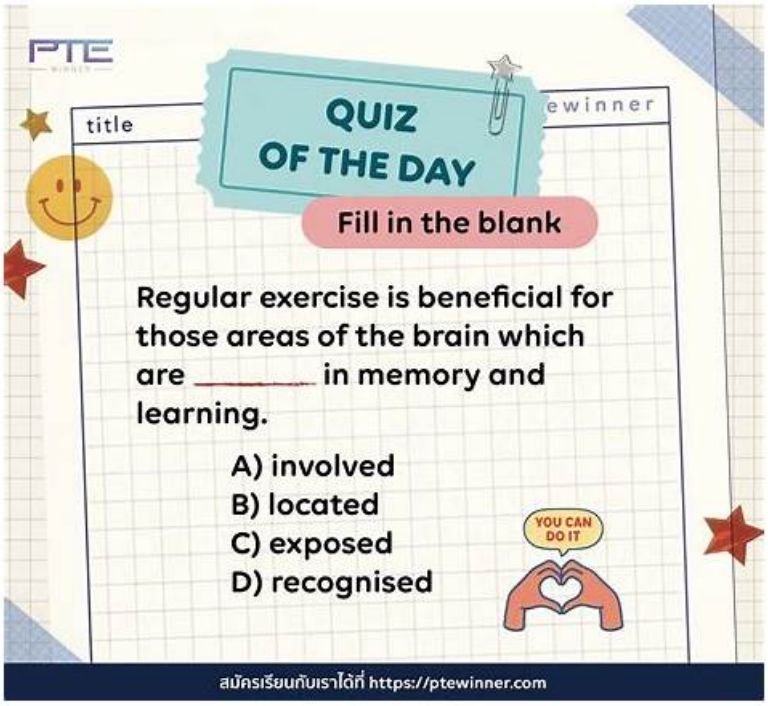
Exam PT0-003 Score | Latest PT0-003 Exam Answers



BTW, DOWNLOAD part of PassExamDumps PT0-003 dumps from Cloud Storage: https://drive.google.com/open?id=1yuHSdumnpMfhU-YBK9UEm2_1LTsZQW5n

One of the great features of our PT0-003 training material is our PT0-003 pdf questions. PT0-003 exam questions allow you to prepare for the real PT0-003 exam and will help you with the self-assessment. You can easily pass the CompTIA PT0-003 exam by using PT0-003 dumps pdf. Moreover, you will get all the updated PT0-003 Questions with verified answers. If you want to prepare yourself for the real CompTIA PenTest+ Exam exam, then it is one of the most important ways to improve your PT0-003 preparation level. We provide 100% money back guarantee on all PT0-003 braindumps products.

Without a doubt, there is one thing that can assist them with perceiving this interest and clearing their CompTIA PenTest+ Exam (PT0-003) exam with flying colors. CompTIA PT0-003 dumps merge all that gigantic and the competitor doesn't require to purchase the aide or different books to review. They have this test material and need nothing else for planning CompTIA PenTest+ Exam exam.

Latest PT0-003 Exam Answers, PT0-003 Reliable Test Review

The Channel Partner Program CompTIA PenTest+ Exam PT0-003 certification is a valuable credential earned by individuals to validate their skills and competence to perform certain job tasks. Your CompTIA PenTest+ Exam PT0-003 Certification is usually displayed as proof that you've been trained, educated, and prepared to meet the specific requirement for your professional role.

CompTIA PenTest+ Exam Sample Questions (Q252-Q257):

NEW QUESTION # 252
A penetration tester is cleaning up and covering tracks at the conclusion of a penetration test. Which of the following should the tester be sure to remove from the system? (Choose two.)

- A. Created user accounts
- B. Administrator accounts
- C. Reboot system
- D. ARP cache
- E. Spawned shells

- F. Server logs

Answer: A,E

Explanation:
Removing shells: Remove any shell programs installed when performing
the pentest.
Removing tester-created credentials: Be sure to remove any user accounts created during the pentest. This includes backdoor accounts.
Removing tools: Remove any software tools that were installed on the
customer's systems that were used to aid in the exploitation of systems.

NEW QUESTION # 253
Which of the following elements of a penetration test report can be used to most effectively prioritize the remediation efforts for all the findings?

- A. Risk score
- B. Executive summary
- C. Detailed findings list
- D. Methodology

Answer: A

Explanation:
Risk scores quantify the severity and likelihood of exploitation for each finding. This helps organizations prioritize which vulnerabilities to remediate first based on potential impact and exploitability.
* Methodology outlines how the test was performed.
* Findings list shows issues, but without prioritization.
* Executive summary provides a high-level overview for decision-makers, not technical prioritization.

