

2026 300-410 Latest Cram Materials Free PDF | Pass-Sure Valid Braindumps 300-410 Free: Implementing Cisco Enterprise Advanced Routing and Services

DOWNLOAD the newest TestsDumps 300-410 PDF dumps from Cloud Storage for free: <https://drive.google.com/open?id=1ESxp7lu5OCAOOBYK8XGgZEw9jec-tfYw>

You can try the free demo version of any Cisco 300-410 exam dumps format before buying. For your satisfaction, TestsDumps gives you a free demo download facility. You can test the features and then place an order. So, these real and updated Cisco dumps are essential to pass the 300-410 Exam on the first try.

Cisco 300-410 (Implementing Cisco Enterprise Advanced Routing and Services) certification exam is designed to validate a candidate's knowledge and skills in implementing advanced routing technologies and services in enterprise networks. Implementing Cisco Enterprise Advanced Routing and Services certification exam is intended for network professionals who are responsible for designing, implementing, and troubleshooting complex enterprise network infrastructure. Successful candidates will be able to configure and troubleshoot advanced routing services such as BGP, OSPF, EIGRP, and IS-IS, as well as implement security, QoS, and automation solutions.

To prepare for the 300-410 Exam, candidates are required to have a solid understanding of routing protocols such as OSPF and EIGRP, as well as basic network security concepts such as access control lists (ACLs) and virtual private networks (VPNs). They should also have experience with network design, implementation, and troubleshooting, and have a good understanding of the Cisco IOS XE operating system.

100% Free 300-410 – 100% Free Latest Cram Materials | High Hit-Rate Valid Braindumps Implementing Cisco Enterprise Advanced Routing and Services Free

Achieving success in the Cisco 300-410 certification exam opens doors to lucrative job opportunities and career advancements. The Implementing Cisco Enterprise Advanced Routing and Services (300-410) credential is highly valuable in today's industry. However, many candidates face the frustration of exam failure and wasted time and resources by relying on outdated Cisco 300-410 Practice Questions. To save both time and money, it is crucial to prepare with the most up-to-date and reliable 300-410 exam questions.

To prepare for the Cisco 300-410 Exam, candidates can use a range of resources, including Cisco official training courses, study guides, and practice exams. They can also use online forums and communities to interact with other candidates and share their knowledge and experience. Candidates are advised to have hands-on experience with the technologies and services covered in the exam to be able to pass it successfully. Cisco recommends at least 3-5 years of experience in implementing and managing enterprise network infrastructures before attempting the exam.

Cisco Implementing Cisco Enterprise Advanced Routing and Services Sample Questions (Q219-Q224):

NEW QUESTION # 219

Refer to the exhibit. A network engineer receives a report that Spoke 1 users can perform bank transactions with the server located at the Center site, but Spoke 2 users cannot. Which action resolves the issue?

- A. Configure OSPFv2 on the routers B and C interfaces
- B. Configure the Spoke 2 users IP on the router B OSPF domain
- C. Configure encapsulation dot1q 78 on the router C interface.
- **D. Configure IPv6 on the routers B and C interfaces**

Answer: D

NEW QUESTION # 220

Refer to the exhibit.

When the FastEthernet0/1 goes down, the route to 172.29.0.0/16 via 192.168.253.2 is not installed in the RIB. Which action resolves the issue?

- **A. Configure feasible distance greater than the reported distance**
- B. Configure feasible distance greater than the successor's feasible distance.
- C. Configure reported distance greater than the feasible distance
- D. Configure reported distance greater than the successor's feasible distance.

Answer: A

Explanation:

From the exhibit, we notice network 172.29.0.0/16 was learned via two routes:

+ From 192.168.254.2 with FD = 307200 and AD = 281600

+ From 192.168.253.2 with FD = 410200 and AD = 352300

The first route is installed into the RIB as the successor route because of lower FD.

When the first route fails, router will not use the second route as it does not satisfy the feasibility condition.

The feasibility condition states that, the Advertised Distance (AD, also called the reported distance) of a route must be lower than the feasible distance of the current successor route.

NEW QUESTION # 221

```
ip access-list extended CoPP-ICMP
 permit icmp any any echo
!
ip access-list extended CoPP-BGP
 permit tcp any eq bgp any established
!
ip access-list extended CoPP-EIGRP
 permit eigrp any host 224.0.0.10
!
Class-map match-all CoPP-CLASS
 match access-group name CoPP-ICMP
 match access-group name CoPP-BGP
 match access-group name CoPP-EIGRP
!
```

Refer to the exhibit A CoPP policy is implemented to allow specific control traffic, but the traffic is not matching as expected and is getting unexpected behavior of control traffic. Which action resolves the issue?

