Workday-Prism-Analytics Relevant Questions & Workday-Prism-Analytics Exam Tests

To let the clients be familiar with the atmosphere and pace of the real Workday-Prism-Analytics exam we provide the function of stimulating the exam. In such a way, our candidates will become more confident by practising on it. And our expert team updates the Workday-Prism-Analytics Study Guide frequently to let the clients practice more. So the quality of our Workday-Prism-Analytics practice materials is very high and we can guarantee to you that you will have few difficulties to pass the exam.

Convenience of the online version of our Workday-Prism-Analytics study materials is mainly reflected in the following aspects: on the one hand, the online version is not limited to any equipment. You are going to find the online version of our Workday-Prism-Analytics exam prep applies to all electronic equipment, including telephone, computer and so on. On the other hand, if you decide to use the online version of our Workday-Prism-Analytics Study Materials, you don't need to worry about no network.

>> Workday-Prism-Analytics Relevant Questions <<

Authoritative Workday Relevant Questions – High Hit Rate Workday-Prism-Analytics Exam Tests

As an IT field top company Workday certifications are verified as senior products expert standards. Workday field reputation and products market share improve certification engine's high gold content. Workday-Prism-Analytics latest vce exam simulator can help you pass exam and get certification so that you can obtain senior position soon. Senior engineers with professional certification have 60% opportunities and 30% salary or so more than normal engineers.

Workday Pro Prism Analytics Exam Sample Questions (Q49-Q54):

NEW QUESTION # 49
You want to configure access to a published Prism data source to use it in reporting and discovery boards.
What action must you take?

- A. Share the dataset with appropriate users.
- B. Edit the data source security and select a domain.
- C. Schedule the recurring publish process.
- D. Share the imported Workday report to provide users with access to the published Prism data source.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, configuring access to a published Prism data source for use in reporting and discovery boards requires managing its security settings. According to the official Workday Prism Analytics study path documents, the necessary action is to edit the data source security and select a domain (option A).
After a dataset is published as a Prism data source, access is controlled through security domains. By editing the data source security and assigning it to an appropriate security domain (e.g., a domain that grants access to specific user groups like report writers or analysts), you ensure that authorized users can access the data source for reporting and discovery boards. This aligns with Workday's configurable security framework, ensuring that only users with the appropriate permissions can view or use the data source.
The other options are incorrect:
* B. Share the dataset with appropriate users: Sharing the dataset itself does not grant access to the published Prism data source; access to the data source is controlled through its security settings, not the dataset's sharing settings.
* C. Share the imported Workday report to provide users with access to the published Prism data source:
Sharing an imported Workday report does not affect access to the Prism data source; the data source's security must be configured directly.
* D. Schedule the recurring publish process: Scheduling a recurring publish process ensures the data source is updated regularly, but it does not configure access for reporting or discovery boards.
Editing the data source security and selecting a domain is the critical step to enable access for reporting and discovery boards.

NEW QUESTION # 50
You explode the Language Skills multi-instance field on your derived dataset and you want to change the business object that the new Language Skills Exploded instance field is mapped to. What steps should you take?

- A. Add a Manage Fields after the Explode stage and modify the business object.
- B. Add a Manage Fields before the Explode stage and modify the business object.
- C. Click on the Related Actions next to the business object in the insight panel.
- D. Select from the list of suggested BO values in the Explode stage configuration.

