Pegasystems - PEGACPSSA23V1 –High-quality Exam Assessment

People who want to pass the exam have difficulty in choosing the suitable PEGACPSSA23V1 guide questions. They do not know which study materials are suitable for them, and they do not know which the study materials are best. Our company can promise that the PEGACPSSA23V1 study materials from our company are best among global market. As is known to us, the PEGACPSSA23V1 Certification guide from our company is the leading practice materials in this dynamic market. All study materials from our company are designed by a lot of experts and professors. In addition, these experts and professors from our company are responsible for constantly updating the PEGACPSSA23V1 guide questions.

Pegasystems Certified Pega Senior System Architect 23 Sample Questions (Q138-Q143):

NEW QUESTION # 138

Identify two options for passing data between a Pega application and a webpage containing a web mashup. (Choose Two)

- A. Call the function `pega.web.api.doAction()`
- B. Call a Pega API function from the host server
- C. Use REST methods to call Pega microservices
- D. Use the attribute `data-pega-event-onpagedata`

Answer: A,D

Explanation:

A: Calling the function `pega.web.api.doAction()` allows for specific actions to be performed in the Pega application from the web mashup, such as refreshing a section or submitting an assignment.

D: Using the attribute `data-pega-event-onpagedata` allows for passing data from the web mashup to the Pega application when specific events occur on the page. Reference: Pega official documentation on Pega Web Mashup methods and attributes.

NEW QUESTION # 139

Which requirement is a prerequisite for configuring a Pega Web Mashup?

- A. At least one work queue in your application
- B. At least one Access control policy rule
- C. No outstanding Guardrail violations
- D. A web server to test your host page

Answer: D

Explanation:

A prerequisite for configuring a Pega Web Mashup is having a web server to test your host page. This is because the mashup will be embedded within a webpage, and testing on a web server ensures that the integration works as expected before going live.

References: Pega official documentation on Pega Web Mashup prerequisites.

NEW QUESTION # 140

The current version of an application lists ABC:02-02 as an application ruleset. The ruleset versions listed in the Answer Area are also present on the system.

In the Answer Area, identify the ruleset versions that the skim operation considers when you perform a major version ruleset skim on ruleset ABC.

☐

Answer:

Explanation:

☐

NEW QUESTION # 141

What is the purpose of the Policy Verification landing page when configuring a security solution in Pega Platform?

- A. To manually authenticate a specific user on an integrated external database
- B. To configure mapping of access control attributes
- C. To test if a user's channel-specific password meets defined property requirements
- **D. To test if a user has the required access to a case**

Answer: D

Explanation:

The purpose of the Policy Verification landing page in Pega Platform is to test if a user has the required access to a case (A). This tool allows administrators and developers to verify access control policies by simulating how the policies would apply to different users, ensuring that the security configurations align with the application's requirements and that users have appropriate access levels to cases and data. Reference: Pega Community documentation on security policies and Policy Verification tool.

NEW QUESTION # 142

A city resident can report potholes to the Department of Transportation by logging in to a mobile Pega Platform application that utilizes the Pega API.

Which two Pega API interactions do you use to facilitate this? (Choose two.)

- A. Log into the application using PUT/authenticate
- **B. Submit the report using POST/cases**
- **C. Access the related case type to report using GET/casetypes**
- D. Update the report using GET/cases

Answer: B,C

Explanation:

To report potholes through a mobile application using the Pega API, the POST/cases method would be used to submit the report case, and the GET/casetypes method would be used to access the related case type to ensure the correct case type is used for the report. References: Pega Platform API Guide.

NEW QUESTION # 143

.....
