE: Each correct selection is worth one point.

- A. ☐
- B. ☐
- C. ☐
- D. ☐

**Antwort: B,D**

Begründung:

Changes to Table1 Structure:

StreamData column: An additional temperature element was added.

Timestamp column: Data type changed from datetime to date.

DeviceId column: Data type changed from guid to string.

Impact of Changes:

Only records that comply with Table2's structure will load.

Records that deviate from Table2's column data types or structure will be rejected.

Record B:

Timestamp: Matches Table2 (datetime format).

DeviceId: Matches Table2 (guid format).

StreamData: Contains only the index and eventid, which matches Table2.

Accepted because it fully matches Table2's structure and data types.

Record D:

Timestamp: Matches Table2 (datetime format).

DeviceId: Matches Table2 (guid format).

StreamData: Matches Table2's structure.

Accepted because it fully matches Table2's structure and data types.

## 21. Frage

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a Fabric eventstream that loads data into a table named Bike\_Location in a KQL database. The table contains the following columns:

You need to apply transformation and filter logic to prepare the data for consumption. The solution must return data for a neighbourhood named Sands End when No\_Bikes is at least 15. The results must be ordered by No\_Bikes in ascending order.

Solution: You use the following code segment:

Does this meet the goal?

- A. Yes
- B. no

**Antwort: B**

Begründung:

This code does not meet the goal because this is an SQL-like query and cannot be executed in KQL, which is required for the database.

Correct code should look like:

## 22. Frage

.....

Damit wir besser auf die derzeitigen Herausforderungen reagieren und Ihnen die Fragenkataloge zur Microsoft DP-700 Zertifizierungsprüfung von besserer Qualität bieten können, versuchen wir, unser Bestes zu tun, indem wir die IT-Elite Gruppe von PrüfungFrage verändern und die Testaufgaben von der Microsoft DP-700 Zertifizierungsprüfung rechtzeitig aktualisieren. Unser Ziel liegt darin, dass Sie die Microsoft DP-700 Zertifizierungsprüfung in kürzester Zeit leicht bestehen können. Bevor Sie unsere Prüfungsmaterialien kaufen, können Sie ein paar kostenlose Prüfungsfragen und Antworten herunterladen und proben.
