

# Huawei - H12-891\_V1.0 - Marvelous Exam HCIE-Datacom V1.0 Outline

## How Can I Prepare for the Huawei HCIE-Datacom V1.0 H12-891\_V1.0 Exam?

The H12-891\_V1.0, also known as the HCIE-Datacom V1.0 Exam, is an important test for people who want to prove they know a lot about data communication technologies in the Huawei system. This test covers many areas, like how to design advanced networks, manage routing and switching technologies, handle network security, work with virtualization and cloud integration, and make sure the Quality of Service (QoS) is good. The [HCIE-Datacom V1.0](#) certification is increasingly becoming a key differentiator for networking professionals. People who want to take this test need to not only know the theory but also show they can use their knowledge to solve real problems in data communication.

Getting certified with HCIE-Datacom V1.0 is becoming really important for people who work with computer networks. Nowadays, companies want employees who not only study the topic but also have experience dealing with the challenges of modern data communication. Since having a reliable and secure network is crucial for a company to work well, having a certification like HCIE-Datacom V1.0 puts you in a good position to meet the needs of the industry. With this certification, you can choose from different careers, like designing networks, managing them, or using new technology to make networks more secure and perform better.

More and more businesses in different industries, such as telecommunications, finance are using Huawei technologies. They see the value in having experts who know how to make data communication work better in the digital age. Because of this, there is a growing demand for professionals with HCIE-Datacom certification. This certification not only shows that you have the skills but also fits with what the industry needs now and in the future. So, it's a valuable thing to have if you want to move forward in your career in data communication.

2026 Latest Prep4King H12-891\_V1.0 PDF Dumps and H12-891\_V1.0 Exam Engine Free Share: [https://drive.google.com/open?id=1\\_bLuX\\_RC00StG7ITAVtfzOIFq-gEptfA](https://drive.google.com/open?id=1_bLuX_RC00StG7ITAVtfzOIFq-gEptfA)

In order to facilitate the user's offline reading, the H12-891\_V1.0 study braindumps can better use the time of debris to learn, especially to develop PDF mode for users. In this mode, users can know the H12-891\_V1.0 prep guide inside the learning materials to download and print, easy to take notes on the paper, and weak link of their memory, at the same time, every user can be downloaded unlimited number of learning, greatly improve the efficiency of the users with our H12-891\_V1.0 Exam Questions. Besides that, the H12-891\_V1.0 exam questions in PDF version is quite portable.

Huawei H12-891\_V1.0 (HCIE-Datacom V1.0) Certification Exam consists of a written exam and a lab exam. The written exam tests candidates on their theoretical knowledge of data communication technologies, including network design principles, protocols, and technologies. The lab exam tests candidates on their practical skills in designing, deploying, and troubleshooting data communication networks using Huawei's networking equipment and technologies. Successful candidates are awarded the HCIE-Datacom V1.0 certification, which is recognized globally as a mark of expertise in data communication technologies and enhances career prospects in the field.

Upon passing the Huawei H12-891\_V1.0 (HCIE-Datacom V1.0) certification exam, candidates will join the elite group of certified professionals who have demonstrated their expertise in data communication networks. They will have the skills and knowledge to design, implement, and manage complex data communication networks, which will help them advance their careers in the ICT industry.

Huawei H12-891\_V1.0 (HCIE-Datacom V1.0) certification exam is a globally recognized certification program that validates the skills and knowledge required to design, implement, and troubleshoot complex data communication networks. HCIE-Datacom V1.0 certification exam covers a wide range of topics related to data communication, including network architecture, protocols, security,

and virtualization. HCIE-Datacom V1.0 certification exam is an essential credential for professionals who want to advance in their careers in the field of data communication.

## Cost Effective H12-891\_V1.0 Dumps & H12-891\_V1.0 Reliable Exam Questions

We provide 24-hours online customer service which replies the client's questions and doubts about our H12-891\_V1.0 training quiz and solve their problems. Our professional personnel provide long-distance assistance online. If the clients can't pass the H12-891\_V1.0 Exam we will refund them immediately in full at one time. So there is nothing to worry about our H12-891\_V1.0 exam questions. And it is totally safe to buy our H12-891\_V1.0 learning guide.

