

# 1Z0-1195-25 Free Brain Dumps & 1Z0-1195-25 Review Guide

DOWNLOAD the newest ValidDumps 1Z0-1195-25 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1iGtYdd6y2Y8pQFOh4ywBlazWForCauJ9>

The price of our 1Z0-1195-25 learning guide is among the range which you can afford and after you use our 1Z0-1195-25 study materials you will certainly feel that the value of the 1Z0-1195-25 exam questions far exceed the amount of the money you pay for the pass rate of our practice quiz is 98% to 100% which is unmatched in the market. Choosing our 1Z0-1195-25 Study Guide equals choosing the success and the perfect service.

## Oracle 1Z0-1195-25 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"><li>Autonomous Database and Tools: This section evaluates the expertise of Database Administrators and Cloud Engineers in working with Oracle Autonomous Database (ADB). It includes provisioning ADB instances, scaling CPU and storage, starting and stopping databases, and using tools to load data into ADB effectively.</li></ul>

Topic 2	<ul style="list-style-type: none"> <li>Upgrades and Migrations: This section tests the knowledge of Migration Specialists and Cloud Architects in planning cloud migrations. It includes various migration strategies to OCI, as well as upgrade options for transitioning existing databases to newer versions or cloud environments.</li> </ul>
Topic 3	<ul style="list-style-type: none"> <li>Developing on Oracle Database: This section measures the skills of Application Developers and DevOps Engineers in managing Autonomous Databases using REST APIs, Oracle's data toolset, low-code development with APEX, and CI</li> <li>CD processes for database tools and APEX applications.</li> </ul>
Topic 4	<ul style="list-style-type: none"> <li>MySQL and NoSQL: This section measures the skills of Database Developers and Data Engineers in working with Oracle MySQL HeatWave Database Service. It focuses on their features and uses cases for modern application development.</li> </ul>
Topic 5	<ul style="list-style-type: none"> <li>Resiliency: This section tests the knowledge of Database Security Engineers and Disaster Recovery Specialists in implementing Oracle's Maximum Security Architecture and Maximum Availability Architecture to ensure database resiliency and high availability.</li> </ul>
Topic 6	<ul style="list-style-type: none"> <li>Data Lake, Data Warehouse, and Machine Learning: This section evaluates the expertise of Data Scientists and Big Data Engineers in understanding UCI's Data Lakehouse architecture, Oracle Machine Learning capabilities, and Data Mesh architecture for managing distributed data environments.</li> </ul>
Topic 7	<ul style="list-style-type: none"> <li>Converged Database: This section evaluates the expertise of Multi-Model Database Specialists and Application Developers in using Oracle's converged database for multi-model use cases. It covers JSON, graph, and spatial data capabilities within the Oracle Database.</li> </ul>

## Oracle 1Z0-1195-25 Free Brain Dumps Exam Pass For Sure | 1Z0-1195-25: Oracle Data Platform 2025 Foundations Associate

One of the key factors for passing the exam is practice. Candidates must use 1Z0-1195-25 practice test material to be able to perform at their best on the real exam. This is why ValidDumps has developed three formats to assist candidates in their 1Z0-1195-25 Preparation. These formats include desktop-based 1Z0-1195-25 practice test software, web-based practice test, and a PDF format.

### Oracle Data Platform 2025 Foundations Associate Sample Questions (Q45-Q50):

#### NEW QUESTION # 45

Which tool is provided to support Continuous Integration/Continuous Delivery (CI/CD) workflows?

- A. SQLcl (including Liquibase)
- B. ADB console (including Performance Hub)
- C. SQL Developer (including ADB wallet)
- D. Database Actions (including real-time SQL monitor)

**Answer: A**

Explanation:

"SQLcl (including Liquibase)" (D) is the tool provided to support CI/CD workflows. SQLcl integrates with Liquibase to track, version, and deploy database schema changes, aligning with CI/CD pipelines. "ADB console" (A) is for monitoring, "Database Actions" (B) is for SQL tasks, and "SQL Developer" (C) is a GUI tool, none of which are CI/CD-focused. Oracle's documentation highlights SQLcl's Liquibase integration for DevOps workflows.

#### NEW QUESTION # 46

Which two actions can be performed from the OCI Console for an Oracle Autonomous Database?

- A. Scale up/down Memory
- **B. Scale up/down CPU**
- **C. Increase Storage allocated for Database**
- D. Increase Network Bandwidth

**Answer: B,C**

Explanation:

From the OCI Console for an "Oracle Autonomous Database," you can "Scale up/down CPU" (A) to adjust compute resources dynamically and "Increase Storage allocated for Database" (D) to expand capacity, both with no downtime. "Increase Network Bandwidth" (B) is not a console-adjustable parameter (managed by Oracle), and "Scale up/down Memory" (C) is not independently configurable (tied to CPU scaling). Oracle's documentation confirms CPU and storage scaling as user-controlled actions.

#### NEW QUESTION # 47

Which deployment option provides the highest degree of security and governance while providing a completely self-service database experience?

- **A. Oracle Autonomous Database**
- B. Oracle MySQL Database Service
- C. Oracle Database Cloud Service
- D. Exadata Cloud Service

**Answer: A**

Explanation:

The "Oracle Autonomous Database" (B) offers the highest degree of security and governance with a self-service experience. It includes automated security features (e.g., TDE, network encryption), self-patching, and fine-grained access controls, all managed by Oracle, while allowing users to provision and manage databases independently. "Exadata Cloud Service" (A) provides high performance but requires more manual oversight. "Oracle Database Cloud Service" (C) offers flexibility but less automation, and "Oracle MySQL Database Service" (D) lacks the same level of autonomous security. Oracle's documentation positions Autonomous Database as the pinnacle of secure, self-service deployment.

#### NEW QUESTION # 48

Which component is NOT included as part of an Oracle NoSQL table Oracle Cloud Identifier (OCID)?

- A. Unique ID
- **B. Region**
- C. Compartment ID
- D. Resource type

**Answer: B**

#### NEW QUESTION # 49

What connections to multiple public clouds are provided through 3rd party connectivity?

- A. Virtual Cloud Networks (VCNs) and Amazon Virtual Private Cloud (VPC)
- B. Layer 3 and FastConnect
- **C. Megaport Cloud Router (MCR) and Virtual Cross Connect (VXC)**
- D. FastConnect and Direct Connect (SCC)

**Answer: C**

Explanation:

For connections to multiple public clouds via 3rd-party connectivity, Oracle supports "Megaport Cloud Router (MCR) and Virtual Cross Connect (VXC)" (C). Megaport provides a cloud router and virtual cross-connects to link OCI with other clouds (e.g., AWS, Azure) through a global network. "Layer 3 and FastConnect" (A) is incomplete, "VCNs and Amazon VPC" (B) are internal

### NEW QUESTION # 50
