

# GIAC GICSP Examcollection Dumps | New GICSP Test Pdf

Our GICSP practice materials made them enlightened and motivated to pass the exam within one week, which is true that someone did it always. The number is real proving of our GICSP exam questions rather than spurious made-up lies. And you can also see the comments on the website to see how our loyal customers felt about our GICSP training guide. They all highly praised our GICSP learning prep and got their certification. So will you!

As we know that thousands of people put a premium on obtaining GICSP certifications to prove their ability. With the difficulties and inconveniences existing for many groups of people like white-collar worker, getting a GICSP certification may be draining. Therefore, choosing a proper GICSP exam guide can pave the path for you which is also conducive to gain the certification efficiently. So why should people choose us? Because the high pass rate of our GICSP Latest Practice Materials is more than 98% and you will pass the GICSP exam easily to get the dreaming certification.

## Global Industrial Cyber Security Professional (GICSP) Latest Pdf Material & GICSP Valid Practice Files & Global Industrial Cyber Security Professional (GICSP) Updated Study Guide

Our career is inextricably linked with your development at least in the GICSP practice exam's perspective. So we try to emulate with the best from the start until we are now. So as the most professional company of GICSP study dumps in this area, we are dependable and reliable. We maintain the tenet of customer's orientation. If you hold any questions about our GICSP Exam Prep, our staff will solve them for you 24/7. It is our duty and honor to offer help.

### GIAC Global Industrial Cyber Security Professional (GICSP) Sample Questions (Q78-Q83):

#### NEW QUESTION # 78

What is the main function of level 0 in the Purdue Reference Architecture for ICS?

Response:

- A. Control and sensing of physical processes
- B. Data storage and backup
- C. Human-Machine Interfaces (HMIs)
- D. Business planning and logistics

Answer: A

#### NEW QUESTION # 79

An organization has their ICS operations and networking equipment installed in the Purdue model level 3.

Where should the SIEM for this equipment be placed in relation to the existing Level 3 devices?

- **A. On a management subnet in Level 4**
- B. On a management subnet in Level 2
- C. On a different subnet in Level 3
- D. On the same subnet in Level 3

**Answer: A**

Explanation:

According to the Purdue model and best practices outlined in GICSP, Level 4 corresponds to the enterprise or business network, often containing management and security monitoring infrastructure such as Security Information and Event Management (SIEM) systems.

Placing the SIEM on a management subnet in Level 4 (B) keeps monitoring tools separated from the operational control network (Level 3), reducing the risk that a compromised Level 3 device could affect the security infrastructure itself. It also allows the SIEM to collect logs from multiple network segments securely and apply enterprise-wide analysis.

This segregation supports defense-in-depth and aligns with GICSP's emphasis on secure network segmentation and monitoring.

#### **NEW QUESTION # 80**

Which command can be used on a Linux system to search a file for a string of data and return the results to the screen?

- A. tail
- B. cat
- **C. grep**
- D. type

**Answer: C**

Explanation:

Comprehensive and Detailed Explanation From Exact Extract:

The grep command (C) is a powerful and widely used Linux utility for searching text or data patterns within files and returning matching lines to the screen. It supports regular expressions, making it flexible for complex searches.

type (A) displays the kind of command (shell builtin, file, alias).

cat (B) outputs entire file contents but does not search.

tail (D) shows the last lines of a file but also does not perform searches.

In ICS security and forensic investigations (covered in GICSP), grep is essential for quickly finding relevant log entries or configuration data.

#### **NEW QUESTION # 81**

What is the benefit of applying patches and updates to endpoints in an ICS environment?

Response:

- **A. It fixes known vulnerabilities and improves security**
- B. It enhances user experience
- C. It ensures compatibility with legacy systems
- D. It improves device aesthetics

**Answer: A**

#### **NEW QUESTION # 82**

Which of the following is a containment task within the six step incident handling process?

- A. Creating a forensic image of a compromised workstation
- **B. Re-imaging a workstation that was exhibiting worm-like behaviour**
- C. Validate fix using a vulnerability scan of the hosts within the DMZ
- D. Checking to ensure that the most recent patches were deployed to a web application server

**Answer: B**

Explanation:

Containment in incident handling involves limiting the damage caused by an incident and preventing its spread.

Re-imaging a compromised workstation (C) is a direct containment action to remove malicious software and restore system integrity.

(A) Patch verification and (D) validation scans are part of recovery or prevention phases.

(B) Creating forensic images is an evidence preservation task, not containment.

The GICSP incident handling process emphasizes containment as an immediate action to stabilize the environment before eradication and recovery.