### Huawei HCIE-Datacom V1.0 Sample Questions (Q65-Q70):

#### NEW QUESTION # 65

How do 8021w and 8021D handle BPDUs?( Confirmed) The

- A. The 8021D bridge does not forward BPDU messages
- B. The 8021w bridge forwards only BPDU packets received from the root bridge
- **C. 8021D bridge only forwards BPDU packets received from the root bridge**
- D. 8021w Bridge does not forward BPDU packet

**Answer: C**

#### NEW QUESTION # 66

The interface Serial0 of an existing router is in OSPF area 1, and the interface Serial0 is set to Silent interface. So what kind of impact will this setting have

- **A. OSPF does not establish any neighboring relationships through this interface**
- B. OSPF does not add routes learned from the interface to the local routing table
- C. OSPF establishes available adjacencies through this interface
- D. OSPF receives routing updates from neighbors

**Answer: A**

#### NEW QUESTION # 67

As shown in the following figure, OSPF is deployed on a campus network to implement network interconnection, and Area 1 is deployed as an NSSA. To enable R1 to access R4's loopback interface address, an engineer imports a direct route to R4's OSPF process. Which of the following statements about this scenario are correct?

```
[R4-ospf-1] import-route direct
```

```
Loopback0: 10.1.4.4/32
```

- A. R4 is an ASBR in the NSSA and generates Type 7 LSAs carrying the default route information.
- **B. R4 is an ASBR in the NSSA and generates Type 7 LSAs to describe external routes.**
- **C. R2 is an ABR and translates Type 7 LSAs that describe external routes into Type 5 LSAs.**
- D. R2 is an ABR and translates Type 7 LSAs carrying the default route information into Type 5 LSAs.

**Answer: B,C**

Explanation:

In OSPF:

An NSSA (Not-So-Stubby Area) allows external route injection via Type 7 LSAs.

These Type 7 LSAs are generated by ASBRs inside the NSSA (R4 in this case) when external or direct routes are imported.

ABRs (such as R2) between the NSSA and backbone translate Type 7 LSAs into Type 5 LSAs for flooding into other areas.

Clarification of options:

A: Incorrect - default route is not involved here; it's a specific route (10.1.4.4/32).

B: Correct - R2 translates Type 7 LSAs into Type 5.  
C: Incorrect - default route is not being advertised.  
D: Correct - R4 imports a direct route and generates Type 7 LSAs for it.  
Correct answers: B, D

### NEW QUESTION # 68

Which of the following statements about configuring user access authentication is incorrect?

- A. You can configure an 802.1X access profile, a MAC access profile, a Portal access profile, or a multi-mode authentication profile based on the actual authentication requirements on the network.
- **B. You need to bind an access profile to an authentication profile to specify the user authentication mode. Then, apply the authentication profile to an interface to enable network access control.**
- C. To implement network access control on users, you need to determine the domains to which they belong and the AAA schemes that they use.
- D. If the RADIUS or HWTACACS server is used for authentication, you need to configure parameters for interconnection with the authentication server in the AAA scheme.

**Answer: B**

Explanation:

Huawei's user access authentication configuration includes the following components:

AAA scheme: Defines how users are authenticated (local, RADIUS, HWTACACS, etc.).

Domain: Groups users and associates them with an AAA scheme.

Access profile: Defines access control rules like 802.1X, MAC, Portal, or multi-mode authentication.

Correct workflow:

Bind the authentication profile (which references the access profile) to the user access interface.

Not the other way around.

Incorrect statement:

D. It incorrectly states you bind the access profile to the authentication profile, when in fact, the authentication profile binds the access profile and is applied to the interface.

Correct answer: D

### NEW QUESTION # 69

Network administrator A wants to view the BGP peer status of R2. The BGP peer status of R2 is shown in this figure. Obtain the following information: R2 resides in AS \_\_\_\_\_ (Enter only digits. Do not add punctuations or spaces.)

**Answer:**

Explanation:

102 From the command output: [R2] display bgp group in Remote AS: 102... Type: internal... Peer Members:

10.1.3.3 4 102 10.1.4.4 4 102 10.1.5.5 4 102 Key indicators: "Remote AS: 102" "Type: internal"- This tells us that the BGP session is iBGP. In iBGP, both the local and remote routers are in the same AS. Since all remote peers (10.1.3.3, 10.1.4.4, 10.1.5.5) are in AS 102, and the session type is internal, that means R2 must also be in AS 102.

Correct answer: 102 In Huawei BGP implementation: If the BGP peer type is "internal", the local router and peer router are in the same AS. The Remote AS shown in the display bgp group command refers to the AS number configured for the peer. Since the session type is internal, the local AS = remote AS.

### NEW QUESTION # 70

.....

A lot of students have used our product and prepared successfully for the test. Every user has rated study material positively and

passed the H12-891\_V1.0 Exam. Prep4King gives a guarantee to the customers that if they fail to pass the HCIE-Datacom V1.0 (H12-891\_V1.0) certification on the very first try despite all their efforts they can claim their money back according to terms and conditions. A team of experts is working day and night in order to make the product successful day by day and provide the customers with the best experience.