Answer: A

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, the Explode stage transforms a multi-instance field (e.g., Language Skills) into multiple rows, creating a new single-instance field (e.g., Language Skills Exploded). The resulting field inherits the business object (BO) mapping from the original multi-instance field, but this mapping can be modified if needed. According to the official Workday Prism Analytics study path documents, to change the business object that the new Language Skills Exploded instance field is mapped to, you should add a Manage Fields stage after the Explode stage and modify the business object (option D).
The Manage Fields stage allows you to edit field properties, including the business object mapping, for the exploded field. After the Explode stage creates the new single-instance field, the Manage Fields stage can be used to reassign the business object by selecting a different Workday business object (e.g., changing from a generic object to a specific one like "Language"). This step ensures the field is mapped correctly for downstream reporting or integration with Workday reports.
The other options are incorrect:
* A. Select from the list of suggested BO values in the Explode stage configuration: The Explode stage does not provide an option to

modify business object mappings during its configuration; it focuses on exploding the multi-instance field.
* B. Click on the Related Actions next to the business object in the insight panel: The insight panel provides metadata insights but does not allow direct modification of business object mappings for fields.
* C. Add a Manage Fields before the Explode stage and modify the business object: Modifying the business object before the Explode stage affects the original multi-instance field, but the Explode stage will still create the new field with the inherited mapping, so this does not achieve the goal.
Adding a Manage Fields stage after the Explode stage is the correct approach to modify the business object mapping of the new exploded field.

NEW QUESTION # 51
What task or report should you access to view a Prism data source?

- A. Edit Data Source Security task
- B. Edit Dataset Transformations task
- C. View Dataset Details report
- D. View Prism Data Source report

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, a Prism data source represents the published dataset that is available for reporting and analytics within the Workday ecosystem. According to the official Workday Prism Analytics study path documents, the "View Prism Data Source" report is the specific task or report designed to allow users to view the details of a Prism data source. This report provides comprehensive information about the data source, including its metadata, structure, and associated attributes, enabling users to understand the data available for reporting purposes.
The other options do not serve this purpose. The "Edit Dataset Transformations task" is used to modify the transformation logic applied to a dataset, not to view a data source. The "Edit Data Source Security task" focuses on managing security settings for a data source, such as access permissions, rather than viewing its contents. Similarly, the "View Dataset Details report" provides information about a dataset (including its metadata and sample rows) but does not specifically address the published Prism data source, which is a distinct entity created after a dataset is published.
The "View Prism Data Source" report is the correct choice as it directly aligns with the need to inspect the properties and structure of a Prism data source, ensuring users can verify its suitability for reporting or integration with Workday reports.

NEW QUESTION # 52
The Prism use case is to classify workers based on their pay. You must create a field that evaluates worker pay and returns a value that represents various pay ranges. How would you add this field for inclusion on the Prism data source?

- A. Build a CASE calculated field function on the TBL directly to ease later transformation.
- B. Create a derived dataset and build a CASE calculated field to classify workers against their pay.
- C. Build an Evaluate Expression calculated field on your final Prism business object to evaluate workers against their pay.
- D. Add the additional field to your raw data before you ingest into Prism.

Answer: B

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, classifying workers into pay ranges based on their pay requires creating a new field that evaluates the pay values and assigns them to defined ranges (e.g., "Low," "Medium," "High").
According to the official Workday Prism Analytics study path documents, the recommended approach is to create a derived dataset (DDS) and build a CASE calculated field to classify workers against their pay (option B). The CASE function in a calculated field

allows users to define conditional logic (e.g., CASE WHEN pay
< 50000 THEN "Low" WHEN pay < 100000 THEN "Medium" ELSE "High" END), which is ideal for creating pay range classifications. This calculated field is added within a deriveddataset, which can then be published as a Prism data source, making the new field available for reporting and analytics.
The other options are not optimal:
* A. Add the additional field to your raw data before you ingest into Prism: Modifying raw data outside Prism is unnecessary and less flexible, as Prism's transformation capabilities (like CASE) are designed for such tasks.
* C. Build a CASE calculated field function on the TBL directly to ease later transformation: Calculated fields cannot be created directly on a table (TBL) in Prism Analytics; they must be defined in a derived dataset.
* D. Build an Evaluate Expression calculated field on your final Prism business object to evaluate workers against their pay: Prism Analytics does not use "Prism business objects" for calculated fields, and "Evaluate Expression" is not a standard function; this option is not applicable.
Using a CASE calculated field in a derived dataset provides a flexible and maintainable way to classify workers by pay ranges, ensuring the field is included in the final Prism data source.

