reliable Scrum SAFe-Practitioner Exam study material. Don't worry about SAFe Practitioner Exam (6.0) SAFe-Practitioner test preparation, because PassReview is offering SAFe-Practitioner actual exam questions at an affordable price.

Scrum SAFe-Practitioner (SAFe 5 Practitioner (SP)) Exam is a certification exam that is designed to test the knowledge and skills of professionals who are interested in implementing the Scaled Agile Framework (SAFe) in their organizations. SAFe-Practitioner exam is based on the latest version of the SAFe framework, which is SAFe 5.0, and it covers a range of topics related to agile methodology, lean principles, and DevOps practices.

Scrum SAFe-Practitioner or SAFe 5 Practitioner (SP) exam is a valuable certification program that validates an individual's knowledge and skills in the SAFe framework. SAFe Practitioner Exam (6.0) certification is highly valued in the industry and is suitable for professionals involved in agile transformations and implementing SAFe practices at the enterprise level. Candidates can prepare for the exam by enrolling in SAFe training courses, reading SAFe literature, and practicing implementing SAFe practices in real-world scenarios.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q88-Q93):

NEW QUESTION # 88

What type of information can be easily seen in a cumulative flow diagram?

- A. Work in process across the team
- B. Team capacity
- C. The number of defects that escape to production
- D. Time to complete a Feature

Answer: A

Explanation:

cumulative flow diagram (CFD) is a visual tool that shows the amount of work in each stage of a process over time. It helps teams identify bottlenecks, work in progress (WIP), and the overall progress of a project or program increment (PI). By looking at the width of the bands in a CFD, teams can easily see how much work is in each workflow state at any given time. This allows them to monitor and optimize their flow of value delivery. NEW QUESTION # 89

What does INVEST stand for in the context of good user stories?

- A. Immutable, Negotiable, Valuable, Estimable, Specific, Testable
- B. Independent, Negotiable, Valuable, Estimable, Small, Testable
- C. Immutable, Negotiable, Valuable, Estimable, Small, Testable
- D. Immutable, Negative, Valuable, Estimable, Specific, Testable

Answer: B

NEW QUESTION # 90

What are three practices of Extreme Programming (XP)? (Choose three.) You have reached the max number of allowed answers

- A. Deployment automation
- B. Intentional architecture
- C. Behavior-driven development
- D. Continuous Integration
- E. Test-driven development
- F. Pair programming

Answer: D,E,F

Explanation:

Test-driven development (TDD) is a practice of writing automated tests before writing the production code, and then refactoring the code to make it pass the tests. TDD helps ensure that the code is correct, maintainable, and meets the requirements. Pair programming is a practice of having two programmers work together on the same code, one as the driver who writes the code, and

the other as the navigator who reviews the code and provides feedback. Pair programming helps improve the quality of the code, share knowledge, and reduce defects. Continuous Integration (CI) is a practice of integrating and testing the code frequently, usually several times a day, using automated tools. CI helps detect and fix errors early, improve collaboration, and deliver faster. NEW QUESTION # 91

What can be used as a template for putting SAFe into practice within an organization?

- A. SAFe Lean-Agile Principles
- **B. SAFe Implementation Roadmap**
- C. SAFe Seven Core Competencies
- D. SAFe Core values

Answer: B

Explanation:

SAFe Implementation Roadmap is a template for putting SAFe into practice within an organization. It consists of an overview graphic and a 14-article series that describes a strategy and an ordered set of activities for successfully implementing SAFe. The roadmap is based on proven organizational change management strategies and successful adoption patterns from hundreds of the world's largest enterprises. The roadmap helps leaders and change agents to script the critical moves, create a sense of urgency, build a guiding coalition, form a strategic vision, enlist a volunteer army, enable action by removing barriers, generate short-term wins, sustain acceleration, and institute change. NEW QUESTION # 92

Which of the following continuous delivery pipeline aspects focuses on enabling the organization to deliver value aligned with business needs?

- A. Continuous Integration
- B. Continuous Deployment
- C. Release on Demand
- **D. Continuous Exploration**

Answer: D

Explanation:

Continuous Exploration (CE) is the continuous delivery pipeline aspect that focuses on enabling the organization to deliver value aligned with business needs. CE is the process of understanding the market problem or customer need, defining a vision and a roadmap for the solution, and validating the assumptions and hypotheses through fast feedback and learning cycles. CE involves activities such as design thinking, lean startup, hypothesis-driven development, and innovation accounting. CE helps the organization align on what to build and why, and generate a continuous flow of valuable features for the solution.
