## Oracle Database Administration II Sample Questions (Q37-Q42):

### NEW QUESTION # 37

Which three are true about Recovery Manager (RMAN) active database duplication?

- A. Pre-existing backups of the database to be duplicated are required for the "push" method of duplication.
- B. Pre-existing backups of the database to be duplicated are required for the "pull" method of duplication.
- C. Backup sets can be used to duplicate the active database.
- D. No connection to the recovery catalog is required for active database duplication.
- E. Image copies can be used to duplicate the active database.
- F. Pre-existing backups of the database to be duplicated are always used if they exist.
- G. The active database must be duplicated while in OPEN state.

**Answer: C,D,E**

### NEW QUESTION # 38

Which two are true about instance recovery? (Choose two.)

- A. It is performed by the Recovery Writer (RVWR) background process.
- B. It is performed automatically after the database is opened; however, blocks requiring recovery are not available until they are recovered.
- C. Setting FAST\_START\_MTTR\_TARGET to a higher value reduces instance recovery time by causing The log writer to write more frequently, thereby reducing the number of I/Os needed during instance recovery.
- D. It is not possible if an archived log is missing.
- E. It is performed automatically while the database remains in MOUNT state. Then the database is opened.
- F. Setting FAST\_START\_MTTR\_TARGET to a lower value reduces instance recovery time by causing dirty buffers to be written to disk more frequently, thereby reducing the number of I/Os needed during instance recovery.

**Answer: E,F**

### NEW QUESTION # 39

Which three are true about interpreting Recovery Manager (RMAN) error stacks returned to standard output? (Choose three.)

- A. If an RMAN command fails, the output will only identify the command that failed.
- B. If an RMAN command fails, the output will identify the channel ID where the failure occurred.
- C. Media Management errors appear as a line with "sbtio" and a number.
- D. Some messages in the error stack are not errors.
- E. Media Management errors appear as a line with "Additional information" and a number.
- F. Media Management errors appear as a line with "sbtio".

**Answer: B,E,F**

### NEW QUESTION # 40

Which three are true about unified auditing in full mode?

- A. The unified audit trail is written to a read-only table.
- B. The unified audit trail is written to a read-only external file.
- C. Audit records are created for SYS.
- D. Audit records are created for COMMIT, ROLLBACK, and SAVEPOINT statements.
- E. Audit records are created for non-sys users.

**Answer: A,C,E**

## NEW QUESTION # 41

Which three are true about thresholds, metrics, and server-generated alerts? (Choose three.)

- A. STATISTICS\_LEVEL must be set to ALL to generate alerts.
- B. Metrics are statistical counts for a specific unit.
- C. All metrics are instance related.
- D. A space usage management alert is automatically cleared after the underlying problem is resolved.
- E. Cleared stateful alerts are displayed by querying DBA\_ALERT\_HISTORY.
- F. They are generated by SMON when a tablespace is 97% full.

**Answer: B,D,E**