- A. Use match-any instruction in class-map
- B. Create a separate class map for ICMP traffic.
- C. Create a separate class map against each ACL.
- D. Use default-class to match ICMP traffic

Answer: A

NEW QUESTION # 222

The network administrator configured the router for Control Plane Policing so that inbound SSH traffic is policed to 500 kbps. This policy must apply to traffic coming in from 10.10.10.0/24 and 192.168.10.0/24 networks.

```
access-list 100 permit ip 10.10.10.0 0.0.0.255 any
access-list 100 permit tcp 192.168.10.0 0.0.0.255 any eq 22
!
class-map CLASS-SSH
 match access-group 100
!
policy-map PM-COPP
 class CLASS-SSH
  police 500000 conform-action transmit
!
interface E0/0
 service-policy input PM-COPP
!
interface E0/1
 service-policy input PM-COPP
```

The Control Plane Policing is not applied to SSH traffic and SSH is open to use any bandwidth available. Which configuration resolves this issue?

```
no access-list 100
access-list 100 permit tcp 10.10.10.0 0.0.0.255 any eq 22
access-list 100 permit tcp 192.168.10.0 0.0.0.255 any eq 22
!
policy-map PM-COPP
 class CLASS-SSH
  no police 500000 conform-action transmit
  police 500000 conform-action transmit exceed-action drop
!
interface E0/0
 no service-policy input PM-COPP
!
interface E0/1
 no service-policy input PM-COPP
!
control-plane
 service-policy input PM-COPP
```

- no access-list 100
access-list 100 permit tcp 10.10.10.0 0.0.0.255 any eq 22
access-list 100 permit tcp 192.168.10.0 0.0.0.255 any eq 22
!
Interface E0/0
no service-policy input PM-COPP
!
Interface E0/1
no service-policy input PM-COPP
!
control-plane
service-policy input PM-COPP
- no access-list 100
access-list 100 permit tcp 10.10.10.0 0.0.0.255 any eq 22
access-list 100 permit tcp 192.168.10.0 0.0.0.255 any eq 22

- no access-list 100
access-list 100 permit tcp 10.10.10.0 0.0.0.255 any eq 22
access-list 100 permit tcp 192.168.10.0 0.0.0.255 any eq 22
- A.

interface E0/0
no service-policy input PM-COPP
!
interface E0/1
no service-policy input PM-COPP
!
control-plane
service-policy input PM-COPP
- B.

no access-list 100
access-list 100 permit tcp 10.10.10.0 0.0.0.255 any eq 22
access-list 100 permit tcp 192.168.10.0 0.0.0.255 any eq 22

interface E0/0
no service-policy input PM-COPP

interface E0/1
no service-policy input PM-COPP

control-plane
service-policy input PM-COPP
- C.

no access-list 100
access-list 100 permit tcp 10.10.10.0 0.0.0.255 any eq 22
access-list 100 permit tcp 192.168.10.0 0.0.0.255 any eq 22
!
policy-map PM-COPP
class CLASS-SSH
no police 500000 conform-action transmit
police 500000 conform-action transmit exceed-action drop
- D.

Answer: C

NEW QUESTION # 223

```

MASS-RTR#show running-config
!
hostname MASS-RTR
!
aaa new-model
!
aaa authentication login default local
aaa authorization exec default local
aaa authorization commands 15 default local
!
username admin privilege 15 password 7 0236244818115F3348
username cisco privilege 15 password 7 0607072C494A5B
archive
 log config
  logging enable
  logging size 1000
!
interface GigabitEthernet0/0
 ip address dhcp
 duplex auto
 speed auto
!
line vty 0 4
!

MASS-RTR#show archive log config all

```

idx	sess	user@line	Logged command
1	1	console@console	interface GigabitEthernet0/0
2	1	console@console	no shutdown
3	1	console@console	ip address dhcp
4	2	admin@vty0	username cisco privilege 15 password cisco
5	2	admin@vty0	!config: USER TABLE MODIFIED

Refer to the exhibit. A client is concerned that passwords are visible when running this show archive log config all. Which router configuration is needed to resolve this issue?

- A. MASS-RTR(config-archive-log-cfg)#password encryption aes
- B. MASS-RTR(config)#aaa authentication arap
- C. MASS-RTR(config-archive-log-cfg)#hidekeys
- D. MASS-RTR(config)#service password-encryption

Answer: C

Explanation:

Section: Mixed Questions

NEW QUESTION # 224
