Prepare Exam With Latest VMware 2V0-16.25 Exam Questions
If you are determined to purchase our 2V0-16.25 valid exam collection materials for your companies, if you pursue long-term cooperation with site, we will have some relate policy. Firstly we provide one-year service warranty for every buyer who purchased 2V0-16.25 valid exam collection materials. Every buyer can share one year free updates and preparation assist. Secondly if you want to get the free updates not just for one year, you want to still get the new version of VMware 2V0-16.25 valid exam collection materials after one year, you share 50% discount for the second year.

VMware 2V0-16.25 Exam Syllabus Topics:

Topic	Details
Topic 1	• Troubleshoot and Optimize the VMware Solution: This section of the exam measures the ability of Systems Engineers to troubleshoot and optimize VMware-based environments. While no explicit testable objectives are listed, candidates are expected to apply their problem-solving skills to diagnose, resolve, and enhance VMware solutions for improved reliability and performance.
Topic 2	• Plan and Design the VMware by Broadcom Solution: This section of the exam measures the ability of VMware Solution Architects to plan and design solutions. While there are no specific testable objectives included, the focus is on preparing professionals to design VMware-based solutions that align with organizational goals and best practices.
Topic 3	• Deploy, Configure, and Operate VMware vSphere Foundation (VVF): This section of the exam measures the expertise of Data Center Administrators and emphasizes hands-on skills in deploying and configuring VMware vSphere Foundation environments. Candidates must understand the components of a VVF deployment, configure Supervisors within clusters, and manage identity, access control, licensing, and certificate management. The objectives also extend to lifecycle management within the vSphere Foundation. Furthermore, it explores operational tasks including monitoring and analyzing logs, configuring alerting, managing dashboards, and integrating with VMware Cloud Foundation (VCF) Operations. Candidates will also be tested on cost and pricing configuration, compliance monitoring, and security hardening practices. Finally, automation skills are validated through deploying services with Supervisors, running Kubernetes workloads, using VM services, and integrating VCF Operations Orchestrator to support enterprise automation.

Topic 4	• IT Architectures, Technologies, Standards: This section of the exam measures the understanding of IT Infrastructure Architects and covers foundational concepts of architectures, emerging technologies, and industry standards. Although no testable objectives are listed here, it establishes the baseline knowledge needed to interpret and design VMware-related environments effectively.
Topic 5	• VMware vSphere Foundation Fundamentals: This section of the exam measures the skills of Virtualization Engineers and focuses on the essentials of virtualization technology. It introduces the principles of virtualization, explores use cases, and highlights the value it brings to businesses. Candidates are expected to demonstrate knowledge of VMware compute components such as vCenter and ESX, cluster configuration, and lifecycle management of virtual machines. It also covers secure workload operations, encryption, and managing resources with content libraries. In addition, storage fundamentals are examined through configuring vSphere storage, deploying VMware vSAN clusters, defining storage policies, and ensuring data availability. Networking fundamentals are also introduced, requiring the ability to differentiate between VMware vSphere networking components.

Remarkable 2V0-16.25 Exam Materials: VMware vSphere Foundation 9.0 Administrator Demonstrate the Most Helpful Learning Dumps - Actual4Dumps

We have harmonious cooperation with exam candidates. The relation comes from the excellence of our 2V0-16.25 training materials. We never avoid our responsibility of offering help for exam candidates like you, so choosing our 2V0-16.25 practice dumps means you choose success. Moreover, without the needs of waiting, you can download the 2V0-16.25 Study Guide after paying for it immediately. And we have patient and enthusiastic staff offering help on our 2V0-16.25 learning prep.

VMware vSphere Foundation 9.0 Administrator Sample Questions (Q48-Q53):

NEW QUESTION # 48
An administrator is tasked with deploying a VMware Cloud Foundation (VCF) Operations for Logs appliance into vSphere Foundation.
After downloading the .ova, which component does the administrator use to deploy the file?

- A. VCF Operations
- B. vSphere Client
- C. VCF Automation
- D. VCF Fleet Management

Answer: B

Explanation:
To deploy the VCF Operations for Logs OVA appliance:
* The vSphere Client is used to deploy .ova and .ovf templates directly into a vCenter environment.
* After deployment, the appliance can be configured and integrated with VCF.
Other options:
* A. VCF Fleet Management# Used for multi-instance management, not OVA deployment.
* C. VCF Automation# Provides automation workflows, not appliance deployment.
* D. VCF Operations# Monitoring and analytics platform, not used for OVA installs.
References:
VMware Cloud Foundation 9.0 -Deploying VCF Operations for Logs Appliance VMware Docs: Deploy OVF/OVA Templates Using vSphere Client

NEW QUESTION # 49
An administrator is tasked to configure shared storage for a VMware vSphere Foundation (VVF) cluster at a remote location.

