## **SAP C\_SEC\_2405 Valid Exam Prep | C\_SEC\_2405 Valid Exam Cost**

The easy to learn format of these amazing C\_SEC\_2405 exam questions will prove one of the most exciting exam preparation experiences of your life! When you are visiting on our website, you can find that every button is easy to use and has a swift response. And there are three varied versions of our C\_SEC\_2405 learning guide: the PDF, Software and APP online. Every version of our C\_SEC\_2405 simulating exam is auto installed if you buy and study with them. They are perfect in every detail.

## **SAP Certified Associate - Security Administrator Sample Questions (Q56-**

## Q61):

### NEW QUESTION # 56

How does Rapid Activation support customers during the SAP S/4HANA on-premise implementation process? Note: There are 3 correct answers to this question.

- A. By allowing customers to select and activate SAP Fiori apps one by one, independent of dependencies needed for app-to-app navigation.
- B. By allowing customers to select individual SAP Fiori apps for their end-to-end business processes.
- C. By supporting content activation at the business role level, including SAP Fiori apps and all associated Web Dynpro for ABAP applications.
- D. By helping customers to start exploring SAP Fiori in SAP S/4HANA on premises as quickly as possible.
- E. By reducing the SAP Fiori activation effort during the Explore phase of SAP Activate.

**Answer: C,D,E**

Explanation:

Rapid Activation is a feature designed to streamline the implementation of SAP Fiori in SAP S/4HANA on-premise by:

\* Quick Exploration (A):

\* Provides preconfigured activation to allow customers to explore SAP Fiori apps and capabilities without lengthy setup.

\* Business Role-Level Activation (B):

\* Activates SAP Fiori content at the business role level, including associated Web Dynpro for ABAP applications, ensuring that users have a functional end-to-end experience.

\* Reduced Effort (E):

\* Minimizes the activation workload during the Explore phase of the SAP Activate methodology, allowing quicker alignment with business needs.

### NEW QUESTION # 57

In the administration console of the Cloud Identity Services, which system property types can you add? Note:

There are 2 correct answers to this question.

- A. Credential
- B. Internal
- C. Default
- D. Standard

**Answer: B,D**

Explanation:

In the administration console of Cloud Identity Services, system properties can be configured to enhance system integration and management. The two property types are:

\* Standard (A): These are predefined system properties provided by SAP. They help maintain consistent configurations across systems and streamline administrative tasks.

\* Internal (B): These properties are used internally by the system to manage configurations and processes specific to SAP Cloud Identity Services.

SAP Security References:

\* SAP Cloud Identity Services Documentation

\* SAP Help Portal: Administration Guide for Cloud Identity Services

### NEW QUESTION # 58

After you maintained authorization object S\_TABU\_DIS and ACTVT field value 02 as authorization defaults for transaction SM30 in your development system, what would be the correct option for transporting only these changes to your quality assurance system?

- A. Save your changes to a Workbench transport request and transport using the Transport Management System
- B. Save tables USOBT\_C and USOBX\_C to a transport request and transport using the Transport Management System
- C. Save your changes to a Customizing transport request and transport using the Transport Management System

- D. Save your changes and use the transport interface in SU25 to transport the changes using the Transport Management System.

**Answer: A**

Explanation:

When you maintain authorization defaults (e.g., adding authorization object S\_TABU\_DIS with ACTVT value 02 for transaction SM30) and need to transport these changes:

\* Changes are Cross-Client and Repository-Based:

\* Authorization default changes in SU24 are considered cross-client because they affect all clients in the system.

\* These changes are part of the SAP repository and are treated as Workbench requests.

\* Save Changes to a Workbench Transport Request:

\* Upon saving changes in SU24, the system prompts you to assign them to a transport request.

\* Select or create a Workbench transport request to capture the changes.

\* Use the Transport Management System (TMS):

\* Use TMS to transport the Workbench request from the development system to the quality assurance system.

\* This ensures that the authorization defaults are consistently applied across systems.

Why Other Options Are Incorrect:

\* Option B: Customizing transport requests are client-specific and not suitable for cross-client repository changes.

\* Option C: Manually transporting tables USOBT\_C and USOBX\_C is not recommended and can lead to inconsistencies.

\* Option D: SU25 is used for post-upgrade authorization adjustments, not for transporting SU24 changes.

SAP Security References:

\* SAP Help Portal: Transporting Authorization Data Changes

\* SAP Documentation: Using Workbench Requests for Cross-Client Objects

\* SAP Note: Best Practices for Transporting SU24 Authorization Defaults

## NEW QUESTION # 59

When creating PFCG roles for SAP Fiori access, what is included automatically when adding a catalog to the menu of a back-end PFCG role? Note: There are 2 correct answers to this question.

- A. The IWSV TADIR service definitions from the catalog.
- B. The IWSG TADIR service definitions from the catalog.
- C. The start authorizations and the authorization default values for each IWSV TADIR service definitions in the catalog.
- D. The start authorizations and the authorization default values for each IWSG TADIR service definitions in the catalog.

**Answer: A,D**

## NEW QUESTION # 60

Which access categories are available to maintain restrictions in SAP S/4HANA Cloud Public Edition?

Note: There are 3 correct answers to this question.

- A. Value Help (value help access)
- B. Write, Read, Value Help (write access)
- C. Write, Read (write access)
- D. Read (read access)
- E. Read, Value Help (read access)

**Answer: A,D,E**