NEW QUESTION # 254
With one day left to complete the testing phase of an engagement, a penetration tester obtains the following results from an Nmap scan:
Not shown: 1670 closed ports
PORT STATE SERVICE VERSION
80/tcp open http Apache httpd 2.2.3 (CentOS)
3306/tcp open mysql MySQL (unauthorized)
8888/tcp open http lighttpd 1.4.32
Which of the following tools should the tester use to quickly identify a potential attack path?

- A. BeEF
- B. SearchSploit
- C. msfvenom
- D. sqlmap

Answer: B

Explanation:
* SearchSploit is a command-line interface for Exploit-DB that allows testers to quickly search for known exploits based on software name and version.
* With Apache 2.2.3, lighttpd 1.4.32, and MySQL, the tester can plug these into SearchSploit to identify vulnerabilities, matching the goal of finding quick attack paths with limited time.
Other tools:
* msfvenom: Payload generator, not a search tool.
* sqlmap: SQLi exploitation tool, useful for web apps with SQLi, but requires validation of such a vuln first.
* BeEF: Browser exploitation framework, not relevant here.
CompTIA PenTest+ Reference:
* PT0-003 Objective 2.2 & 2.5: Exploit and identify attack paths.
* SearchSploit and Exploit-DB usage are recommended tools in CompTIA's resources.

NEW QUESTION # 255
A tester is finishing an engagement and needs to ensure that artifacts resulting from the test are safely handled. Which of the following is the best procedure for maintaining client data privacy?

- A. Remove configuration changes and any tools deployed to compromised systems.
- B. Search through configuration files changed for sensitive credentials and remove them.
- C. Securely destroy or remove all engagement-related data from testing systems.
- D. Shut down C2 and attacker infrastructure on premises and in the cloud.

Answer: C

Explanation:
At the end of a penetration test, handling sensitive data properly ensures compliance with legal, regulatory, and ethical guidelines.
Securely destroy or remove all engagement-related data (Option B):
Ensures confidentiality of test results.
Prevents unauthorized access to client information.
Methods include secure wiping tools (shred, sdelete), and encrypted storage deletion.
Reference: CompTIA PenTest+ PT0-003 Official Study Guide - "Post-Engagement Data Handling" Incorrect options:
Option A (Remove configuration changes): Necessary but does not ensure complete data destruction.
Option C (Search for sensitive credentials): Important but does not address all artifacts.
Option D (Shut down C2 infrastructure): Important for OPSEC but does not address client data privacy.

NEW QUESTION # 256
A company's incident response team determines that a breach occurred because a penetration tester left a web shell. Which of the following should the penetration tester have done after the engagement?

- A. Revert configuration changes made during the engagement
- B. Remove utilized persistence mechanisms on client systems
- C. Turn off command-and-control infrastructure
- D. Enable a host-based firewall on the machine

Answer: B

Explanation:
Comprehensive and Detailed Explanation:
The immediate and mandatory post-engagement action after completing an authorized penetration test is to remove any accounts, implants, backdoors, web shells, scheduled tasks, or other persistence mechanisms that were created or used during the test. Leaving persistence (a web shell in this case) is exactly what caused the breach and is an unacceptable post-test lapse.
Why B is correct:
* Persistence mechanisms provide continued unauthorized access and are a direct security risk if not removed. Removing them returns the environment to its pre-test security posture and prevents later compromise by third parties.
* Removal of persistence is a standard requirement in rules of engagement and in post-test cleanup checklists.
Why the other answers are incomplete or secondary:
* A. Enable a host-based firewall on the machine - a reasonable defensive step if missing, but it does not replace removing the persistence that was the cause of the breach.
* C. Revert configuration changes made during the engagement - also important and should be done, but the highest priority is removing active persistence that gives access. (Both B and C are valid cleanup activities; B is the single best answer given the question.)
* D. Turn off command-and-control infrastructure - this is appropriate for the tester's own infrastructure, but the critical action on the client side is removing client-side persistence. Also, turning off C2 after the test is expected, but will not remediate the remaining web shell on the client.
CompTIA PT0-003 Mapping:
* Domain 5.0 Reporting and Communication - post-engagement cleanup and handoff (remediation actions, removal of test artifacts, maintaining chain of custody and evidence, and returning environment to agreed baseline).

NEW QUESTION # 257
.....

Are you organized for this? Do you want to end up a CompTIA certified? In case your answer is high great then we guarantee you that you are on the right region. Check in yourself for CompTIA PenTest+ Exam (PT0-003) certification examination and download the PT0-003 exam questions and begin preparation right now.