Workday Prism Analytics Study Path Documents, Section: Data Prep and Transformation, Topic: Creating Calculated Fields with CASE Functions Workday Prism Analytics Training Guide, Module: Data Prep and Transformation, Subtopic: Classifying Data Using Calculated Fields in Derived Datasets

NEW QUESTION # 53
What report can you run to edit and maintain your Prism import and publish schedules?

- A. Prism Usage
- B. Prism Activities Monitor
- C. Prism Management Console
- D. Scheduled Future Processes

Answer: D

Explanation:
Comprehensive and Detailed Explanation From Exact Extract:
In Workday Prism Analytics, managing schedules for importing data into tables or publishing datasets as Prism data sources is a key administrative task. According to the official Workday Prism Analytics study path documents, the Scheduled Future Processes report (option A) is the tool used to edit and maintain Prism import and publish schedules. This report provides a centralized view of all scheduled processes in Workday, including Prism-related tasks such as Data Change tasks (for imports) and dataset publish schedules. Users can access this report to view, edit, or cancel scheduled processes, ensuring that data imports and publishes occur at the desired frequency and time.
The other options are incorrect:
* B. Prism Management Console: The Prism Management Console provides an overview of Prism activities and resources but does not allow for editing or maintaining schedules.
* C. Prism Activities Monitor: This report monitors the status of Prism activities (e.g., running or completed tasks) but does not manage schedules.
* D. Prism Usage: The Prism Usage report tracks usage metrics for Prism Analytics but does not handle scheduling tasks.
The Scheduled Future Processes report is the correct tool for managing Prism import and publish schedules, ensuring efficient data updates.

NEW QUESTION # 54
......

With the rapid development of science and technology today, people's work can gradually be replaced by machines. If you are an unemployed person, our study materials also should be the best choice for you. Workday-Prism-Analytics Quiz torrent can help you calm down and learn more knowledge of it, and what most important is that our study materials can help you use the shortest time to reach to the top of your career. What are you waiting for? Come and buy it now!

dumps.html

Workday Workday-Prism-Analytics Relevant Questions With the development of artificial intelligence, the unemployment rate is getting higher and higher, Workday Workday-Prism-Analytics Questions and Answers Study Guide Workday Workday-Prism-Analytics certification exam has become a very influential exam which can test computer skills.The certification of Workday certified engineers can help you to find a better job, so that you can easily become the IT white-collar worker,and get fat salary, First of all, it must be cleared that what we remark is just only the question database, aside other first-rate equipment of Workday-Prism-Analytics Exam Tests - Workday Pro Prism Analytics Exam real dumps.

Application installation and configuration, Workday-Prism-Analytics Exam Tests Exceptions raised by the Python interpreter during compilation are known as compile-time exceptions, With the development Workday-Prism-Analytics Dumps Collection of artificial intelligence, the unemployment rate is getting higher and higher.

Benefits of Preparing with the Workday-Prism-Analytics

Workday Workday-Prism-Analytics Questions and Answers Study Guide Workday Workday-Prism-Analytics certification exam has become a very influential exam which can test computer skills.The certification of Workday certified engineers can Workday-Prism-Analytics help you to find a better job, so that you can easily become the IT white-collar worker,and get fat salary.

First of all, it must be cleared that what we remark is **Workday-Prism-Analytics Relevant Questions** just only the question database, aside other first-rate equipment of Workday Pro Prism Analytics Exam real dumps, Moreover, we update our Workday-Prism-Analytics dumps torrent questions more frequently compared with the other review materials in our industry and grasps of the core knowledge exactly.

A lot of people are in pursuit of a good job, a Workday-Prism-Analytics certification, and a higher standard of life.