The following is available at the remote location:
* Two ESX servers.
* Two 1GbE network cards per ESX.
* One sixteen port 1GbE Switch.
* One NVMe per ESX for the Operating System.
* One storage system supporting network and fiber channel capabilities.
What storage protocol must the administrator use at the remote location?

- A. Local Storage
- B. NFS
- C. Fiber Channel
- D. vSAN

Answer: B

Explanation:
The scenario:
* Remote sitewith 2 ESXi servers, 1GbE networking only.
* Storage system supports both network (NAS/iSCSI/NFS) and Fiber Channel.
* Fiber Channel is not feasible (no FC switches/HBAs).
* vSAN requires more than 2 nodes (minimum 3 for standard vSAN, 2+Witness for 2-node), not mentioned here.
The most suitable solution:
* UseNFS storage over 1GbE. (D)
* Provides shared storage accessible to both ESXi hosts.
Other options:
* A. vSAN# Needs 3+ nodes or a witness, not supported in this config.
* B. Local storage# Not shared, fails HA/DRS requirements.
* C. Fiber Channel# Requires HBAs and FC switch, not available.

NEW QUESTION # 50
An administrator has licensed vSphere components in Connected mode and then switched to Disconnected mode to meet the company security restrictions, which cannot be violated.
What must the administrator do to ensure the VMware vSphere Foundation license remains valid?

- A. Nothing. The license is perpetual.
- B. Manually exchange a registration and license file between the VCF Operations instance and the VCF Business Services console at least once every 180 days.
- C. Switch to Connected mode, validate that VCF Operations has downloaded a new license file from VCF Business Services console, and then switch to Disconnected mode at least once every 365 days.
- D. Provide an internet connection to VCF Operations, then download a new license file from the VCF Business Services console at least once every 180 days.

Answer: B

Explanation:
ForDisconnected mode licensingin vSphere Foundation:
* Administrators must manuallyexport a registration file, upload it to theVCF Business Services console, and thenimport the license fileback into VCF Operations.
* This process must be repeatedevery 180 daysto maintain license validity.
Other options:
* A. Switch to Connected mode once every 365 days# Incorrect; 180-day requirement.
* C. License is perpetual# Not correct; subscription-based license requires refresh.
* D. Provide internet connection every 180 days# Violates security restriction (Disconnected mode is required).

NEW QUESTION # 51
An administrator is tasked to optimize storage utilization in an existing VMware vSAN Original Storage Architecture (OSA) cluster.
The cluster has the following configuration:
* Eight-node cluster with 1 disk group per node.
* Virtual machines (VMs) are configured with 1 failure - RAID-1 storage policy.
* Storage utilization is at 70%.
Which action can the administrator take to reduce the existing storage utilization with the minimum impact to the cluster?

- A. Change the storage policy to 2 failure - RAID-6.
- B. Enable Compression only on the cluster.
- C. Enable Deduplication and Compression on the cluster.
- D. Change the storage policy to 3 failure - RAID-1.

Answer: A

Explanation:
In avSAN Original Storage Architecture (OSA)cluster, the choice of storage policy directly impacts storage efficiency and resilience:
* Current Setup:
* Eight-node cluster, 1 disk group per node.
* VMs are usingFTT=1 RAID-1 (mirroring)policy.
* Storage utilization is already at70%.
* RAID-1 (Mirroring):
* Each piece of data is mirrored, requiring2x storage capacity.
* Space efficiency ~50%.
* RAID-6 (Erasure Coding, FTT=2):
* Requires a minimum of6 hosts, satisfied here with 8.
* Uses erasure coding instead of full mirroring, giving ~67% space efficiency.
* Provides resilience against2 host failureswhile using less space than RAID-1.
Thus, switching fromRAID-1 FTT=1toRAID-6 FTT=2reduces overall storage utilization while still improving resilience.
Why not the other options?
* A. Enable Deduplication and Compression##In OSA, enabling this requires acluster-wide disk group reformat, which is disruptive and not the minimal impact choice.
* B. Change policy to 3 failure - RAID-1##Increases redundancy but consumesmuch more capacity, worsening utilization.
* C. Enable Compression only##Not available in OSA (only in ESA). OSA supportsdeduplication + compression together, not compression-only.
* D. Change to 2 failure - RAID-6##Meets resilience requirements,reduces storage usage, and is supported on 8-node OSA clusters.

NEW QUESTION # 52
Which component must be added after an initial deployment of VMware vSphere Foundation (VVF) to provide a central location for logs collection?

- A. VCF Operations
- B. Fleet Manager
- C. VCF Operations for Networks
- D. VCF Operations for Logs

Answer: D

Explanation:
After deployingvSphere Foundation, to centralizelog collection and analysis, you must add:
* VCF Operations for Logs, which provides log ingestion, alerting, and centralized troubleshooting.
Other options:
* B. VCF Operations# Focuses on performance/capacity, not log collection.
* C. VCF Operations for Networks# Focuses on networking insights.

* D. Fleet Manager# Used for multi-instance management, not logging.
