JN0-105 Premium Files & New JN0-105 Test Bootcamp

Many candidates failed exam before. They have no confidence for next exam and they also hesitate if they have to purchase valid JN0-105 brain dumps materials or if dumps are actually valid. Now I advise you download our free demo before you are determined to buy. Our free demo is a little of the real test, you can see several questions answers and explanations. You will know the validity of Juniper JN0-105 Brain Dumps materials.

Juniper JN0-105 Exam Syllabus Topics:

Topic	Details

Topic 1	<ul style="list-style-type: none"> • Networking Fundamentals: The topic networking fundamentals covers identifying the concepts and functionality of different fundamental elements of networking.
Topic 2	<ul style="list-style-type: none"> • Operational Monitoring and Maintenance: Different methods of monitoring or maintaining Junos devices are identified in this topic. Lastly, it discusses monitoring or maintenance procedures for a Junos device.
Topic 3	<ul style="list-style-type: none"> • User Interfaces: This topic delves into identifying the concepts, operation, or functionality of the Junos user interface.
Topic 4	<ul style="list-style-type: none"> • Routing Fundamentals: This topic discusses pointing out basic routing concepts or functionality for Junos devices. Moreover, the topic also describes configuring or monitoring basic routing elements for a Junos device.
Topic 5	<ul style="list-style-type: none"> • Junos OS Fundamentals: It covers concepts, benefits, and functionality of the core elements of the Junos OS.

Juniper Junos, Associate (JNCIA-Junos) Sample Questions (Q52-Q57):

NEW QUESTION # 52

Which command displays all IPv6 routes in the default routing instance?

- A. showroute table inet.0
- B. showroute table inet6.1
- C. showroute table inet.1
- **D. showroute table inet6.0**

Answer: D

Explanation:

The show route table inet6.0 command displays all IPv6 routes in the default routing instance. In Junos OS, the routing table for IPv6 addresses is referred to as inet6.0, whereas inet.0 is used for IPv4 unicast routes.

The other options do not correspond to the correct IPv6 routing table.

* Juniper official documentation: Junos OS Routing Tables Overview.

NEW QUESTION # 53

What is a benefit of using J-Web?

- **A. It provides a customizable dashboard.**
- B. It provides more advanced features than the CLI.
- C. It provides console-based management.
- D. It simultaneously manages multiple devices.

Answer: A

Explanation:

If you've committed a configuration and then need to revert to the previous configuration, the rollback command is used. Since the incorrect IP address has not been committed, as indicated by the commit check command being successful, issuing rollback 1 will undo the changes made in the current session, which includes the accidental entry of the IP address.

NEW QUESTION # 54

What information would you find using the CLI help command?

- **A. an explanation for specific system log error messages**
- B. message of the day
- C. hyperlinks for remediation actions

- D. a URL for accessing the technical documentation

Answer: A

Explanation:

The CLI help command in Junos OS provides assistance and explanations for commands, command options, and in some cases, specific system log error messages. By using the help command followed by specific keywords or messages, users can get detailed information and context for the commands they are using or errors they are encountering. This feature is particularly useful for understanding the purpose of commands, their syntax, and troubleshooting error messages that may appear in system logs.

NEW QUESTION # 55

What are two physical interface properties? (Choose two.)

- A. MAC address
- B. routing protocols
- C. IP address
- D. MTU

Answer: A,D

Explanation:

Two physical interface properties in Junos OS include the MAC address (A) and the Maximum Transmission Unit (MTU) size (D). The MAC address is a hardware identifier for the network interface, while the MTU size determines the largest packet size that the interface can transmit without needing to fragment the packet.

NEW QUESTION # 56

Click the Exhibit button.

```
[edit firewall filter test]
term 1 {
  from {
    source-address {
      10.0.0.0/8;
    }
  }
  then {
    log;
    next term;
  }
}
term 2 {
  then {
    reject;
  }
}
}
```

The screenshot shows a Juniper CLI window titled "Exhibit" with a close button in the top right corner. The main content area displays the configuration for a firewall filter named "test". The configuration is as follows:

```
[edit firewall filter test]
term 1 {
  from {
    source-address {
      10.0.0.0/8;
    }
  }
  then {
    log;
    next term;
  }
}
term 2 {
  then {
    reject;
  }
}
}
```

A large watermark "actual4test.com" is overlaid diagonally across the center of the exhibit. At the bottom of the exhibit, the Juniper Networks logo is visible.

How is traffic, sourced from 10.0.0.0/8, treated by the firewall filter shown in the exhibit?

- A. logged and accepted
- B. logged with no further action
- C. logged and rejected
- D. logged and discarded

Answer: A

Explanation:

The firewall filter configuration in the exhibit specifies a filter with two terms. Term 1 matches traffic from the source address 10.0.0.0/8 and has two actions: 'log' and 'next term'. The 'log' action will record the match to a log file, and 'next term' indicates that the firewall should evaluate the next term after logging. There is no explicit action such as 'accept' or 'reject' in term 1, so by default, the traffic will be accepted unless subsequently rejected by another term.

Term 2 has the action 'reject', which discards packets that reach this term. Since there is no 'from' condition in term 2, it acts as a default rule for all traffic not matched by term 1.

Because the traffic sourced from 10.0.0.0/8 matches term 1 and there is no reject action in that term, it will be logged and then accepted by the firewall filter. There is no subsequent term that rejects this specific traffic, so the action from term 2 does not apply to it.

NEW QUESTION # 57

.....

With our Juniper JN0-105 study materials, you can make full use of those time originally spent in waiting for the delivery of exam files so that you can get preparations as early as possible. There is why our Juniper JN0-105 learning prep exam is well received by the general public.
